SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- . . figures not available.
- . . . figures not appropriate or not applicable.
- nil or zero.
- - amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE

In addition, in this publication (except as otherwise noted), blanks in those columns where wage-earners and salaried employees data are shown separately indicate that representative data for wage-earners for whom hours are recorded are not available.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- . . nombres indisponibles.
- . . . n'ayant pas lieu de figurer.
- néant ou zéro.
- - nombres infimes.
- p nombres provisoires.
- r nombres rectifiés.
- x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

NOTA

On remarquera que, dans la présente publication (sauf contraire) les colonnes laissées en blanc dans le cas des traitements et des employés à salaire indiqués séparément, signifient des données relatives aux employés pour lesquels les heures sont enregistrées ne sont pas disponibles.

Estimates (1) - January 1975

Seasonally-adjusted, the first estimate of the Canada industrial composite (2) index of employment (1961 = 100) showed a 1.3% drop from December 1974. For the most part, this decline reflected partial reductions in employment in durables manufacturing. There were also decreases in employment in all industry divisions except forestry and trade, which increased. All five regions showed similar levels of employment.

Average weekly earnings, unadjusted for seasonal variations, rose 0.0% from December 1974 to January 1975. All industry divisions participated in the overall advance in average earnings, which in part reflected the seasonal increase in hours worked. All five regions showed substantially higher earnings than in the previous month.

Preliminary Data (1) - December 1974

Employment - (Seasonally-Adjusted)

Preliminary data for December 1974 showed a slight decline in the *Canada* composite index of employment. Decreases in forestry, manufacturing, transportation, communication and other utilities, and the offset gains in the remaining industry divisions.

Employment in manufacturing fell (0.7%) for the second consecutive month. All components of durable goods declined, especially wood products, furniture and fixtures, transportation equipment and electrical products. In non-durables, gains in food and beverages, paper and allied industries were balanced by declines in textile products and in clothing. Service employment decreased 0.3% from November to December, as declines in the business and personal services more than offset gains in miscellaneous services. Widespread reductions in transportation offset increases in communication utilities, while in forestry, gains in logging in Ontario and Newfoundland were offset by declines in British Columbia and New Brunswick.

Employment in construction rose 3.0% from November to December mainly reflecting a changing employment pattern during the Christmas period. This changing pattern, which is particularly evident in Quebec, is the result of a growing tendency to provide a vacation, in this last pay period of December to employees who

See note on Statistical Presentation under Concepts and Methods at the back of this publication.

The Industrial Composite is the sum of all industries with the exception of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private households and public administration and defence. All statistics are based on returns received from employers having twenty (20) or more employees in any month of the year.

Premières estimations (1) - Janvier 1975

La première estimation désaisonnalisée de l'indice composite (2) de l'emploi dans les branches d'activité économique du Canada (1961 = 100) fait état d'une baisse de 1.3% par rapport à décembre 1974. Cette diminution reflète en grande partie des réductions appréciables de l'emploi dans les industries manufacturières de biens durables. L'emploi a également baissé dans toutes les divisions d'activités économiques, sauf dans le forage et le commerce, où il s'est accru. Les cinq régions ont enregistré des diminutions de l'emploi.

Les gains hebdomadaires moyens non désaisonnalisés ont augmenté de 4.0% entre décembre 1974 et janvier 1975. Toutes les divisions ont participé à la progression globale des gains moyens qui traduit en partie l'augmentation saisonnière du nombre d'heures travaillées. Les cinq régions ont connu des gains sensiblement plus élevés que le mois précédent.

Données provisoires (1) - Décembre 1974

Emploi - (chiffres désaisonnalisés)

Les données provisoires de décembre 1974 font ressortir une légère baisse de l'indice composite de l'emploi au *Canada*. Les diminutions enregistrées dans le forage, les industries manufacturières, les transports, communications et autres services d'utilité publique ainsi que dans les services ont contrebalancé les progressions observées dans les autres divisions d'activités économiques.

L'emploi dans les industries manufacturières a fléchi de 0.7% pour le deuxième mois consécutif. Toutes les composantes des biens durables ont enregistré une baisse, principalement les produits du bois, les meubles et accessoires d'ameublement, le matériel de transport et les appareils et matériel électriques. S'agissant des biens non durables, les augmentations notées dans les aliments et boissons et le papier et produits connexes ont été neutralisées par les diminutions observées dans les produits du textile et le vêtement. L'emploi dans les services a diminué de 0.3% entre novembre et décembre, et les réductions dans les composantes des services extérieurs des entreprises et des services personnels ont plus que contrebalancé les progressions enregistrées dans les services divers. Les importantes réductions touchant les transports ont contrebalancé les augmentations au chapitre des communications et autres services publics. Dans le secteur du forage, les augmentations dans le secteur de l'abattage en Ontario et à Terre-Neuve ont été neutralisées par les diminutions en Colombie-Britannique et au Nouveau-Brunswick.

L'emploi dans la construction a progressé de 3.0% entre novembre et décembre, reflétant ainsi surtout un changement du régime d'emploi pendant la période de Noël. Ce changement, qui s'est fait sentir surtout au Québec, est attribuable à la tendance croissante à accorder des vacances payées durant la dernière période de paie de décembre aux employés qui

(1) Voir Présentation statistique sous Concepts et méthodes à la fin de la présente publication.

(2) L'indice composite s'applique à l'ensemble des activités économiques sauf l'agriculture, la pêche et le piégeage, l'éducation et les services connexes, les services d'hygiène et de bien-être, les organisations religieuses, les ménages privés et l'administration publique et la défense. Les données sont fondées sur les déclarations soumises par les employeurs comptant au moins vingt (20) employés au cours d'un mois quelconque de l'année.

formerly were without pay during this period. The 0.3% advance in trade employment largely reflected the resolution of industrial disputes in Alberta food stores, plus widespread gains in department stores. The increase in finance, insurance and real estate was mainly in financial institutions. The 0.3% rise in mining employment reflected for the most part the resolution of industrial disputes in British Columbia metals.

In the *Atlantic Region*, the composite index of employment rose 0.7% following increases in Newfoundland, Prince Edward Island and New Brunswick. Employment increased in fish products, retail trade and insurance and real estate. Declines occurred in transportation, hotels, restaurants and taverns and logging.

The *Quebec* composite employment index showed almost no change from November to December. Employment advanced substantially in construction, mainly owing to the recently established practice of providing vacation pay during the Christmas period to employers who formerly were without pay during this period. Additional increases were recorded in personal and miscellaneous services and food and beverages. These gains were offset, for the most part, by declines in textile products, clothing, wood products, transportation and non-metals mining.

In *Ontario*, employment fell 0.7% in December. Most of this decline was in durables manufacturing, especially furniture and fixtures, primary metal industries, transportation equipment and electrical products. There were also widespread losses in retail trade and gains in logging and financial institutions.

The industrial composite index for the *Prairie Region* rose 1.2% from November to December as all three provinces showed higher levels of employment. The resolution of industrial disputes in food stores, plus gains in department stores, durables manufacturing and hotels, restaurants and taverns more than offset losses in transportation and services incidental to mining.

In *British Columbia* the industrial composite employment index dropped 0.2% in December. Reduced employment was recorded in logging, wood products and business services. Employment advanced in metals mining and in transportation.

Earnings and Hours

Seasonally-adjusted, average weekly earnings rose 0.9% at the Canada industrial composite level in December. Gains occurred in all industry divisions except forestry and in all five regions.

Unadjusted for seasonal variations, average weekly earnings for the Canada composite fell 1.5% to \$184.85. For the most part, this decline reflected a seasonal decrease in hours worked, especially in manufacturing and construction. All five regions showed levels of earnings which were down from November.

ne recevaient auparavant aucune rémunération pendant cette période. L'augmentation de 0.3% de l'emploi dans le commerce s'explique en grande partie par le règlement des conflits de travail dans les magasins d'alimentation de l'Alberta et par des augmentations généralisées de l'emploi dans les grands magasins. L'augmentation enregistrée dans les finances, assurances et immeuble est attribuable surtout aux établissements financiers. La progression de 0.3% de l'emploi dans les mines reflète en grande partie le règlement des conflits de travail dans les mines métalliques de la Colombie-Britannique.

Dans la *région de l'Atlantique*, l'indice composite de l'emploi s'est accru de 0.7% à la suite des augmentations enregistrées à Terre-Neuve, dans l'Île-du-Prince-Édouard et au Nouveau-Brunswick. L'emploi a augmenté dans les industries des produits de la pêche, le commerce de détail et les assurances et immeuble. Des diminutions ont été enregistrées dans les transports, les hôtels, restaurants et tavernes et l'abattage.

Au *Québec*, l'indice composite de l'emploi est demeuré pratiquement inchangé entre novembre et décembre. L'emploi s'est accru de façon sensible dans la construction à cause surtout de la pratique récemment d'accorder des vacances payées durant la période de Noël aux employés qui ne recevaient auparavant aucune rémunération pendant cette période. D'autres augmentations ont été enregistrées dans les services personnels divers et dans les aliments et boissons. Ces hausses ont été en grande partie neutralisées par des diminutions dans les produits du textile, le vêtement et les produits du bois, les transports et les mines non métalliques.

En *Ontario*, l'emploi a fléchi de 0.7% en décembre. La majeure partie de cette diminution a touché les industries manufacturières de biens durables, en particulier dans les industries de meubles et accessoires d'ameublement, de métaux (formes primaires), le matériel de transport, les appareils et matériel électriques. On a également observé des réductions étendues dans le commerce de détail et des augmentations dans l'abattage et les établissements financiers.

L'indice composite de l'emploi dans la *région des Prairies* a progressé de 1.2% entre novembre et décembre, les trois provinces ayant enregistré des augmentations. Le règlement des conflits de travail dans les magasins d'alimentation, en plus des augmentations dans les grands magasins, les industries manufacturières de biens durables et les hôtels, restaurants et tavernes ont plus que contrebalancé les diminutions notées dans les transports et les services miniers.

En *Colombie-Britannique*, l'indice composite de l'emploi a fléchi de 0.2% en décembre. Des diminutions ont été enregistrées dans l'abattage des produits du bois et les services extérieurs des entreprises. L'emploi a progressé dans les mines métalliques et les transports.

Gains et heures de travail

Les gains hebdomadaires moyens *désaisonnalisés* ont progressé de 0.9% en décembre pour l'ensemble des activités économiques au Canada. Des augmentations ont été enregistrées dans toutes les divisions d'activités économiques, (sauf le forestage) et dans les cinq régions.

Les gains hebdomadaires moyens *non désaisonnalisés* pour l'ensemble du Canada ont fléchi de 1.5% pour s'établir à \$184.85. Cette baisse reflète en grande partie une diminution saisonnière des heures de travail, surtout dans l'industrie manufacturière et la construction. Les gains ont diminué dans les cinq régions par rapport à novembre.

In *forestry*, average weekly earnings fell 16.5% mainly reflecting fewer hours worked in British Columbia, Quebec and New Brunswick.

Average weekly earnings in *mining* fell 0.7% from November to December. Earnings were reduced in all components except metals. Average weekly hours of hourly-rated wage-earners fell from 41.2 to 39.8 while average hourly earnings rose 9 cents to \$5.97. The decline in hours worked was in all components; the gain in hourly earnings was mainly in metals and mineral fuels.

In *manufacturing*, average weekly earnings fell 2.5% to \$4.87 as average weekly hours dropped from 39.0 to 36.7 while average hourly earnings rose 1.3% to \$4.72. The declines in weekly earnings and the gain in hourly earnings were widespread in both the durable and non-durable components.

Average weekly earnings in *construction* dropped 10.6% in December mainly due to the seasonal decline in hours worked. Average weekly hours dropped 12.6%, while average hourly earnings fell a 9 cent decline to \$6.81.

In *transportation, communication and other utilities*, average weekly earnings rose from \$212.14 in November to \$215.10 in December as gains were recorded in all components. In *trade*, average weekly earnings rose 2.0% mainly reflecting increased earnings in food stores and department stores.

Average weekly earnings in *finance, insurance and real estate* rose from \$175.94 to \$179.58 mainly due to gains in financial institutions, while in *service*, average weekly earnings rose 1.3% to \$14.23 as gains were recorded in all components except miscellaneous services.

Dans le *forestage*, les gains hebdomadaires moyens ont baissé de 16.5%, à cause surtout d'une diminution des heures de travail en Colombie-Britannique, au Québec, et au Nouveau-Brunswick.

Les gains hebdomadaires moyens dans les *mines* ont régressé de 0.7% entre novembre et décembre. Les gains ont diminué dans toutes les composantes sauf dans les métaux. Le nombre moyen d'heures de travail par semaine des employés payés à l'heure est passé de 41.2 à 39.8, tandis que les gains horaires moyens ont augmenté de 9 cents pour s'établir à \$5.97. La diminution des heures de travail a été observée dans toutes les composantes; la majoration des gains horaires s'est produite surtout dans les secteurs des métaux et des combustibles minéraux.

Dans les *industries manufacturières*, les gains hebdomadaires moyens ont diminué de 2.5% pour s'établir à \$192.87; le nombre moyen d'heures de travail par semaine est passé de 39.0 à 36.7, tandis que les gains horaires moyens ont augmenté de 1.3% pour s'établir à \$4.72. Cette diminution du nombre d'heures de travail par semaine et cette augmentation des gains horaires s'appliquaient à la fois aux composantes des biens durables et non durables.

Les gains hebdomadaires moyens dans la *construction* ont fléchi de 10.6% en décembre à cause surtout de la diminution saisonnière des heures de travail. Le nombre moyen d'heures de travail par semaine a baissé de 12.6%, et les gains horaires moyens ont accusé une diminution de 9 cents pour s'établir à \$6.81.

Dans les *transports, communications et autres services d'utilité publique*, les gains hebdomadaires moyens sont passés de \$212.14 en novembre à \$215.10 en décembre en raison des hausses enregistrées par toutes les composantes. Dans le *commerce*, les gains hebdomadaires moyens ont progressé de 2.0% en raison surtout des hausses dans les magasins d'alimentation et les grands magasins.

Les gains hebdomadaires moyens dans les *finances, assurances et immobilier* sont passés de \$175.94 à \$179.58 à la suite surtout d'augmentations dans les établissements financiers, tandis que dans les *services*, ils ont progressé de 1.3% pour s'établir à \$14.23; ces augmentations ont été enregistrées dans toutes les composantes sauf dans les services divers.

TABLE 6. Employment Distribution by Sex, by Selected Industries, for Canada

TABLEAU 6. Répartition de l'emploi selon le sexe pour certaines industries, Canada

	Industry Industrie	Déc. 1974		Nov. 1974		Déc. 1973		Déc. 1972	
		Men	Women	Men	Women	Men	Women	Men	Women
		Hommes	Femmes	Hommes	Femmes	Hommes	Femmes	Hommes	Femmes
		per cent - pourcentage							
039	Forestry - Forestage	97.8	2.2	97.9	2.1	98.3	1.7	98.3	1.7
1	Logging - Abattage	97.7	2.3	97.8	2.2	98.2	1.8	98.3	1.7
9	Forestry services	98.6	1.4	98.6	1.4	98.5	1.5	98.6	1.4
099	Mining, Including Milling - Mines, y compris le broyage ..	93.8	6.2	93.8	6.2	94.4	5.6	94.7	5.3
059	Metals	95.8	4.2	95.9	4.1	96.4	3.6	96.5	3.5
069	Mineral fuels - Combustibles minéraux	87.1	12.9	86.5	13.5	87.7	12.3	88.7	11.3
079	Non-metals except fuels - Autres que de métaux sauf les combustibles	95.7	4.3	95.9	4.1	95.8	4.2	96.2	3.8
087	Quarries and sand pits - Carrières et sablières	94.4	5.6	95.1	4.9	94.7	5.3	95.6	4.4
099	Services incidental to mining - Services miniers	94.8	5.2	95.2	4.8	95.5	4.5	95.7	4.3
399	Manufacturing - Manufactures	77.1	22.9	76.1	23.9	76.5	23.5	77.2	22.8
	Durable goods - Biens durables	86.0	14.0	85.3	14.7	85.9	14.1	86.3	13.7
147	Non-durable goods - Biens non durables	68.0	32.0	66.8	33.2	67.1	32.9	68.4	31.6
153	Food and beverages - Aliments et boissons	75.8	24.2	73.9	26.1	74.7	25.3	75.7	24.3
	Tobacco processing and products - Traitement et produits du tabac	63.8	36.2	67.2	32.8	62.1	37.9	75.3	24.7
169	Rubber products - Produits du caoutchouc	82.7	17.3	81.6	18.4	82.8	17.2	83.7	16.3
179	Leather products - Produits du cuir	45.7	54.3	47.4	52.6	45.8	54.2	49.2	50.8
229	Textile products - Produits du textile	64.9	35.1	64.2	35.8	64.7	35.3	66.1	33.9
239	Knitting mills - Bonneterie	40.4	59.6	38.9	61.1	39.5	60.5	38.2	61.8
249	Clothing	26.6	73.4	24.8	75.2	25.6	74.4	27.4	72.6
259	Wood products - Produits du bois	91.5	8.5	91.6	8.4	93.3	6.7	92.4	7.6
269	Furniture and fixtures - Meubles et accessoires d'ameublement	78.0	22.0	77.6	22.4	79.8	20.2	82.6	17.4
274	Paper and allied industries - Papier et produits connexes	87.1	12.9	87.0	13.0	88.0	12.0	88.0	12.0
289	Printing, publishing and allied industries - Imprimerie, édition et produits connexes	69.2	30.8	68.4	31.6	69.3	30.7	71.2	28.8
298	Primary metal industries - Métaux (formes primaires)	94.6	5.4	94.4	5.6	94.7	5.3	94.7	5.3
309	Metal fabricating industries - Produits métalliques	86.0	14.0	85.6	14.4	85.1	14.9	86.6	13.4
318	Machinery, except electrical - Machinerie (sauf le matériel électrique)	89.1	10.9	89.2	10.8	89.1	10.9	89.4	10.6
329	Transportation equipment - Matériel de transport	90.5	9.5	89.5	10.5	89.7	10.3	90.3	9.7
339	Electrical products - Appareils et matériel électriques	69.3	30.7	67.0	33.0	67.1	32.9	67.6	32.4
359	Non-metallic mineral products - Produits minéraux non métalliques	87.8	12.2	88.2	11.8	88.4	11.6	88.6	11.4
369	Petroleum and coal products - Pétrole, charbon et leurs dérivés	82.9	17.1	83.0	17.0	82.5	17.5	83.0	17.0
379	Chemicals and chemical products - Industrie chimique et des produits connexes	75.4	24.6	75.2	24.8	75.5	24.5	76.7	23.3
399	Miscellaneous manufacturing industries - Manufactures diverses	62.5	37.5	61.4	38.6	61.8	38.2	64.0	36.0
421	Construction	94.8	5.2	95.4	4.6	95.2	4.8	95.8	4.2
421	Building - Bâtiment	94.5	5.5	95.0	5.0	94.9	5.1	95.5	4.5
409	Engineering - Génie civil	95.3	4.7	96.0	4.0	95.8	4.2	96.4	3.6
579	Transportation, communication and other utilities - Transports, communication et autres services publics	83.0	17.0	83.1	16.9	84.3	15.7	84.5	15.5
519	Transportation - Transports	91.2	8.8	91.5	8.5	91.8	8.2	92.7	7.3
527	Storage - Entreposage	87.6	12.4	87.3	12.7	87.9	12.1	89.6	10.4
548	Communication - Communications	63.2	36.8	62.7	37.3	65.8	34.2	63.5	36.5
579	Electric power, gas and water - Electricité, gaz et eau	86.9	13.1	86.6	13.4	87.0	13.0	87.3	12.7
500	Trade - Commerce	60.1	39.9	60.2	39.8	60.8	39.2	60.2	39.8
529	Wholesale trade - Commerce de gros	76.6	23.4	76.5	23.5	77.7	22.3	79.1	20.9
599	Retail trade - Commerce de détail	52.6	47.4	52.6	47.4	53.4	46.6	51.9	48.1
737	Finance, Insurance and Real Estate - Finances, assurances et immeuble	47.0	53.0	46.7	53.3	43.8	56.2	44.1	55.9
704	Financial institutions - Etablissements financiers	42.8	57.2	42.2	57.8	37.5	62.5	38.3	61.7
737	Insurance and real estate - Assurances et immeuble	53.9	46.1	54.2	45.8	54.2	45.8	53.5	46.5
399	Service - Services	59.1	40.9	57.1	42.9	59.0	41.0	60.5	39.5
359	Recreational services - Services récréatifs	71.3	28.7	68.4	31.6	67.3	32.7	70.4	29.6
369	Business services - Services extérieurs des entreprises	63.4	36.6	57.5	42.5	63.1	36.9	64.7	35.3
379	Personal services - Services personnels	48.6	51.4	48.2	51.8	48.6	51.4	50.4	49.6
399	Miscellaneous services - Services divers	70.6	29.4	70.4	29.6	71.9	28.1	73.1	26.9
399	Industrial composite - Ensemble des industries	72.2	27.8	71.9	28.1	72.2	27.8	72.8	27.2

(1) First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

Note: 1. The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which wages are spent. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue 62-002. 3. The data in this table relate to average weekly wages of hourly-rated wage-earners only. Although this statistics is no longer tabulated as part of this survey, a special manual calculation has been made in order to retain this table because of its extensive usage. An approximation of this calculation can be obtained by multiplying average weekly hours by average hourly earnings, for a particular industry-area cell. - Nota: 1. Les salaires hebdomadaires courants ont trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des salaires hebdomadaires courants pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les salaires sont dépensés. 2. Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no. 62-002 au catalogue. 3. Les données de ce tableau ont trait aux salaires hebdomadaires moyens des employés à salaire (heures déclarées) seulement. Bien que cette statistique ne figure plus dans les tableaux tirés de la présente enquête, on a quand même fait un calcul spécial à la main en vue de maintenir ce tableau dont l'usage est très répandu. On peut obtenir une approximation de ce calcul en multipliant les heures hebdomadaires moyennes par la rémunération horaire moyenne pour un secteur particulier d'industrie-région.

TABLE 10. Average Weekly Earnings in Manufacturing in Current Dollars and Adjusted for Changes in the Consumer Price Index, for Canada

First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

1. The current weekly earnings relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly earnings for any month is therefore adjusted in the above table by the Consumer Price Index for the following month as more representative of the period in which earnings are spent. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue 62-002. 3. This table relates to average weekly earnings of all employees. - Nota: 1. Les rémunérations hebdomadaires courantes on trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des rémunérations hebdomadaires courantes pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les rémunérations sont dépensées. 2. Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no. 62-002 au Catalogue. 3. Ce tableau a trait à la rémunération hebdomadaire moyenne de tous les employés.

CONCEPTS AND METHODS

Each month the Monthly Employment, Payrolls and Labour Statistics of the Labour Division, through a mail survey, collects data on employment, earnings and hours which are tabulated in the data in this report. Data which, prior to March 1971, were published separately in "Employment and Average Weekly Wages and Salaries" (Catalogue 72-002) and in "Man-Hours and Hourly Earnings" (Catalogue 72-003) have been combined in this report. The following notes explain the concepts and methods used in

Unit

The reporting unit is usually the establishment, that is, the industrial unit which is a separate operating entity capable of producing all elements of basic industrial statistics including inputs and outputs needed to calculate "value added" or "gross profit" as well as data on employment and for purposes of detailed geographic statistics, the Section estimates that the reporting unit be a sub-establishment unit. Although not capable of reporting all basic statistics, can report employment and payroll data for that particular location.

Generally, the survey covers larger companies only, that is, those having 20 or more employees in any month of the year. In all the establishments of a multi-establishment company are included if the company had 20 or more employees in total in any month of the year even though any single establishment may have had fewer employees.

Period

Conceptually, the figures refer to the last seven days in the month. In practice, few establishments keep payroll records for precisely this period and establishments are therefore required to report for their last pay period or pay periods in each

If the reported pay period is longer than one week, the figures are reduced to one week's proportion of the totals. The denominators of the fractions used in calculating these weekly equivalents are 5, 6 or 7, depending on the number of working days per week which the establishment operated in the pay period. The numerators of the fractions are the number of working days in the pay periods. For employees paid at annual or monthly rates, the figures are not affected by the number of working days in the pay period. Proportions are used to reduce the earnings to a weekly basis with regard to the length of the calendar month.

If a holiday, layoff or industrial dispute occurs in an establishment that reports a pay period that is different from the last seven days of the month, an adjustment is made to the data, if the layoff or dispute affects the two periods differently, so that the data more fully reflects the actual situation during the reference

Industries are covered by the survey, with the exceptions of fishing and trapping, education and related services, welfare services, religious organizations, private household administration and defence. Because of the limitation of the survey to larger firms, there is somewhat uneven coverage of employment by industry as well as by province and urban area. The percentage of total employment covered depends on the propor-

CONCEPTS ET MÉTHODES

Chaque mois, la Section des Statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail de la Division du travail recueille, par voie d'enquête postale, des données sur l'emploi, les gains et les heures de travail, données qui sont ensuite publiées ici sous forme de tableaux. Les données qui, avant mars 1971, étaient publiées séparément dans "Employment and Average Weekly Wages and Salaries" (n° 72-002 au catalogue) et dans "Man-Hours and Hourly Earnings" (n° 72-003 au catalogue) sont regroupées ici. Les notes qui suivent expliquent les concepts et la méthodologie de l'enquête.

Unité de déclaration

L'unité de déclaration est ordinairement l'établissement, c'est-à-dire la plus petite unité constituant un ensemble d'exploitation séparé en mesure de déclarer tous les éléments de base relevant de la statistique des activités économiques, y compris les données sur les entrées et les sorties qui sont nécessaires pour calculer la "valeur ajoutée" ou la "majoration brute" ou le "bénéfice brut" ainsi que des données sur l'emploi et les rémunérations. Pour obtenir des statistiques géographiques détaillées, la Section demande souvent que l'unité de déclaration se situe à un niveau qui est en deça de celui de l'établissement, mais qui permet quand même d'obtenir des données sur l'emploi et les rémunérations à ce niveau, même si, par définition, ce niveau ne peut fournir toutes les statistiques de base.

En règle générale, l'enquête vise seulement les grandes entreprises, c'est-à-dire les entreprises employant 20 employés ou plus au cours de n'importe quel mois de l'année. Toutefois, tous les établissements d'une entreprise à établissements multiples sont pris en compte si l'entreprise emploie 20 employés ou plus, au total, au cours de n'importe quel mois de l'année, même si un de ces établissements peut n'avoir eu que quelques employés.

Période de référence

En théorie, l'enquête vise les chiffres des sept derniers jours des mois de référence. Vu qu'en pratique peu d'établissements tiennent des registres de paye pour cette période précise, on permet aux établissements de faire porter leurs chiffres sur la (ou les) dernière(s) période(s) de paye de chaque mois.

Si la période de paye visée dépasse une semaine, les chiffres sont réduits en conséquence. Les numérateurs des fractions utilisées pour calculer l'équivalent hebdomadaire sont 5, 6 ou 7, suivant le nombre de jours ouvrables par semaine où l'établissement a été en exploitation pendant la période de paye. Les dénominateurs des fractions sont le nombre de jours ouvrables des diverses périodes de paye. Dans le cas du personnel qui est rémunéré sur une base annuelle ou mensuelle et dont les gains ne sont pas touchés par le nombre de jours ouvrables au cours du mois, on utilise des proportions fixes pour ramener les gains sur une base hebdomadaire, sans tenir compte de la longueur du mois civil.

En cas de jour férié, de congédiement ou de conflit du travail dans un établissement dont la période de paye ne correspond pas aux sept derniers jours du mois, les données sont rectifiées lorsque l'effet du jour férié, du congédiement ou du conflit n'est pas le même sur les deux périodes, de manière que les données soient le reflet fidèle de la situation pendant la période de référence.

Champ de l'enquête

Toutes les branches d'activité économique sont prises en compte dans l'enquête, à l'exception de l'agriculture, de la pêche et du piégeage, de l'éducation et des services connexes, des services d'hygiène et de bien-être, des organismes religieux, des ménages et de l'administration publique et de la défense. Parce que l'enquête se limite aux grandes entreprises, le champ d'observation de l'emploi par branche d'activité, par province et par région urbaine manque quelque peu d'uniformité. Le

tion of larger to smaller establishments. This proportion varies considerably among industries. The following table shows annual employment as reported in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms plus supplementary surveys. Estimates of total employment are published in "Estimates of Employees by Province and Industry" (Catalogue 72-008).

pourcentage de l'emploi total qui est observé dépend du rapport des établissements aux petits établissements. Cette proportion varie considérablement d'une branche à l'autre. Le tableau suivant indique le pourcentage annuel de l'emploi, tel qu'il ressort de l'enquête, en pourcentage du chiffre estimatif de l'emploi total, ce dernier étant la somme des résultats de l'enquête sur l'emploi et la rémunération et des résultats d'une enquête d'échantillon auprès des petites entreprises ainsi que d'autres enquêtes supplémentaires. Des estimations du nombre total d'employés sont publiées sous le titre "Estimations du nombre d'employés par province et industrie" (n° 72-008 au catalogue).

Larger-Firm Survey Employment as a Percentage of Total Estimated Employment, by Industry Division, for Canada and Provinces, 1972 Annual Averages(1)

- (1) Total estimated employment is derived by adding together data from the employment and payrolls survey of larger-firms and data from a sample survey of smaller firms plus supplementary surveys. - L'estimation de l'emploi total est obtenue en additionnant les données de l'enquête sur l'emploi et la paie dans les grandes entreprises à celles d'une enquête par échantillonnage dans les petites entreprises et d'autres enquêtes supplémentaires.
- (2) Includes recreational, business, personal and miscellaneous services only; data has not been published previously. - Comprend seulement les services récréatifs, commerciaux, personnels et divers; ces données n'ont pas été publiées auparavant.
- (3) These percentages are small because non-commercial services including education and related services, health and welfare services, religious organizations and private households, are included in total estimated employment but are not part of the larger-firm employment survey. - Ces pourcentages sont petits parce que les services non commerciaux, y compris l'enseignement et les services connexes, la santé et les oeuvres sociales, les organismes religieux et les ménages privés, sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.
- (4) Excludes non-commercial services and public administration and defence; data has not been published previously. - Ne comprend pas les services non commerciaux et l'administration publique et de la défense; ces données n'ont pas été publiées auparavant.
- (5) These percentages are smaller because both non-commercial services and public administration and defence are included in total estimated employment but are not part of the larger-firm employment survey. - Ces pourcentages sont plus petits parce que les services non commerciaux de même que l'administration publique et la défense nationale sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.
- (6) Data for forestry and construction by province are not available for periods more recent than 1970. Les données pour le forestage et la construction ne sont pas disponibles par province après l'année 1970.

Geographic Classification

Reporting units are assigned to a province, a county (as defined by the Census of Population) and, where applicable, to an urban area. Data for Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are aggregated in some tables to give statistics for the Atlantic Region. Similarly, data for Manitoba, Saskatchewan and Alberta are added together to provide totals for the Prairie Region. The Census of Population's "Metropolitan Area" definitions were used for the nineteen applicable urban areas. The definitions used for other urban areas are based on a labour market concept; the areas usually include the surrounding territory as well as the urban centre. A list showing the territory included in each

Classification géographique

Les unités de déclaration sont affectées à une province, à un lieu (selon la définition établie par le recensement de la population) et, le cas échéant, à une région urbaine. Les données de Terre-Neuve, du Prince-Édouard, de la Nouvelle-Écosse et du Nouveau-Brunswick sont agrégées dans certains tableaux présentant des statistiques pour la région de l'Atlantique. De la même manière, les données du Manitoba, du Saskatchewan et de l'Alberta sont additionnées pour former le total pour la région des Prairies. On a retenu la définition de "région métropolitaine" pour les dix-neuf régions urbaines applicables. Les définitions employées pour les autres régions urbaines sont fondées sur le concept du marché du travail; les régions urbaines

urban area is available from the Monthly Employment, and Labour Income Section. The reporting units not located outside urban area are included in county, provincial and national totals.

Classification

Establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the largest net value added by these activities, or where possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not shifted from industry to industry each time its principal activity changes.

Statistics from the survey are based on the 1960 Standard Industrial Classification. A description of the various industries and industrial groups may be found in the "Standard Industrial Classification Manual", Catalogue 12-501 (1960). The "S.I.C. code" for each industry is given in the manual. The tables contain a list of the main tables refer to this manual. The tables contain a list of the main tables refer to this manual. The tables contain a list of the main tables refer to this manual.

Industrial composite (031-899) - The sum of the industries included in the survey. (see Coverage)

Durable goods manufacturing (durable) - The sum of wood products (S.I.C. 250-259), furniture and fixtures (S.I.C. 260-269), primary metal industries (S.I.C. 290-298), metal fabricating industries (S.I.C. 300-309), machinery (except electrical) (S.I.C. 310-318), transportation equipment (S.I.C. 320-329), electrical products (S.I.C. 330-339), and non-metallic mineral products (S.I.C. 340-359).

Non-durable goods manufacturing (non-dur) - The sum of food and beverages (S.I.C. 100-147), tobacco processing and products (S.I.C. 150-153), rubber products (S.I.C. 160-169), leather products (S.I.C. 170-179), textile products (S.I.C. 180-229), knitting mills (S.I.C. 230-239), clothing (S.I.C. 240-249), paper and allied industries (S.I.C. 270-274), printing and publishing and allied industries (S.I.C. 280-289), petroleum and coal products (S.I.C. 360-369), chemicals and allied products (S.I.C. 370-379), and miscellaneous manufacturing industries (S.I.C. 380-399).

Contracting (404,421) - The sum of general contractors (S.I.C. 404) and special trade contractors (S.I.C. 421).

Engineering (406-409) - The sum of highway, bridge and other construction (S.I.C. 406) and other construction (S.I.C. 409).

Textile industry (201) - In addition, the synthetic textile industry (201) is subdivided into spun yarn and fabrics (2011) and filament yarn and staple fibers (2012).

Employment data represent all employees on the payrolls of establishments in the reference period. The employee concept excludes owners or partners in unincorporated businesses, non-

ordinairement le territoire avoisinant avec le centre urbain. On peut obtenir sur demande une liste indiquant le territoire compris dans chaque région urbaine en s'adressant à la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail. Les unités de déclaration situées ailleurs que dans une région urbaine retenue sont comprises dans les chiffres du comté, de la province et de la région.

Classification par activité économique

Tous les établissements appartiennent à une branche d'activité économique, qui est déterminée en fonction de leur activité principale. Si un établissement a plusieurs activités économiques, son activité principale est déterminée par la plus grande valeur nette ajoutée de ces activités, ou si cela n'est pas possible, par les recettes brutes au titre des différentes activités. Si un établissement exerce des activités très diverses, on ne le transfère pas nécessairement d'une branche à l'autre chaque fois que son activité principale change.

Les statistiques tirées de l'enquête sont fondées sur la Classification type des industries de 1960. On peut trouver une description des diverses activités économiques et groupes d'activités économiques dans le "Manuel de la classification type des industries", n° 12-501 au catalogue (1960). Les colonnes "code de la C.T.I." des principaux tableaux renvoient à ce manuel. Les tableaux renferment quelques groupements qui ne se trouvent pas dans la Classification type des industries. Ce sont:

Ensemble des industries (031-899) - l'ensemble des activités économiques visées par l'enquête. (voir Champ de l'enquête)

Manufactures, biens durables (durable) - l'ensemble de l'industrie des produits du bois (C.T.I. 250-259), de l'industrie des meubles et accessoires d'ameublement (C.T.I. 260-269), de l'industrie des métaux (formes primaires) (C.T.I. 290-298), de l'industrie des produits métalliques (C.T.I. 300-309), de l'industrie de la machinerie (sauf le matériel électrique) (C.T.I. 310-318), de l'industrie du matériel de transport (C.T.I. 320-329), de l'industrie des appareils et du matériel électriques (C.T.I. 330-339), et de l'industrie des produits minéraux non métalliques (C.T.I. 340-359).

Manufactures, biens non durables (non dur.) - L'ensemble de l'industrie des aliments et boissons (C.T.I. 100-147), de l'industrie du traitement et des produits du tabac (C.T.I. 150-153), de l'industrie des produits du caoutchouc (C.T.I. 160-169), de l'industrie des produits du cuir (C.T.I. 170-179), de l'industrie des produits du textile (C.T.I. 180-229), de l'industrie de la bonneterie (C.T.I. 230-239), de l'industrie du vêtement (C.T.I. 240-249), de l'industrie du papier et des produits connexes (C.T.I. 270-274) de l'imprimerie, de l'édition et des industries connexes (C.T.I. 280-289), de l'industrie du pétrole, du charbon et de leurs dérivés (C.T.I. 360-369), de l'industrie chimique et des produits connexes (C.T.I. 370-379) et des industries manufacturières diverses (C.T.I. 380-399).

Bâtiment (404, 421) - L'ensemble des entrepreneurs généraux (C.T.I. 404) et des entrepreneurs spécialisés (C.T.I. 421).

Genie civil (C.T.I. 406-409) - L'ensemble de la construction de routes, ponts et rues (C.T.I. 406) et des autres constructions (C.T.I. 409).

En outre, l'industrie des textiles synthétiques (201) est subdivisée en filés et tissus (2011) et en filés de filaments et fibres discontinues (2012).

Emploi

Les données sur l'emploi représentent tous les employés inscrits aux registres de paye des unités de déclaration au cours de la période de référence. Le concept d'employé exclut les propriétaires actifs ou partena-

working directors, the self-employed, unpaid family workers, persons doing non-remunerative volunteer work, pensioners, home workers, and persons providing services to an establishment on the basis of a contract for services. Counted as employed, therefore, are all wage-earners and salaried employees who are paid for their services or are on paid absence during the reference period, except for casual employees working less than seven hours in the pay period. *Regular part-time* employees are treated as employed regardless of the number of hours worked during the pay period.

For example, an employee working for a part of the reference period and unemployed or on strike for the rest, is counted as employed. Employees not receiving pay for the entire reference period because of strike or as a consequence of a strike, or those persons on leave without pay, are not included among the employed.

Wage-earners

Wage-earners are defined by occupation rather than by the method of payment. They are those employees engaged in actual production and related operations, including maintenance, warehouse and delivery staffs, security staff, routemen, driver-salesmen, sales clerks in retail stores, waitresses, and working foremen performing functions similar to those of the employees whom they supervise, etc. Wage-earners may be paid a fixed monthly amount or on the basis of hours worked. The survey covers all wage-earners regardless of the method of payment and average weekly wages are computed for all. However, derivations of average weekly hours and average hourly earnings are based only upon data for wage-earners for whom hours data are available.

Salaried Employees

Salaried employees constitute executive, administrative, supervisory, technical and professional personnel, commission agents, and travelling salesmen directly responsible to the administration, as well as general office, clerical and related workers in the office and plant. In addition, working directors of incorporated businesses are included in this category.

Earnings

Earnings of wage-earners and salaried employees represent gross pay for the week, before deductions for taxes, unemployment insurance contributions, etc. Gross pay includes salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. The payroll concept does not include supplementary labour costs such as employers' contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or directors' fees.

The term "earnings" is used to denote the total of weekly wages of the wage-earners and salaries of the salaried employees. The publications prior to March 1971 contained this combined data entitled "Average Weekly Wages and Salaries". These data are comparable with "Average Weekly Earnings" of total employees in

res d'entreprises non constituées en corporation, les membres d'administration qui ne travaillent pas dans l'entreprise, les autonomes, les travailleurs familiaux non rémunérés, les bénéficiaires de services à forfait ou sous contrat. Sont donc considérés comme employés tous les employés à salaire et tous les employés à traitement rémunérés pour leurs services ou qui sont en congé payé pendant la période de référence, à l'exception des occasionnels ayant travaillé moins de sept heures pendant la période de paye. Les *employés réguliers* à temps partiel sont comptés parmi les employés quel que soit le nombre d'heures qu'ils travaillent pendant la période de paye.

Par exemple, une personne travaillant une partie de la période de référence et en chômage ou en grève le reste de la période, est comptée comme employée. Les employés qui ne sont pas rémunérés pendant la période de référence à cause d'une grève ou des conséquences d'une grève ou les personnes en congé sans paye ne figurent pas parmi les employés.

Employés à salaire

L'employé à salaire est défini par la nature du travail plutôt que par le mode de rémunération. Les employés à salaire sont ceux qui sont engagés dans la production et dans des opérations de production, y compris le personnel d'entretien, d'entrepôt et de livraison, de sécurité, les chauffeurs-livriers, les vendeurs itinérants, les employés des magasins de détail, les serveuses et les contremaîtres remplissant des fonctions analogues à celles des employés dont ils ont la charge. Les employés à salaire peuvent être rémunérés sur une base mensuelle ou hebdomadaire. L'enquête couvre tous les employés à salaire quel que soit leur mode de rémunération et les gains moyens sont calculés pour tous. Toutefois, les heures hebdomadaires moyennes et les rémunérations horaires moyennes sont calculées à partir des données relatives aux employés à salaire dont on connaît le nombre d'heures de travail.

Employés à traitement

Les employés à traitement comprennent les directeurs, les surveillants, les cadres techniques et spécialisés, les agents de commission, les voyageurs de commerce relevant directement de l'administration, ainsi que les employés de bureau, les commis et les assimilés, au bureau et à l'usine. Les membres des conseils d'administration des entreprises constituées en corporation qui travaillent dans ces entreprises sont également compris dans cette catégorie.

Rémunération

Les rémunérations des employés à salaire et des employés à traitement représentent les gains bruts de la semaine, avant déductions d'impôt, de cotisations d'assurance-chômage, etc. La rémunération brute comprend les salaires, la rémunération au taux ou à la pièce et les commissions régulières. Les primes de rendement, les primes de vie chère et autres gratifications régulières, les gains pour travail supplémentaire et les paiements aux personnes en congé payé pendant la semaine de l'enquête sont compris dans la rémunération. La rémunération ne comprend pas les frais supplémentaires de l'employeur tels que les cotisations de l'employeur à la caisse de chômage, aux régimes d'assurance-maladie, à la caisse d'indemnités d'accidents de travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur de la pension, les paiements de nature, les frais de déplacement, les indemnités de retraite, les versements à intervalles irréguliers et peu fréquents ni les jetons de présence des administrateurs.

Le terme "rémunérations" désigne l'ensemble des rémunérations des employés à salaire et des employés à traitement. Les publications antérieures à mars 1971 renfermaient des données réunies sous le titre "Average Weekly Wages and Salaries". Ces données sont comparables aux rémunérations hebdomadaires moyennes de l'ensemble des em

nt publication. The system now provides separate earnings all wage-earners and salaried employees whereas formerly "Average Weekly Wages" for hourly-rated wage-earners was

Nombres

Index numbers are calculated by dividing the current month's employment (or payroll) by the monthly-average of the total base employment (or payroll). The current employment consists of all employment reported by establishments that meet our size criteria in the current period. Base year employment consists of the employment of establishments that had 20 or more employees in any month of the base year. The payroll index is calculated in a similar fashion.

Seasonally-adjusted index numbers remove from the employment index those regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the trend, and irregular components of the time series. The X-11 method of the U.S. Census Method II is used to calculate the seasonally-adjusted index numbers; additional seasonally-adjusted index numbers are found in "Employment, earnings and hours, seasonally-adjusted series January 1961 - December 1971" (Catalogue

The average weekly hours figure is obtained by dividing total employment by the number of wage-earners who worked those hours. Hourly earnings are obtained by dividing total weekly earnings by the number of wage-earners by their total weekly hours. Both averages apply only to the subset of wage-earners for whom earnings are reported. It should be noted that total hours include hours actually worked and that the wage-earner total includes full-time wage-earners and casuals working more than seven hours in one week. Annual statistics are calculated from the monthly data, with the exception of those shown as (p); the latter are based on monthly averages.

Présentation

Each month, statistics for three months are prepared by the Statistics Canada Employment, Payrolls and Labour Income Section. Data for the most current month, are entitled first estimates. They are based on a limited number of returns (usually about 50%) and only preliminary figures are released in the Statistics Canada Daily First Estimates table of this publication. Simultaneously, second estimates are prepared for the month immediately preceding the current month and third estimates for the month prior to that. The latter estimates are of higher quality than that of the first estimates because of the higher rate of returns (typically, 65% and 75%, respectively). Consequently full details for both months are shown in the present publication.

After completion of the third estimate, further revisions to the statistics are made to incorporate late returns and corrected information from our respondents or to rectify mechanical errors. Larger errors are calculated immediately and appear in the historical tables and in column for the previous year in tables 2, 3 and 4 of this publication. The smaller corrections are completed in the following publication when all returns are retabulated to produce revised annual averages; these data are contained in catalogue 72-202.

en compte ici. Ce système permet maintenant d'avoir des données distinctes pour tous les employés à salaire et les employés à traitement tandis qu'autrefois on ne pouvait connaître que les "rémunérations hebdomadaires moyennes" des employés à salaire rémunérés à taux horaire.

Nombres-indices

On obtient les nombres-indices en divisant le nombre total d'employés (ou la rémunération) du mois courant par la moyenne mensuelle du nombre d'employés (ou de la rémunération) de l'année de base. Le nombre courant d'employés est l'ensemble des employés déclarés par les établissements dont la taille répond à notre critère pendant la période courante. Le nombre d'employés pour l'année de base est le nombre d'employés des établissements employant 20 employés ou plus pendant n'importe quel mois de l'année 1961. L'indice de la rémunération est calculé de la même manière.

La désaisonnalisation des nombres-indices a pour effet d'éliminer des indices de l'emploi les fluctuations qui se produisent à intervalles réguliers et qui s'appellent variations saisonnières. Les nombres-indices désaisonnalisés représentent donc assez bien la tendance, le cycle et les composantes irrégulières de la série chronologique. La variante X-11 de la méthode II du recensement des Etats-Unis est utilisée pour calculer les nombres-indices désaisonnalisés; on peut trouver d'autres séries désaisonnalisées dans "Emploi, rémunérations et heures, séries désaisonnalisées janvier 1961-décembre 1971" (n° 72-206 au catalogue).

Moyennes

On calcule les heures hebdomadaires moyennes en divisant le nombre total d'heures-hommes par le nombre d'employés à salaire qui ont fait ces heures. On obtient les rémunérations horaires moyennes en divisant la rémunération hebdomadaire totale des employés à salaire rémunérés à l'heure par le nombre total de leurs heures par semaine. Ces deux moyennes s'appliquent seulement aux employés à salaire dont le nombre d'heures est déclaré. À remarquer que le nombre total d'heures comprend les heures supplémentaires réelles et que le total des employés à salaire comprend les employés à salaire à temps partiel et les occasionnels qui travaillent plus de sept heures par semaine. À l'exception des statistiques provisoires (p), qui sont fondées sur les moyennes mensuelles, les statistiques annuelles sont établies à partir de l'ensemble des données mensuelles.

Présentation statistique

Chaque mois, la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail prépare des statistiques pour trois mois. Les données du premier mois, le mois le plus récent, sont appelées "premières estimations". Elles sont fondées sur un nombre limité de déclarations (environ 50%) et seuls des chiffres très généraux sont publiés dans Le Quotidien de Statistique Canada et dans le tableau "Premières estimations" de la présente publication. En même temps, la Section prépare des deuxième estimations pour le mois qui précède le mois le plus récent, et des troisième estimations pour le mois qui précède celui-là. Ces deux dernières estimations sont de meilleure qualité que les premières en raison de la disponibilité d'un plus grand nombre de réponses (d'habitude 65% pour les deuxième estimations et 75% pour les troisième). Par conséquent, la présente publication contient tous les détails pour ces deux mois.

Une fois terminées les troisième estimations, on effectue d'autres rectifications à la lumière des déclarations des retardataires et des corrections reçues de nos enquêtés, ou par suite de la correction de certaines erreurs mécaniques. Les corrections les plus importantes sont effectuées immédiatement; elles paraissent dans les tableaux chronologiques et spéciaux ainsi que dans la colonne de l'année précédente aux tableaux 2, 3 et 4 de la présente publication. Les corrections de moindre importance sont effectuées dans les tableaux annuels quand toutes les réponses ont été totalisées de nouveau en vue de la production de chiffres et de moyennes annuelles rectifiés; ces données sont publiées dans les publications 72-201 et 72-202.

PUBLICATIONS SUR L'EMPLOI ET LA RÉMUNÉRATION

Les publications suivantes de la Division du travail contiennent des données sur l'emploi, la rémunération et les de travail dans l'industrie, d'après le concept de l'établissement:

Employment, Earnings and Hours, M. Angl.

(Indices de l'emploi et de la rémunération, par région et par activité économique; moyennes des gains et des rémunérations hebdomadaires, heures hebdomadaires moyennes et gains horaires moyens; comparaisons chronologiques; graphiques et notes explicatives).

Estimations du Revenu du Travail; M. Bil.

(Estimations mensuelles, brutes et désaisonnalisées, des rémunérations et du revenu supplémentaire du travail, pour certaines activités économiques et certaines régions; avec totaux annuels pour une période de 10 ans).

Estimations du nombre d'employés par province et par industrie, M. Bil.

(Estimations du nombre total d'employés; comparaisons avec les chiffres correspondants du mois précédent et de l'année précédente).

Review of Employment and Average Weekly Wages and Salaries, A. Angl.

(Indices de l'emploi et de la rémunération et rémunérations hebdomadaires moyennes, par activité économique et par région: indices mensuels et annuels, pour une longue période; graphiques et notes explicatives).

Review of Man-Hours and Hourly Earnings, A. Angl.

Heures hebdomadaires moyennes et rémunération horaire et hebdomadaire moyenne, par activité économique et par région, données mensuelles et annuelles, pour une longue période; graphiques et notes explicatives).

Earnings and Hours of Work in Manufacturing, 1969, Angl.

(Données distinctes sur les gains et les heures de travail des hommes et des femmes, ouvriers et salariés, pour une semaine d'octobre, à partir de 1946, réparties par activité économique et par région; graphiques et notes explicatives. Des données spéciales sont obtenues par voie de rotation d'année en année).

Indices de l'emploi désaisonnalisés. Janvier 1961 à décembre 1970, Bil.

(Indices de l'emploi, par activité économique et par région: non désaisonnalisés, facteurs finals de désaisonnalisation, désaisonnalisés et moyennes mobiles MDC; heures hebdomadaires moyennes et gains horaires moyens).

Labour Income, 1926-1958 — épuisé, Angl.

(Estimations annuelles du revenu du travail, de 1926 à 1958, avec chiffres mensuels à partir de 1947; explications des sources, des méthodes et des concepts.)

Estimations du nombre d'employés par province et par industrie, 1961-1968, Bil.

(Estimations du nombre total de salariés, par mois et par année, pour les principales divisions d'activité économique, Canada et provinces. Revue des concepts, des sources et des méthodes et indicateurs de la variabilité d'échantillonnage.)

Coûts de la main-d'oeuvre dans l'industrie manufacturière, 1968, Bil.

Coûts de la main-d'oeuvre au Canada-Mines, carrières et puits de pétrole, 1969, Bil.

(Publication annuelle couvrant diverses branches d'activité sur une base cyclique ou irrégulière. Estimations de certains coûts de main-d'oeuvre, par groupe d'activité économique et par région — Publication conjointe de la Division du travail de Statistique Canada et de la Direction de l'économie et des recherches du ministère du Travail du Canada).

Gains et heures de travail au Canada — Commerce de détail, septembre 1970, Bil.

(Gains hebdomadaires moyens, gains horaires moyens et heures hebdomadaires moyennes des employés des deux sexes dans le commerce de détail, selon la situation, ("à plein temps", "à temps partiel et occasionnels" et rattachés au "siège social", pour le Canada, les provinces et certaines régions urbaines).

Outre les publications énumérées ci-dessus, Statistique Canada publie une grande variété de bulletins statistiques sur la situation économique et social du Canada. On peut se procurer gratuitement un catalogue complet des publications courantes en s'adressant à Statistique Canada, KIA OT6.

EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

72-002 - Employment, Earnings and Hours, M., Engl.

(Industry and area index numbers of employment and payrolls, averages of weekly earnings, salaries and wages, of hours per week and hourly earnings; historical comparisons; charts and explanatory material).

72-005 - Estimates of Labour Income, M. Bil.

(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, specific industries and regions; with annual totals covering a 10 year period).

72-008 - Estimates of Employees by Province and Industry, M. Bil.

(Estimates of total numbers of employees, with comparisons with a month and a year earlier).

72-201 - Review of Employment and Average Weekly Wages and Salaries, A. Engl.

(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).

72-202 - Review of Man-Hours and Hourly Earnings, A. Engl.

(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, over a lengthy period; charts and explanatory material).

72-204 - Earnings and Hours of Work in Manufacturing, 1969 Engl.

(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week, October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).

72-206 - Seasonally-adjusted Employment Indexes, January 1961 - December 1970, Bil.

(Industry and area index numbers of employment: unadjusted, final seasonal factors, seasonally-adjusted and moving average; average weekly hours and hourly earnings).

72-502 - Labour Income, 1926-58 - Out of print, Engl.

(A record of annual estimates of labour income from 1926 to 1958, along with monthly figures from 1947; contains explanations of sources, methods and concepts).

72-508 - Estimates of Employees by Province and Industry, 1961-68, Bil.

(Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces (contains a review of concepts, sources and methods and indicators of sampling variability)).

72-510 - Labour Costs in Manufacturing 1968, Bil.

72-511 - Labour Costs in Canada, Mines, Quarries and Oil Wells 1969, Bil.

(An annual publication covering various industries on a cycle or occasional basis. Estimates of selected employment, Labour Costs, by industry group and area - Report prepared jointly by Labour Division of Statistics Canada and Economics and Research Branch of Labour Canada).

72-601 - Earnings and Hours of Work in Canada - Retail Trade Industry, September 1970, Bil.

(Average Weekly Earnings, Average Hourly Earnings and Average Weekly Hours of Male and Female Employees in Retail Trade, by Employee Status i.e. "full-time", "part-time and casual" and "head office" employees for Canada, provinces and selected urban areas).

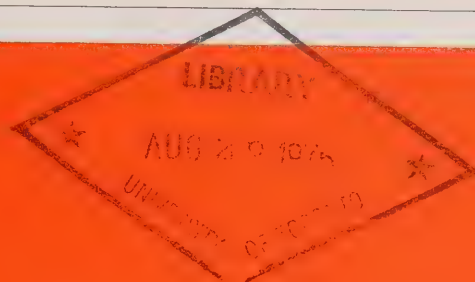

In addition to the selected publications listed above, Statistics Canada publishes a wide range of statistical reports on Canadian economic and social affairs. A comprehensive catalogue of all current publications is available free on request from Statistics Canada, Ottawa (Canada), K1A 0T6.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- . . figures not available.
- . . . figures not appropriate or not applicable.
- nil or zero.
- - amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE

In addition, in this publication (except as otherwise noted), blanks in those columns where wage-earners and salaried employees data are shown separately indicate that representative data for wage-earners for whom hours are recorded are not available.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- . . nombres indisponibles.
- . . . n'ayant pas lieu de figurer.
- néant ou zéro.
- - nombres infimes.
- p nombres provisoires.
- r nombres rectifiés.
- x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

NOTA

On remarquera que, dans la présente publication (sauf à contraire) les colonnes laissées en blanc dans le cas des traitements et des employés à salaire indiqués séparément, signifient des données relatives aux employés pour lesquels les heures sont enregistrées ne sont pas disponibles.

Estimates(1) — February 1975

Seasonally-adjusted, the first estimate of the Canada industrial (2) index of employment (1961 = 100) dropped 0.6% from January to February. There were decreases in employment in all divisions except mining and transportation, communications and utilities. All regions except Quebec showed reduced levels of employment.

When adjusted for seasonal variations, average weekly earnings at the Canada composite level to \$193.87. Gains occurred in most industry divisions except service and in all five regions.

Preliminary Data(1) — January 1975

Index — (Seasonally-adjusted)

Preliminary data for January 1975 showed a 1.0% decline in employment at the *Canada* composite level. Decreases were recorded in most industry divisions except transportation, communications and utilities, and trade.

Employment in manufacturing fell 2.3% from December to January. This represents the largest single-month decline since at least the 60% of this decline was the result of layoffs in motor vehicles, especially in Ontario. In addition, there were declines in most durable goods components and in food and beverages.

The decline in construction employment mainly reflected both building and engineering in Quebec. Employment increased by 0.5% mainly reflecting declines in business and in hotels, restaurants and taverns. The 2.1% decline in employment largely reflected layoffs in logging in British Columbia, while the drop in mining employment was largely the result of disputes in metals in British Columbia. Finance, insurance and real estate showed little change over the month.

Employment rose by 1.1% in both transportation, communications and utilities and in trade from December to January. In the services, increases were widespread among all major components, while in the goods increases were concentrated in the retail component, especially department stores.

In the *Atlantic Region*, the composite index of employment fell in January as decreases in Newfoundland and New Brunswick and in Prince Edward Island and Nova Scotia. Employment in food and beverages, mainly fish products, and building and

See on statistical Presentation under Concepts and Methods at the back of this publication.

The Composite is the sum of all industries with the exception of agriculture, culture, fishing and trapping, education and related services, health and welfare services, religious organizations, households and public administration and defence. All figures are based on returns received from employers having 20 or more employees in any month of the year.

Premières estimations(1) — Février 1975

Après désaisonnalisation, la première estimation de l'indice composite de l'emploi dans les activités économiques(2) du Canada (1961 = 100) a diminué de 0.6% entre janvier et février. Toutes les divisions d'activité économique ont connu un fléchissement de l'emploi, sauf les mines, les transports, communications et autres services publics. On a enregistré des baisses du niveau de l'emploi dans toutes les régions à l'exception du Québec.

Les gains hebdomadaires moyens non désaisonnalisés au niveau de l'ensemble des activités économiques du Canada ont augmenté de 0.9% pour s'établir à \$193.87. Des hausses se sont produites dans toutes les divisions d'activité économique (sans les services) et les cinq régions.

Données provisoires(1) — Janvier 1975

Emploi (chiffres désaisonnalisés)

Les données provisoires pour janvier 1975 révèlent un recul de 1% de l'indice composite de l'emploi au *Canada*. Les baisses sont survenues dans toutes les branches, sauf les transports, communications, et autres services publics et le commerce.

L'emploi dans le secteur de la fabrication a baissé de 2.3% entre décembre et janvier, soit la plus grande diminution pour un mois depuis au moins 1961. Quelque 60% de cette baisse s'est produite par suite de mises à pied dans le secteur de l'automobile, plus particulièrement en Ontario. En outre, on a enregistré des réductions dans la plupart des autres industries de biens durables et dans celles des aliments et boissons.

La baisse de l'emploi dans la construction s'explique principalement par les diminutions dans le bâtiment et le génie civil au Québec. Dans les services, l'emploi a fléchi de 0.5% surtout en raison des baisses enregistrées dans les services extérieurs des entreprises, les hôtels, restaurants et tavernes. La diminution de 2.1% observée dans l'industrie forestière traduit en grande partie les mises à pied de secteur de l'abattage en Colombie-Britannique, tandis que la baisse de 0.8% au niveau de l'emploi dans le secteur minier est survenue principalement à la suite de conflits du travail dans les mines métalliques de cette même province. Les finances, assurances et immeuble n'ont pas connu de variations notables.

L'emploi dans les transports, communications et autres services publics et le commerce a augmenté de 1.1% de décembre à janvier. Dans le premier cas, les progressions ont été généralisées dans toutes les principales branches, tandis que dans le second cas, les augmentations ont porté dans le secteur de détail, surtout les magasins à rayons.

L'indice composite de l'emploi dans la *région de l'Atlantique* a fléchi de 1.0% en janvier, car les baisses enregistrées à Terre-Neuve et au Nouveau-Brunswick ont neutralisé les hausses observées dans l'Île-du-Prince-Édouard et en Nouvelle-Écosse. Les baisses de l'emploi dans les

- (1) Voir Présentation statistique sous Concepts et méthodes, à la fin de la présente publication.
- (2) L'ensemble des activités économiques comprend toutes les branches d'activité sauf l'agriculture, la pêche et le piégeage, l'éducation et les services connexes, les services d'hygiène et le bien-être, les organisations religieuses, les ménages privés et l'administration publique et la défense. Les données sont fondées sur les déclarations envoyées par les employeurs comptant au moins vingt (20) employés au cours d'un mois quelconque de l'année.

engineering construction more than offset gains in electric power and in retail trade, especially department stores.

The *Quebec* composite employment index dropped 0.6% from December to January. Employment in manufacturing declined 0.8% reflecting widespread layoffs in durable goods. The reduction in construction employment occurred in both building and engineering and followed unusually large increases in the previous month; these increases had reflected, in part, a changing seasonal pattern associated with the Christmas holiday season.

In *Ontario*, the composite index of employment dropped sharply by 1.4% from December to January. Some four-fifths of this decline was the result of large layoffs in motor vehicles associated with deteriorating market conditions. Declines in other components of durable goods, insurance and real estate, recreational and business services were somewhat offset by gains in communication, utilities and retail trade, especially department stores.

The industrial composite index of employment for the *Prairie Region* decreased 0.5% as declines in employment in Alberta more than offset slight rises in Manitoba and Saskatchewan. Employment was reduced in durables manufacturing, engineering construction and hotels, restaurants and taverns. Somewhat offsetting gains occurred in railway transport and department stores.

In *British Columbia*, the composite employment index rose 0.7% in January. Employment gains in transportation, especially railway transport, and in retail trade, largely department stores, more than offset declines in logging, metals mining and hotels, restaurants and taverns.

Earnings and Hours

Seasonally-adjusted, average weekly earnings rose 2.4% at the Canada industrial composite level in January. Gains occurred in all industry divisions and in all provinces.

Unadjusted for seasonal variations, average weekly earnings for the Canada composite rose 4.5% to \$192.11. All ten provinces contributed to the overall advance in the level of earnings; the increases ranged from 3.5% in Manitoba and British Columbia to 8.1% in New Brunswick.

In *forestry*, average weekly earnings jumped 21.7% from December to January mainly reflecting larger than seasonal increases in hours worked in Quebec, Ontario and British Columbia.

Average weekly earnings in *mining* rose from \$257.52 in December to \$262.66 in January as the result of gains in all component industries. Average weekly hours of hourly-rated wage-earners increased from 39.8 to 40.4, while average hourly earnings showed almost no change.

aliments et boissons, particulièrement les produits du poisson. Le bâtiment et le génie civil ont plus que compensé les gains du secteur de l'énergie électrique et du commerce de détail, surtout les magasins à rayons.

Au *Québec*, l'indice composite de l'emploi a baissé de 0.6% de décembre à janvier. L'emploi dans le secteur de la fabrication a diminué de 0.8% par suite de mises à pied généralisées dans les biens durables. La baisse de l'emploi dans la construction est survenue dans le bâtiment et le génie civil et a fait suite aux augmentations exceptionnelles observées le mois précédent; ces augmentations ont expliqué en partie une variation saisonnière liée aux congés de la période de Noël.

L'indice composite de l'emploi en *Ontario* a fait une chute de 1.4% de décembre à janvier. Près des quatre-cinquièmes de cette baisse s'expliquent par les importantes mises à pied dans le secteur de l'automobile en raison des mauvaises conditions du marché. Les baisses dans les composantes des biens durables, les finances, assurances et immobilité, services récréatifs et extérieurs des entreprises ont été quelque peu compensées par des gains dans les communications, les services publics et le commerce de détail, surtout les magasins à rayons.

Dans la *région des Prairies*, l'indice composite de l'emploi a diminué de 0.5%, car les baisses de l'emploi en Alberta ont plus que neutralisé les faibles hausses observées au Manitoba et en Saskatchewan. L'emploi a diminué dans la fabrication des biens durables, le génie civil et les hôtels, restaurants et tavernes. Des gains quelque peu compensatoires ont survenus dans le transport ferroviaire et les magasins à rayons.

En *Colombie-Britannique*, l'indice composite de l'emploi a augmenté de 0.7% en janvier. Les gains de l'emploi dans le secteur des transports, particulièrement le transport ferroviaire, et dans le commerce de détail, surtout les magasins à rayons, ont plus que compensé les diminutions observées dans les branches de l'abattage, les mines métallifères, les hôtels, restaurants et tavernes.

Gains et heures

Après désaisonnalisation, les gains hebdomadaires moyens progressés de 2.4% en janvier au niveau de l'ensemble des activités économiques du Canada. Des hausses se sont produites dans toutes les branches et dans toutes les provinces.

Les gains hebdomadaires moyens *non désaisonnalisés* pour l'ensemble des activités économiques du Canada ont augmenté de 4.5% pour s'établir à \$192.11. Toutes les dix provinces ont contribué à cette avance globale des gains; les augmentations se sont échelonnées entre 3.5% au Manitoba et en Colombie-Britannique et 8.1% au Nouveau-Brunswick.

Dans l'*industrie forestière*, les gains hebdomadaires moyens ont augmenté de 21.7% de décembre à janvier, traduisant en grande mesure des hausses de la durée du travail au Québec, en Ontario et en Colombie-Britannique plus importantes que les hausses saisonnières.

Les gains hebdomadaires moyens dans les *mines* sont passés de \$257.52 en décembre à \$262.66 en janvier par suite de progrès dans toutes les branches d'activité. La durée hebdomadaire moyenne des ouvriers rémunérés à l'heure est passée de 39.8 à 40.4, alors que les gains horaires moyens restaient pratiquement inchangés.

In *manufacturing*, average weekly earnings rose 4.8% in January to \$201.91 mainly reflecting the seasonal increase in hours in both durables and non-durables. Average weekly hours rose from 36.8 to 38.6, while average hourly earnings gained 5 cents.

Average weekly earnings in *construction* rebounded from the decline in December with a 12.4% rise in January. Average weekly hours rose from 34.4 in December to 38.0 in January. Average weekly earnings gained more than 4% with increases in both building and engineering.

In *transportation, communications and other utilities*, average weekly earnings rose 3.6% to \$222.80 mainly reflecting gains in transportation and utilities. Average weekly earnings in trade rose 3.1% to \$149.53 largely owing to increases in the wholesale trade.

In *finance, insurance and real estate*, average weekly earnings rose 3.1% as a result of gains in both components, while in *service*, average weekly earnings rose 3.1% to \$136.64 reflecting widespread gains in all component industries.

1974 in Review

ment

The average of the twelve monthly indexes for 1974, compared with the same period for 1973, showed a 5.2% advance in the composite employment index for Canada; this was 0.6 percentage point larger than the gain experienced from 1972 to 1973. The largest increases were in service (8.7%), trade (6.8%) and construction (6.6%). All provinces showed higher levels of employment; increases ranged from 4.5% in Quebec and Ontario to 8.2% in Saskatchewan and Alberta.

Earnings

The twelve-month average of 1974 data, compared with the same period for 1973, showed an 11.0% rise in average weekly earnings at the Canada composite level. The industrial increases ranged from 10.2% in service to 13.0% in mining; the provincial gains ranged from 9.6% in Ontario to 15.4% in New Brunswick.

Dans le secteur de la *fabrication*, les gains hebdomadaires moyens ont augmenté de 4.8% en janvier pour s'établir à \$201.91 surtout à cause de la hausse saisonnière des heures travaillées dans le secteur des biens durables et non durables. La durée hebdomadaire moyenne du travail est passée de 36.8 à 38.6, tandis que les gains moyens progressaient de 5 cents pour se fixer à \$4.76.

Les gains hebdomadaires moyens dans la *construction* ont augmenté de façon très appréciable (12.4%) en janvier, comparativement à la diminution saisonnière observée en décembre. La durée hebdomadaire moyenne est passée de 34.4 en décembre à 38.0 en janvier. Les gains horaires moyens se sont accrus de plus de 4%, les augmentations se situant dans le secteur du bâtiment et le génie civil.

Dans les *transports, communications et autres services publics*, les gains hebdomadaires moyens ont augmenté de 3.6% pour s'établir à \$222.80 surtout en raison de hausse dans les transports et les services publics. Les gains hebdomadaires moyens dans le secteur du commerce ont progressé de 3.1% pour s'établir à \$149.53 en grande partie par suite d'augmentations dans le commerce de gros.

Les *finances, assurances et immobilier* ont connu une hausse de 3.1% de leurs gains hebdomadaires moyens à la suite d'augmentations des deux groupes, tandis que dans les *services*, les gains hebdomadaires moyens ont progressé de 3.1% pour s'établir à \$136.64, reflétant ainsi des hausses générales dans toutes les branches d'activité.

Revue de 1974

Emploi

La moyenne des indices pour douze mois en 1974 par rapport à la même période en 1973 fait ressortir une progression de 5.2% de l'emploi au niveau de toutes les activités économiques du Canada; il s'agit là d'une avance de 0.6 point sur la progression observée de 1972 à 1973. Les augmentations les plus importantes sont survenues dans les services (8.7%), le commerce (6.8%) et la construction (6.6%). Toutes les provinces ont indiqué des niveaux d'emploi plus élevés; les hausses se sont échelonnées entre 4.5% au Québec et en Ontario et 8.2% en Saskatchewan et en Alberta.

Gains

En comparant la moyenne sur douze mois des données pour 1974 avec celle de 1973, on constate une hausse de 11.0% des gains hebdomadaires moyens au niveau de l'ensemble des activités économiques du Canada. Les augmentations par branche d'activité ont varié entre 10.2% dans les services et 13.0% dans les mines; par province, les gains ont fluctué entre 9.6% en Ontario et 15.4% au Nouveau-Brunswick.

TABLEAU 5. Répartition de l'emploi selon le sexe, la branche d'activité et la région

TABLEAU 5 Répartition de l'emploi						Dec. 1974	Jan. 1974		
January - 1975 - Janvier								Janv.	
Industry division and area	Both sexes	Men	Women	Men	Women	Men	Women	Men	Women
Branche d'activité et région	Les deux sexes	Hommes	Femmes	Hommes	Femmes	Hommes	Femmes	Hommes	Femmes
		000's				per cent - pourcentage			
Industry Division - Branche d'activité									
Forestry - Forestage	44.7	43.6	1.1	97.7	2.3	97.8	2.2	98.1	1.9
Mining, including milling - Mines, y compris le broyage	120.8	113.2	7.6	93.8	6.2	93.7	6.3	94.3	5.7
Manufacturing - Manufactures	1537.4	1174.6	362.8	76.4	23.6	76.9	23.1	76.3	23.7
Durable goods - Biens durables	760.6	650.8	109.8	85.6	14.4	85.9	14.1	85.8	14.1
Non-durable goods - Biens non durables	776.8	523.8	253.0	67.5	32.5	67.8	32.2	66.7	33.3
Construction	192.2	181.6	10.6	94.6	5.4	94.7	5.3	95.0	5.0
Transportation communication and other util- ities - Transports communication et autres services publics	659.1	547.7	111.4	83.1	16.9	83.0	17.0	83.5	16.5
Trade - Commerce	789.4	486.9	302.5	61.7	38.3	58.9	41.1	62.1	37.9
Finance, insurance and real estate - Finances, assurances et immeuble	294.1	143.0	151.1	48.7	51.3	49.9	50.1	43.5	56.5
Service - Services	448.2	263.5	184.7	58.8	41.2	58.8	41.2	59.2	40.8
Industrial composite - Ensemble des industries ...	4085.1	2953.3	1131.8	72.3	27.7	72.0	28.0	72.3	27.7
Industrial Composite - Ensemble des industries									
Region and Province - Région et province:									
Atlantic Region - Région de l'Atlantique	262.5	200.5	62.0	76.4	23.6	75.5	24.5	76.9	23.1
Newfoundland - Terre-Neuve	58.9	47.5	11.4	80.7	19.3	79.7	20.3	81.2	18.8
Prince Edward Island - Île-du-Prince-Edouard	8.6	6.2	2.4	71.9	28.1	72.4	27.6	72.1	27.9
Nova Scotia - Nouvelle-Écosse	106.3	78.4	27.9	73.8	26.2	72.3	27.7	74.3	25.7
New Brunswick - Nouveau-Brunswick	89.5	69.2	20.3	77.2	22.8	76.5	23.5	77.7	22.3
Québec	1068.9	786.6	282.3	73.6	26.4	74.0	26.0	72.6	27.4
Ontario	1762.7	1251.2	511.5	71.0	29.0	70.6	29.4	70.8	29.2
Prairie Region - Région des Prairies	564.4	403.4	161.0	71.5	28.5	71.1	28.9	72.5	27.5
Manitoba	188.8	132.6	56.2	70.3	29.7	69.7	30.3	71.0	29.0
Saskatchewan	93.3	68.5	24.8	73.4	26.6	73.1	26.9	74.0	26.0
Alberta	282.3	202.3	80.0	71.7	28.3	71.3	28.7	73.0	27.0
British Columbia - Colombie-Britannique	419.3	305.9	113.4	73.0	27.0	72.0	28.0	74.6	25.4
CANADA	4085.1	2953.3	1131.8	72.3	27.7	72.0	28.0	72.3	27.7

(1) First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

Note: 1. The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which wages are spent. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue 62-002. 3. The data in this table relate to average weekly wages of hourly-rated wage-earners only. Although this statistics is no longer tabulated as part of this survey, a special manual calculation has been made in order to retain this table because of its extensive usage. An approximation of this calculation can be obtained by multiplying average weekly hours by average hourly earnings, for a particular industry-area cell. - Nota: 1. Les salaires hebdomadaires courants ont trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des salaires hebdomadaires courants pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les salaires sont dépensés. 2. Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no. 62-002 au catalogue. 3. Les données de ce tableau ont trait aux salaires hebdomadaires moyens des employés à salaire (heures déclarées) seulement. Bien que cette statistique ne figure plus dans les tableaux tirés de la présente enquête, on a quand même fait un calcul spécial à la main en vue de maintenir ce tableau dont l'usage est très répandu. On peut obtenir une approximation de ce calcul en multipliant les heures hebdomadaires moyennes par la rémunération horaire moyenne pour un secteur particulier d'industrie-région.

STATISTICAL DATA ON EMPLOYMENT, EARNINGS AND HOURS(1)
(based on the 1960 Standard Industrial Classification)

Continuous series from 1957 to date are available as follows:

Employment indexes (1961 = 100).

Average weekly earnings (formerly titled average weekly wages and salaries).

Average weekly hours and average hourly earnings of hourly-rated wage-earners.

Average weekly wages of hourly-rated wage-earners (available only for the period 1957-1970).

Number of employees and number of hourly-rated wage-earners (available on request basis only for periods prior to 1971).

1960

Monthly data were not published but are available on

Annual averages are shown in:

Review of Employment and Average Weekly Wages and Salaries, *Catalogue 72-201, 1957-67*; Review of Man Hours and Hourly Earnings, *Catalogue 72-202, 1957-67*.

1970

Employment Indexes, 1961-1964, for Canada and Ontario, for roads, bridges and streets; engineering; construction; highway maintenance; transportation; and transportation, communication and other utilities. *Employment, Earnings and Hours, Catalogue 72-002, October 1971*.

Employment Indexes, 1965-1967, for Canada and Ontario, for roads, bridges and streets; engineering; construction; highway maintenance; transportation; and transportation, communication and other utilities. *Catalogue 72-002, February 1968*.

Average Weekly Earnings, 1961-1969 for:

Canada: Transportation; Highway and bridge maintenance.

Atlantic Region: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance.

Quebec: Transportation, communication and other utilities; Transportation.

Ontario: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance. *Catalogue 72-002, November 1971*.

Average Weekly Earnings, 1968-1970, for Canada, Ontario and Quebec, for scientific and professional equipment; miscellaneous manufacturing industries; non-durable goods; manufacturing; whole-trade; industrial composite. *Catalogue 72-002, February 1972*.

Average Weekly Hours, Average Hourly Earnings, Average Wages of Hourly-rated Wage-earners - 1961-1967 for:

DONNÉES CHRONOLOGIQUES SUR L'EMPLOI, LES GAINS ET LA DURÉE DU TRAVAIL(1)
(fondées sur la Classification type des industries de 1960)

Les séries continues suivantes de 1957 jusqu'à aujourd'hui sont disponibles:

1. Indices de l'emploi (1961 = 100).
2. Gains hebdomadaires moyens.
3. Heures hebdomadaires moyennes et rémunération horaire moyenne des employés à salaire (heures déclarées).
4. Rémunération hebdomadaire moyenne des employés à salaire (heures déclarées) (disponibles pour la période 1957-1970 seulement).
5. Effectifs et nombre d'employés à salaire (heures déclarées) (disponibles sur demande seulement pour les périodes antérieures à 1971).

A. 1957-1960

Les données mensuelles n'ont pas été publiées mais sont disponibles sur demande.

Les moyennes annuelles figurent dans:

Review of Employment and Average Weekly Wages and Salaries, *n° 72-201 au catalogue, 1957-1967* Review of Man Hours and Hourly Earnings, *n° 72-202 au catalogue, 1957-1967*.

B. 1961-1970

Indices de l'emploi, 1961-1964, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir *Employment, Earnings and Hours, n° 72-002 au catalogue, octobre 1971*.

Indices de l'emploi, 1965-1967, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir le *n° 72-002 au catalogue, février 1968*.

Gains hebdomadaires moyens, 1961-1969, pour:

Canada: Transports; entretien des routes et des ponts.

Région de l'Atlantique: Transports, communications et autres services publics; transports; entretien des routes et des ponts.

Nouvelle-Ecosse: Transports, communications et autres services publics; transports.

Québec: Transports, communications et autres services publics; transports; entretien des routes et des ponts. *n° 72-002 au catalogue, novembre 1971*.

Gains hebdomadaires moyens, 1968-1970, Canada, Ontario et Québec pour les instruments scientifiques et professionnels; les manufactures diverses; les biens non durables; les manufactures; le commerce de gros; le commerce; et l'ensemble des industries. Voir le *n° 72-002 au catalogue, février 1972*.

Heures hebdomadaires moyennes, Rémunération horaire moyenne, Gains hebdomadaires moyens des employés à salaire (heures déclarées), 1961-1967 for:

Canada: Highways, bridges and streets; Engineering; Construction.

Ontario: Highways, bridges and streets; Engineering; Construction; Highway and bridge maintenance. *Catalogue 72-002, June 1972.*

Average Weekly Hours, Average Hourly Earnings, Average Weekly Wages - 1961-1969 Canada - Atlantic Region - Quebec - for highway and bridge maintenance - Catalogue 72-002, December 1971.

All other available monthly and annual data for 1961-1964 are published in:

Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, Catalogue 72-504.

All other available monthly and annual data published for 1965 are in *Catalogue 72-201 and 72-202, 1957-1967.*

All other available monthly and annual data for 1966 are published in *Catalogue 72-201 and 72-202, 1966-1968.*

All other available monthly and annual data for 1967 are published in *Catalogue 72-201 and 72-202, 1967-1969.*

All other available monthly and annual data for 1968-1970 are published in *Catalogue 72-201 and 72-202, 1968-1970.*

C. 1971-1973

Employment indexes and average weekly earnings for 1973 for Canada, Atlantic Region, Nova Scotia and Halifax for department stores, retail trade, trade and industrial composite, Catalogue 72-002 July 1974.

Employment indexes, unadjusted and seasonally-adjusted, percent female, total employees, average weekly earnings from January 1973 to June 1974, for Canada and Quebec, for highway and bridge maintenance, transportation, communication and other utilities and industrial composite. Catalogue 72-002 September 1974.

Employment for salaried employees, wage-earners (all), wage-earners (hours reported), average weekly earnings for salaried employees and wage-earners (all), average weekly hours and average hourly earnings for wage-earners (hours reported) from January 1973 to June 1974 for highway and bridge maintenance. Catalogue 72-002 September 1974.

All other series are published in the monthly issues of *Catalogue 72-002 for 1971, 1972 and 1973.*

(1) The issues of the publications referred to in this list contain the latest available data for any given series. Data for these series shown in other issues of these publications may have since been revised.

Canada: Les routes, les ponts et les rues; le génie; la construction.

Ontario: Les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts. Voir le n° 72-002 au catalogue, juin 1972.

Heures hebdomadaires moyennes, rémunération horaire moyenne, gains hebdomadaires moyens - 1961-1969 Canada - Région de l'Atlantique - Québec - pour l'entretien des routes et des ponts - n° 72-002 au catalogue, décembre 1971.

Toutes les autres données mensuelles et annuelles disponibles 1961-1964 sont publiées dans:

Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, n° 72-504 au catalogue.

Toutes les autres données mensuelles et annuelles disponibles pour 1965 figurent dans les n°s 72-201 et 72-202 au catalogue 1957-1967.

Toutes les autres données mensuelles et annuelles disponibles pour 1967 sont publiées dans les n°s 72-201 et 72-202 au catalogue, 1967-1969.

Toutes les autres données mensuelles et annuelles disponibles pour la période 1968-1970 sont publiées dans les n°s 72-201 et 72-202 au catalogue, 1968-1970.

C. 1971-1973

Indices de l'emploi et gains hebdomadaires moyens, 1973, Canada, Région de l'Atlantique, Nouvelle-Ecosse et Halifax pour les magasins, le commerce de détail, le commerce et l'ensemble des industries. Voir le n° 72-002 au catalogue, juillet 1974.

Indices de l'emploi, non désaisonnalisés et désaisonnalisés, pourcentage de femmes, le nombre d'employés, rémunération hebdomadaire moyenne des employés à traitement, ensemble des employés à salaire, heures hebdomadaires moyennes et rémunération horaire moyenne des employés à (heures déclarées) de janvier 1973 à juin 1974 pour Canada et Québec, pour l'entretien des routes et ponts, transports, communication et autres services publics et l'ensemble des industries. Voir le n° 72-002 au catalogue, septembre 1974.

Nombre d'employés à traitement, ensemble des employés à salaire (heures déclarées), rémunération hebdomadaire moyenne des employés à traitement, ensemble des employés à salaire, heures hebdomadaires moyennes et rémunération horaire moyenne des employés à (heures déclarées) de janvier 1973 à juin 1974 pour Canada et Québec, pour l'entretien des routes et ponts. Voir le n° 72-002 au catalogue, septembre 1974.

Toutes les autres séries sont publiées dans les bulletins mensuels n° 72-002 au catalogue pour les années 1971, 1972 et 1973.

(1) Les numéros des publications susmentionnées renferment les données disponibles pour toute série donnée. Les données relatives à ces séries figurant dans d'autres numéros de ces publications peuvent avoir été rectifiées depuis.

CONCEPTS AND METHODS

Each month the Monthly Employment, Payrolls and Labour Section of the Labour Division, through a mail survey, collects information on employment, earnings and hours which are tabulated and sent the data in this report. Data which, prior to March 1971, published separately in "Employment and Average Weekly Wages and Salaries" (Catalogue 72-002) and in "Man-Hours and Earnings" (Catalogue 72-003) have been combined in this report. The following notes explain the concepts and methods used in the survey.

Reporting Unit

The reporting unit is usually the establishment, that is, the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "mark-up" or "gross profit" as well as data on employment and earnings. For purposes of detailed geographic statistics, the Section requests that the reporting unit be a sub-establishment unit although not capable of reporting all basic statistics, can report employment and payroll data for that particular location.

Generally, the survey covers larger companies only, that is, companies having 20 or more employees in any month of the year. For all the establishments of a multi-establishment company are included if the company had 20 or more employees in total in any month of the year even though any single establishment may have had fewer employees.

Reference Period

Conceptually, the figures refer to the last seven days in the month. In practice, few establishments keep payroll records for precisely this period and establishments are therefore asked to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the data are reduced to one week's proportion of the totals. The factors of the fractions used in calculating these weekly equivalents are 5, 6 or 7, depending on the number of working days per week which the establishment operated in the pay period. The factors of the fractions are the number of working days in the pay periods. For employees paid at annual or monthly rates, earnings are not affected by the number of working days in the pay period. Fixed proportions are used to reduce the earnings to a weekly basis without regard to the length of the calendar month.

When a holiday, layoff or industrial dispute occurs in an establishment that reports a pay period that is different from the last seven days of the month, an adjustment is made to the data, if the layoff or dispute affects the two periods differently, so that the data accurately reflects the actual situation during the reference period.

All industries are covered by the survey, with the exceptions of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private household services, public administration and defence. Because of the limitation of the survey to larger firms, there is somewhat uneven coverage of employment by industry as well as by province and urban area. The percentage of total employment covered depends on the proportion

CONCEPTS ET MÉTHODES

Chaque mois, la Section des Statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail de la Division du travail recueille, par voie d'enquête postale, des données sur l'emploi, les gains et les heures de travail, données qui sont ensuite publiées ici sous forme de tableaux. Les données qui, avant mars 1971, étaient publiées séparément dans "Employment and Average Weekly Wages and Salaries" (n° 72-002 au catalogue) et dans "Man-Hours and Hourly Earnings" (n° 72-003 au catalogue) sont regroupées ici. Les notes qui suivent expliquent les concepts et la méthodologie de l'enquête.

Unité de déclaration

L'unité de déclaration est ordinairement l'établissement, c'est-à-dire la plus petite unité constituant un ensemble d'exploitation séparé en mesure de déclarer tous les éléments de base relevant de la statistique des activités économiques, y compris les données sur les entrées et les sorties qui sont nécessaires pour calculer la "valeur ajoutée" ou la "majoration brute" ou le "bénéfice brut" ainsi que des données sur l'emploi et les rémunérations. Pour obtenir des statistiques géographiques détaillées, la Section demande souvent que l'unité de déclaration se situe à un niveau qui est en deça de celui de l'établissement, mais qui permet quand même d'obtenir des données sur l'emploi et les rémunérations à ce niveau, même si, par définition, ce niveau ne peut fournir toutes les statistiques de base.

En règle générale, l'enquête vise seulement les grandes entreprises, c'est-à-dire les entreprises employant 20 employés ou plus au cours de n'importe quel mois de l'année. Toutefois, tous les établissements d'une entreprise à établissements multiples sont pris en compte si l'entreprise emploie 20 employés ou plus, au total, au cours de n'importe quel mois de l'année, même si un de ces établissements peut n'avoir eu que quelques employés.

Période de référence

En théorie, l'enquête vise les chiffres des sept derniers jours des mois de référence. Vu qu'en pratique peu d'établissements tiennent des registres de paye pour cette période précise, on permet aux établissements de faire porter leurs chiffres sur la (ou les) dernière(s) période(s) de paye de chaque mois.

Si la période de paye visée dépasse une semaine, les chiffres sont réduits en conséquence. Les numérateurs des fractions utilisées pour calculer l'équivalent hebdomadaire sont 5, 6 ou 7, suivant le nombre de jours ouvrables par semaine où l'établissement a été en exploitation pendant la période de paye. Les dénominateurs des fractions sont le nombre de jours ouvrables des diverses périodes de paye. Dans le cas du personnel qui est rémunéré sur une base annuelle ou mensuelle et dont les gains ne sont pas touchés par le nombre de jours ouvrables au cours du mois, on utilise des proportions fixes pour ramener les gains sur une base hebdomadaire, sans tenir compte de la longueur du mois civil.

En cas de jour férié, de congédiement ou de conflit du travail dans un établissement dont la période de paye ne correspond pas aux sept derniers jours du mois, les données sont rectifiées lorsque l'effet du jour férié, du congédiement ou du conflit n'est pas le même sur les deux périodes, de manière que les données soient le reflet fidèle de la situation pendant la période de référence.

Champ de l'enquête

Toutes les branches d'activité économique sont prises en compte dans l'enquête, à l'exception de l'agriculture, de la pêche et du piégeage, de l'éducation et des services connexes, des services d'hygiène et de bien-être, des organismes religieux, des ménages et de l'administration publique et de la défense. Parce que l'enquête se limite aux grandes entreprises, le champ d'observation de l'emploi par branche d'activité, par province et par région urbaine manque quelque peu d'uniformité. Le

tion of larger to smaller establishments. This proportion varies considerably among industries. The following table shows annual employment as reported in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms plus supplementary surveys. Estimates of total employment are published in "Estimates of Employees by Province and Industry" (Catalogue 72-008).

pourcentage de l'emploi total qui est observé dépend du rapport des établissements aux petits établissements. Cette proportion varie considérablement d'une branche à l'autre. Le tableau suivant indique le pourcentage annuel de l'emploi, tel qu'il ressort de l'enquête, en pourcentage de l'estimatif de l'emploi total, ce dernier étant la somme des résultats de l'enquête sur l'emploi et la rémunération et des résultats d'une enquête d'échantillon auprès des petites entreprises ainsi que d'autres enquêtes supplémentaires. Des estimations du nombre total d'employés sont publiées sous le titre "Estimations du nombre d'employés par province et industrie" (n° 72-008 au catalogue).

Larger-Firm Survey Employment as a Percentage of Total Estimated Employment, by Industry Division, for Canada and Provinces, 1972 Annual Averages(1)

- (1) Total estimated employment is derived by adding together data from the employment and payrolls survey of larger-firms and data from a sample survey of smaller firms plus supplementary surveys. - L'estimation de l'emploi total est obtenue en additionnant les données de l'enquête sur l'emploi et la paie dans les grandes entreprises à celles d'une enquête par échantillonnage dans les petites entreprises et d'autres enquêtes supplémentaires.
- (2) Includes recreational, business, personal and miscellaneous services only; data has not been published previously. - Comprend seulement les services récréatifs, commerciaux, personnels et divers; ces données n'ont pas été publiées auparavant.
- (3) These percentages are small because non-commercial services including education and related services, health and welfare services, religious organizations and private households, are included in total estimated employment but are not part of the larger-firm employment survey. - Ces pourcentages sont petits parce que les services non commerciaux, y compris l'enseignement et les services connexes, la santé et les oeuvres sociales, les organismes religieux et les ménages privés, sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.
- (4) Excludes non-commercial services and public administration and defence; data has not been published previously. - Ne comprend pas les services non commerciaux et l'administration publique et de la défense; ces données n'ont pas été publiées auparavant.
- (5) These percentages are smaller because both non-commercial services and public administration and defence are included in total estimated employment but are not part of the larger-firm employment survey. - Ces pourcentages sont plus petits parce que les services non commerciaux et l'administration publique et la défense nationale sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.
- (6) Data for forestry and construction by province are not available for periods more recent than 1970. Les données pour le forestage et la construction ne sont pas disponibles par province après l'année 1970.

Geographic Classification

Reporting units are assigned to a province, a county (as defined by the Census of Population) and, where applicable, to an urban area. Data for Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are aggregated in some tables to give statistics for the Atlantic Region. Similarly, data for Manitoba, Saskatchewan and Alberta are added together to provide totals for the Prairie Region. The Census of Population's "Metropolitan Area" definitions were used for the nineteen applicable urban areas. The definitions used for other urban areas are based on a labour market concept; the areas usually include the surrounding territory as well as the urban centre. A list showing the territory included in each

Classification géographique

Les unités de déclaration sont affectées à une province, à un comté (selon la définition établie par le recensement de la population) et, le cas échéant, à une région urbaine. Les données de Terre-Neuve, du-Prince-Edouard, de la Nouvelle-Ecosse et du Nouveau-Brunswick sont agrégées dans certains tableaux présentant des statistiques pour la région de l'Atlantique. De la même manière, les données du Manitoba, du Saskatchewan et de l'Alberta sont additionnées pour former le total de la région des Prairies. On a retenu la définition de "région métropolitaine" pour les dix-neuf régions urbaines applicables. Les définitions employées pour les autres régions urbaines sont fondées sur le concept du marché du travail; les régions

urban area is available from the Monthly Employment, and Labour Income Section. The reporting units not located in the urban area are included in county, provincial and national totals.

Classification

Establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the largest net value added by these activities, or where possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not shifted from industry to industry each time its principal activity changes.

Statistics from the survey are based on the 1960 Standard Industrial Classification. A description of the various industries and their principal activities may be found in the "Standard Industrial Classification Manual", Catalogue 12-501 (1960). The "S.I.C. code" for each of the main tables refer to this manual. The tables contain a list of products not found in the Standard Industrial Classification. Code:

Industrial composite (031-899) - The sum of the industries included in the survey. (see Coverage)

Durable goods manufacturing (durable) - The sum of wood products (S.I.C. 250-259), furniture and fixtures (S.I.C. 260-269), primary metal industries (S.I.C. 290-298), metal fabricating industries (S.I.C. 300-309), machinery (except electrical) (S.I.C. 310-318), transportation equipment (S.I.C. 320-329), electrical products (S.I.C. 330-339), and non-metallic mineral products (S.I.C. 340-359).

Durable goods manufacturing (non-dur) - The sum of food and beverages (S.I.C. 100-147), tobacco processing and products (S.I.C. 150-153), rubber products (S.I.C. 160-169), leather products (S.I.C. 170-179), textile products (S.I.C. 180-229), knitting mills (S.I.C. 230-239), clothing (S.I.C. 240-249), paper and allied industries (S.I.C. 270-274), printing and publishing and allied industries (S.I.C. 280-289), petroleum and coal products (S.I.C. 360-369), chemicals and allied products (S.I.C. 370-379), and miscellaneous manufacturing industries (S.I.C. 380-399).

Building (404,421) - The sum of general contractors (S.I.C. 1500-1599) and special trade contractors (S.I.C. 421).

Engineering (406-409) - The sum of highway, bridge and other construction (S.I.C. 406) and other construction (S.I.C. 409).

Textile industry (201) - The synthetic textile industry (201) is subdivided into spun yarn and fabrics (2011) and filament yarn and staple (2012).

Payment data represent all employees on the payrolls of establishments in the reference period. The employee concept excludes partners or partners in unincorporated businesses, non-employees, the self-employed, unpaid family workers, persons performing unremunerative volunteer work, pensioners, home workers,

ordinairement le territoire avoisinant avec le centre urbain. On peut obtenir sur demande une liste indiquant le territoire compris dans chaque région urbaine en s'adressant à la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail. Les unités de déclaration situées ailleurs que dans une région urbaine retenue sont comprises dans les chiffres du comté, de la province et de la région.

Classification par activité économique

Tous les établissements appartiennent à une branche d'activité économique, qui est déterminée en fonction de leur activité principale. Si un établissement a plusieurs activités économiques, son activité principale est déterminée par la plus grande valeur nette ajoutée de ces activités, ou si cela n'est pas possible, par les recettes brutes au titre des différentes activités. Si un établissement exerce des activités très diverses, on ne le transfère pas nécessairement d'une branche à l'autre chaque fois que son activité principale change.

Les statistiques tirées de l'enquête sont fondées sur la Classification type des industries de 1960. On peut trouver une description des diverses activités économiques et groupes d'activités économiques dans le "Manuel de la classification type des industries", n° 12-501 au catalogue (1960). Les colonnes "code de la C.T.I." des principaux tableaux renvoient à ce manuel. Les tableaux renferment quelques groupements qui ne se trouvent pas dans la Classification type des industries. Ce sont:

Ensemble des industries (031-899) - l'ensemble des activités économiques visées par l'enquête. (voir Champ de l'enquête)

Manufactures, biens durables (durable) - l'ensemble de l'industrie des produits du bois (C.T.I. 250-259), de l'industrie des meubles et accessoires d'ameublement (C.T.I. 260-269), de l'industrie des métaux (formes primaires) (C.T.I. 290-298), de l'industrie des produits métalliques (C.T.I. 300-309), de l'industrie de la machinerie (sauf le matériel électrique) (C.T.I. 310-318), de l'industrie du matériel de transport (C.T.I. 320-329), de l'industrie des appareils et du matériel électriques (C.T.I. 330-339), et de l'industrie des produits minéraux non métalliques (C.T.I. 340-359).

Manufactures, biens non durables (non dur.) - L'ensemble de l'industrie des aliments et boissons (C.T.I. 100-147), de l'industrie du traitement et des produits du tabac (C.T.I. 150-153), de l'industrie des produits du caoutchouc (C.T.I. 160-169), de l'industrie des produits du cuir (C.T.I. 170-179), de l'industrie des produits du textile (C.T.I. 180-229), de l'industrie de la bonneterie (C.T.I. 230-239), de l'industrie du vêtement (C.T.I. 240-249), de l'industrie du papier et des produits connexes (C.T.I. 270-274) de l'imprimerie, de l'édition et des industries connexes (C.T.I. 280-289), de l'industrie du pétrole, du charbon et de leurs dérivés (C.T.I. 360-369), de l'industrie chimique et des produits connexes (C.T.I. 370-379) et des industries manufacturières diverses (C.T.I. 380-399).

Bâtiment (404, 421) - L'ensemble des entrepreneurs généraux (C.T.I. 404) et des entrepreneurs spécialisés (C.T.I. 421).

Genie civil (C.T.I. 406-409) - L'ensemble de la construction de routes, ponts et rues (C.T.I. 406) et des autres constructions (C.T.I. 409).

En outre, l'industrie des textiles synthétiques (201) est subdivisée en filés et tissus (2011) et en filés de filaments et fibres discontinues (2012).

Emploi

Les données sur l'emploi représentent tous les employés inscrits aux registres de paye des unités de déclaration au cours de la période de référence. Le concept d'employé exclut les propriétaires actifs ou partenaires d'entreprises non constituées en corporation, les membres des conseils d'administration qui ne travaillent pas dans l'entreprise, les travailleurs

and persons providing services to an establishment on the basis of a contract for services. Counted as employed, therefore, are all wage-earners and salaried employees who are paid for their services or are on paid absence during the reference period, except for casual employees working less than seven hours in the pay period. *Regular part-time* employees are treated as employed regardless of the number of hours worked during the pay period.

For example, an employee working for a part of the reference period and unemployed or on strike for the rest, is counted as employed. Employees not receiving pay for the entire reference period because of strike or as a consequence of a strike, or those persons on leave without pay, are not included among the employed.

Wage-earners

Wage-earners are defined by occupation rather than by the method of payment. They are those employees engaged in actual production and related operations, including maintenance, warehouse and delivery staffs, security staff, routemen, driver-salesmen, sales clerks in retail stores, waitresses, and working foremen performing functions similar to those of the employees whom they supervise, etc. Wage-earners may be paid a fixed monthly amount or on the basis of hours worked. The survey covers all wage-earners regardless of the method of payment and average weekly wages are computed for all. However, derivations of average weekly hours and average hourly earnings are based only upon data for wage-earners for whom hours data are available.

Salaried Employees

Salaried employees constitute executive, administrative, supervisory, technical and professional personnel, commission agents, and travelling salesmen directly responsible to the administration, as well as general office, clerical and related workers in the office and plant. In addition, working directors of incorporated businesses are included in this category.

Earnings

Earnings of wage-earners and salaried employees represent gross pay for the week, before deductions for taxes, unemployment insurance contributions, etc. Gross pay includes salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. The payroll concept does not include supplementary labour costs such as employers' contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or directors' fees.

The term "earnings" is used to denote the total of weekly wages of the wage-earners and salaries of the salaried employees. The publications prior to March 1971 contained this combined data entitled "Average Weekly Wages and Salaries". These data are comparable with "Average Weekly Earnings" of total employees in

autonomes, les travailleurs familiaux non rémunérés, les bénéficiaires de pensions, les travailleurs à domicile et les personnes fournissant des services à forfait ou sous contrat. Sont donc considérés comme employés tous les employés à salaire et tous les employés à traitement rémunérés pour leurs services ou qui sont en congé payé pendant la période de référence, à l'exception des occasionnels ayant travaillé moins de sept heures pendant la période de paye. Les *employés réguliers à temps partiel* sont comptés parmi les employés quel que soit le nombre d'heures travaillées pendant la période de paye.

Par exemple, une personne travaillant une partie de la période de référence et en chômage ou en grève le reste de la période, est comptée comme occupée. Les employés qui ne sont pas rémunérés pendant la période de référence à cause d'une grève ou des conséquences d'une grève, ou les personnes en congé sans paye ne figurent pas parmi les employés occupés.

Employés à salaire

L'employé à salaire est défini par la nature du travail plutôt que par le mode de rémunération. Les employés à salaire sont les employés travaillant effectivement à la production et à des opérations assimilées, y compris le personnel d'entretien, d'entrepôt et de livraison, le personnel de sécurité, les chauffeurs-livreurs, les vendeurs itinérants, les employés des magasins de détail, les serveuses et les contremaîtres remplissant des fonctions analogues à celles des employés dont ils ont la charge. Les employés à salaire peuvent être rémunérés sur une base mensuelle ou hebdomadaire suivant le nombre d'heures travaillées. L'enquête couvre tous les employés à salaire quel que soit leur mode de rémunération et les gains hebdomadaires moyens sont calculés pour tous. Toutefois, les heures hebdomadaires moyennes et les rémunérations horaires moyennes sont calculées à partir des données relatives aux employés à salaire dont on connaît le nombre d'heures de travail.

Employés à traitement

Les employés à traitement comprennent les directeurs, les administrateurs, les surveillants, les cadres techniques et spécialisés, les agents de commission, les voyageurs de commerce relevant directement de l'administration, ainsi que les employés de bureau, les commis et les employés assimilés, au bureau et à l'usine. Les membres des conseils d'administration d'entreprises constituées en corporation qui travaillent dans l'usine sont également compris dans cette catégorie.

Rémunération

Les rémunérations des employés à salaire et des employés à traitement représentent les gains bruts de la semaine, avant déduction d'impôt, de cotisations d'assurance-chômage, etc. La rémunération brute comprend les salaires, la rémunération au taux ou au rendement, les primes de vie chère et autres gratifications régulières, les gains pour travail supplémentaire et les paiements aux personnes en congé payé pendant la semaine de l'enquête. La rémunération ne comprend pas les frais supplémentaires d'œuvre tels que les cotisations de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie, à la caisse d'indemnités pour accidents de travail et à d'autres régimes de prévoyance; il ne s'agit pas non plus du coût du matériel, la valeur de la pension, les paiements à titre de frais de déplacement, les indemnités de retraite, les versements à intervalles irréguliers et peu fréquents ni les jetons de présence des administrateurs.

Le terme "rémunérations" désigne l'ensemble des rémunérations des employés à salaire et des employés à traitement. Les publications antérieures à mars 1971 renfermaient des données réunies sous le titre "Average Weekly Wages and Salaries". Ces données sont comparables aux "rémunérations hebdomadaires moyennes" de l'ensemble des em

at publication. The system now provides separate earnings for wage-earners and salaried employees whereas formerly the "Average Weekly Wages" for hourly-rated wage-earners was

Numbers

Index numbers are calculated by dividing the current month's payroll (or payroll) by the monthly-average of the total base payroll (or payroll). The current employment consists of all employees reported by establishments that meet our size criteria in the base period. Base year employment consists of the employment of establishments that had 20 or more employees in any month of the base period. The payroll index is calculated in a similar fashion.

Seasonally-adjusted index numbers remove from the employment index those regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the trend and irregular components of the time series. The X-11 procedure of the U.S. Census Bureau Method II is used to calculate the seasonally-adjusted index numbers; additional seasonally-adjusted index numbers are found in "Employment, earnings and hours, seasonally-adjusted series January 1961 - December 1971" (Catalogue

The average weekly hours figure is obtained by dividing total hours by the number of wage-earners who worked those hours. Hourly earnings are obtained by dividing total weekly earnings by the number of wage-earners by their total weekly hours. Both figures apply only to the subset of wage-earners for whom hours are reported. It should be noted that total hours include hours actually worked and that the wage-earner total includes full-time wage-earners and casuals working more than seven hours in one week. Annual statistics are calculated from the monthly data, with the exception of those shown as preliminary (p); the latter are based on monthly averages.

Presentation

For each month, statistics for three months are prepared by the Employment, Payrolls and Labour Income Section. Data for the first two current months, are entitled first estimates. They are based on a limited number of returns (usually about 50%) and only preliminary figures are released in the Statistics Canada Daily Estimates table of this publication. Simultaneously, preliminary estimates are prepared for the month immediately preceding the current data and third estimates for the month prior to that. The latter estimates are of higher quality than that of the first two, with a higher rate of returns (typically, 65% and 75%, respectively). Consequently full details for both months are shown in the publication.

At the completion of the third estimate, further revisions to the data are made to incorporate late returns and corrected information from our respondents or to rectify mechanical errors. Larger corrections are calculated immediately and appear in the historical tables and in column for the previous year in tables 2, 3 and 4 of this publication. The smaller corrections are completed in the tables when all returns are retabulated to produce revised annual averages; these data are contained in catalogue 72-202.

en compte ici. Ce système permet maintenant d'avoir des données distinctes pour tous les employés à salaire et les employés à traitement tandis qu'autrefois on ne pouvait connaître que les "rémunérations hebdomadaires moyennes" des employés à salaire rémunérés à taux horaire.

Nombres-indices

On obtient les nombres-indices en divisant le nombre total d'employés (ou la rémunération) du mois courant par la moyenne mensuelle du nombre d'employés (ou de la rémunération) de l'année de base. Le nombre courant d'employés est l'ensemble des employés déclarés par les établissements dont la taille répond à notre critère pendant la période courante. Le nombre d'employés pour l'année de base est le nombre d'employés des établissements employant 20 employés ou plus pendant n'importe quel mois de l'année 1961. L'indice de la rémunération est calculé de la même manière.

La désaisonnalisation des nombres-indices a pour effet d'éliminer des indices de l'emploi les fluctuations qui se produisent à intervalles réguliers et qui s'appellent variations saisonnières. Les nombres-indices désaisonnalisés représentent donc assez bien la tendance, le cycle et les composantes irrégulières de la série chronologique. La variante X-11 de la méthode II du recensement des États-Unis est utilisée pour calculer les nombres-indices désaisonnalisés; on peut trouver d'autres séries désaisonnalisées dans "Emploi, rémunérations et heures, séries désaisonnalisées janvier 1961-décembre 1971" (n° 72-206 au catalogue).

Moyennes

On calcule les heures hebdomadaires moyennes en divisant le nombre total d'heures-hommes par le nombre d'employés à salaire qui ont fait ces heures. On obtient les rémunérations horaires moyennes en divisant la rémunération hebdomadaire totale des employés à salaire rémunérés à l'heure par le nombre total de leurs heures par semaine. Ces deux moyennes s'appliquent seulement aux employés à salaire dont le nombre d'heures est déclaré. À remarquer que le nombre total d'heures comprend les heures supplémentaires réelles et que le total des employés à salaire comprend les employés à salaire à temps partiel et les occasionnels qui travaillent plus de sept heures par semaine. À l'exception des statistiques provisoires (p), qui sont fondées sur les moyennes mensuelles, les statistiques annuelles sont établies à partir de l'ensemble des données mensuelles.

Présentation statistique

Chaque mois, la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail prépare des statistiques pour trois mois. Les données du premier mois, le mois le plus récent, sont appelées "premières estimations". Elles sont fondées sur un nombre limité de déclarations (environ 50%) et seuls des chiffres très généraux sont publiés dans Le Quotidien de Statistique Canada et dans le tableau "Premières estimations" de la présente publication. En même temps, la Section prépare des deuxième estimations pour le mois qui précède le mois le plus récent, et des troisième estimations pour le mois qui précède celui-là. Ces deux dernières estimations sont de meilleure qualité que les premières en raison de la disponibilité d'un plus grand nombre de réponses (d'habitude 65% pour les deuxième estimations et 75% pour les troisième). Par conséquent, la présente publication contient tous les détails pour ces deux mois.

Une fois terminées les troisième estimations, on effectue d'autres rectifications à la lumière des déclarations des retardataires et des corrections reçues de nos enquêtés, ou par suite de la correction de certaines erreurs mécaniques. Les corrections les plus importantes sont effectuées immédiatement; elles paraissent dans les tableaux chronologiques et spéciaux ainsi que dans la colonne de l'année précédente aux tableaux 2, 3 et 4 de la présente publication. Les corrections de moindre importance sont effectuées dans les tableaux annuels quand toutes les réponses ont été totalisées de nouveau en vue de la production de chiffres et de moyennes annuelles rectifiés; ces données sont publiées dans les publications 72-201 et 72-202.

PUBLICATIONS SUR L'EMPLOI ET LA RÉMUNÉRATION

Les publications suivantes de la Division du travail contiennent des données sur l'emploi, la rémunération et les heures de travail dans l'industrie, d'après le concept de l'établissement:

2-002 - Employment, Earnings and Hours, M. Angl.

(Indices de l'emploi et de la rémunération, par région et par activité économique; moyennes des gains et des rémunérations hebdomadaires, heures hebdomadaires moyennes et gains horaires moyens; comparaisons chronologiques; graphiques et notes explicatives).

2-005 - Estimations du Revenu du Travail; M. Bil.

(Estimations mensuelles, brutes et désaisonnalisées, des rémunérations et du revenu supplémentaire du travail, pour certaines activités économiques et certaines régions; avec totaux annuels pour une période de 10 ans).

2-008 - Estimations du nombre d'employés par province et par industrie, M. Bil.

(Estimations du nombre total d'employés; comparaisons avec les chiffres correspondants du mois précédent et de l'année précédente).

2-201 - Review of Employment and Average Weekly Wages and Salaries, A. Angl.

(Indices de l'emploi et de la rémunération et rémunérations hebdomadaires moyennes, par activité économique et par région: indices mensuels et annuels, pour une longue période; graphiques et notes explicatives).

2-202 - Review of Man-Hours and Hourly Earnings, A. Angl.

Heures hebdomadaires moyennes et rémunération horaire et hebdomadaire moyenne, par activité économique et par région, données mensuelles et annuelles, pour une longue période; graphiques et notes explicatives).

2-204 - Earnings and Hours of Work in Manufacturing, 1969, Angl.

(Données distinctes sur les gains et les heures de travail des hommes et des femmes, ouvriers et salariés, pour une semaine d'octobre, à partir de 1946, réparties par activité économique et par région; graphiques et notes explicatives. Des données spéciales sont obtenues par voie de rotation d'année en année).

2-206 - Indices de l'emploi désaisonnalisés. Janvier 1961 à décembre 1970, Bil.

(Indices de l'emploi, par activité économique et par région: non désaisonnalisés, facteurs finals de désaisonnalisation, désaisonnalisés et moyennes mobiles MDC; heures hebdomadaires moyennes et gains horaires moyens).

2-502 - Labour Income, 1926-1958 - épuisé, Angl.

(Estimations annuelles du revenu du travail, de 1926 à 1958, avec chiffres mensuels à partir de 1947; explications des sources, des méthodes et des concepts.)

2-508 - Estimations du nombre d'employés par province et par industrie, 1961-1968, Bil.

(Estimations du nombre total de salariés, par mois et par année, pour les principales divisions d'activité économique, Canada et provinces. Revue des concepts, des sources et des méthodes et indicateurs de la variabilité d'échantillonnage.)

2-510 - Coûts de la main-d'oeuvre dans l'industrie manufacturière, 1968, Bil.

2-511 - Coûts de la main-d'oeuvre au Canada-Mines, carrières et puits de pétrole, 1969, Bil.

(Publication annuelle couvrant diverses branches d'activité sur une base cyclique ou irrégulière. Estimations de certains coûts de main-d'oeuvre, par groupe d'activité économique et par région - Publication conjointe de la Division du travail de Statistique Canada et de la Direction de l'économie et des recherches du ministère du Travail du Canada).

2-501 - Gains et heures de travail au Canada - Commerce de détail, septembre 1970, Bil.

(Gains hebdomadaires moyens, gains horaires moyens et heures hebdomadaires moyennes des employés des deux sexes dans le commerce de détail, selon la situation, ("à plein temps", "à temps partiel et occasionnels" et rattachés au "siège social", pour le Canada, les provinces et certaines régions urbaines).

Outre les publications énumérées ci-dessus, Statistique Canada publie une grande variété de bulletins statistiques sur la situation économique et social du Canada. On peut se procurer gratuitement un catalogue complet des publications courantes en s'adressant à Statistique Canada, KIA OT6.

EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

72-002 - Employment, Earnings and Hours, M., Engl.

(Industry and area index numbers of employment and payrolls, averages of weekly earnings, salaries and wages, averages of hours per week and hourly earnings; historical comparisons; charts and explanatory material).

72-005 - Estimates of Labour Income, M. Bil.

(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals covering a 10 year period).

72-008 - Estimates of Employees by Province and Industry, M. Bil.

(Estimates of total numbers of employees, with comparisons with a month and a year earlier).

72-201 - Review of Employment and Average Weekly Wages and Salaries, A. Engl.

(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).

72-202 - Review of Man-Hours and Hourly Earnings, A. Engl.

(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, over a lengthy period; charts and explanatory material).

72-204 - Earnings and Hours of Work in Manufacturing, 1969 Engl.

(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).

72-206 - Seasonally-adjusted Employment Indexes, January 1961 - December 1970, Bil.

(Industry and area index numbers of employment: unadjusted, final seasonal factors, seasonally-adjusted and MCD moving average; average weekly hours and hourly earnings).

72-502 - Labour Income, 1926-58 - Out of print, Engl.

(A record of annual estimates of labour income from 1926 to 1958, along with monthly figures from 1947; contains explanations of sources, methods and concepts).

72-508 - Estimates of Employees by Province and Industry, 1961-68, Bil.

(Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).

72-510 - Labour Costs in Manufacturing 1968, Bil.

72-511 - Labour Costs in Canada, Mines, Quarries and Oil Wells 1969, Bil.

(An annual publication covering various industries on a cycle or occasional basis. Estimates of selected employment, Labour Costs, by industry group and area - Report prepared jointly by Labour Division of Statistics Canada and Economics and Research Branch of Labour Canada).

72-601 - Earnings and Hours of Work in Canada - Retail Trade Industry, September 1970, Bil.

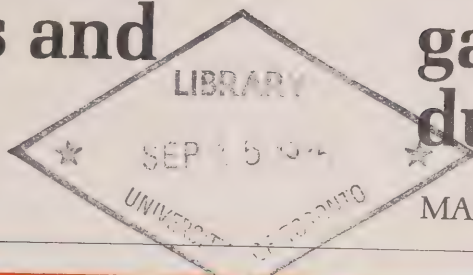

(Average Weekly Earnings, Average Hourly Earnings and Average Weekly Hours of Male and Female Employees in Retail Trade, by Employee Status i.e. "full-time", "part-time and casual" and "head office" employees for Canada, provinces and selected urban areas).

In addition to the selected publications listed above, Statistics Canada publishes a wide range of statistical reports on Canadian economic and social affairs. A comprehensive catalogue of all current publications is available free on request from Statistics Canada, Ottawa (Canada), KIA OT6.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- . . figures not available.
- . . . figures not appropriate or not applicable.
- nil or zero.
- - amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE

In addition, in this publication (except as otherwise noted), blanks in those columns where wage-earners and salaried employees data are shown separately indicate that representative data for wage-earners for whom hours are recorded are not available.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- . . nombres indisponibles.
- . . . n'ayant pas lieu de figurer.
- néant ou zéro.
- - nombres infimes.
- p nombres provisoires.
- r nombres rectifiés.
- x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

NOTA

On remarquera que, dans la présente publication (sauf contraire) les colonnes laissées en blanc dans le cas des traitements et des employés à salaire indiqués séparément, signifient des données relatives aux employés pour lesquels les heures sont en fait pas disponibles.

First Estimates(1) – March 1975

Seasonally-adjusted, the first estimate of the Canada industrial composite(2) index of employment (1961=100) showed a 0.6% rise from February to March. Decreases in employment occurred in industry divisions except transportation, communication and utilities and finance, insurance and real estate. All regions except British Columbia showed reduced levels of employment.

Unadjusted for seasonal variations, average weekly earnings in the Canada composite level rose 0.4% from February to March. Decreases were recorded in all industry divisions except construction and utilities and finance. The decline in construction earnings reflected a short work week in some areas owing to the Easter holiday.

Preliminary Data(1) – February 1975

Employment – (Seasonally-adjusted)

Preliminary data for February 1975 showed a 0.5% drop in employment at the Canada industrial composite level from the previous month. Decreases were recorded in all industry divisions except manufacturing.

Manufacturing employment fell 0.6% from January to February. Most of this decline was in the non-durables component, especially food and beverages and paper and allied industries. The 0.6% decline in transportation, communication and other utilities reflected a drop in water transport and services, storage and electric power. Employment in trade dropped 0.3% in February with decreases being recorded in wholesale trade, food stores and automotive product

Service employment decreased by 0.5% as declines in recreation, business and personal services more than offset gains in health services. The 1.0% decline in construction employment was largely in the building component, while the 0.4% drop in finance, insurance and real estate largely reflected decreases in insurance and real estate. Employment in forestry fell 1.6% reflecting reductions in British Columbia and the Atlantic Region. The 0.4% rise in employment in the Atlantic was the result of widespread increases.

Note on Statistical Presentation under Concepts and Methods at the back of this publication.

The Industrial Composite is the sum of all industries with the exception of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private households and public administration and defence. All statistics are based on returns received from employers having 20 or more employees in any month of the year.

Premières estimations(1) – Mars 1975

La première estimation désaisonnalisée de l'indice composite(2) de l'emploi dans les branches d'activité économique du Canada (1961=100) pour le mois de mars 1975 fait état d'une baisse de 0.6% par rapport à février 1975. L'emploi a baissé dans toutes les divisions d'activités économiques, sauf dans les transports, communications et autres services publics, et dans les finances, assurances et immeuble. Toutes les régions, à l'exception de la Colombie-Britannique, ont enregistré une diminution de l'emploi.

Dans toutes les divisions d'activités économiques du Canada, les gains hebdomadaires moyens non désaisonnalisés ont augmenté de 0.4% entre février et mars 1975. On a enregistré des augmentations dans tous les secteurs, sauf dans la construction, et dans toutes les régions, à l'exception du Québec. La réduction des gains hebdomadaires moyens dans la construction est principalement imputable à la diminution de la semaine de travail dans certaines régions à cause des vacances de Pâques.

Données provisoires(1) – Février 1975

Emploi – (chiffres désaisonnalisés)

Les données provisoires de février 1975 font ressortir une baisse de 0.5% pour l'ensemble d'activités économiques du Canada par rapport au mois précédent. On a enregistré des diminutions dans toutes les divisions à l'exception des mines.

L'emploi dans les industries manufacturières a fléchi de 0.6% entre janvier et février. Cette baisse est en grande partie attribuable aux composantes des biens non durables, principalement les aliments et boissons et le papier et produits connexes. La baisse de 0.6% dans le cas des transports, communications et autres services publics s'explique par les réductions observées dans les transports par eau et services, l'entreposage et l'électricité. L'emploi dans le commerce a fléchi de 0.3% en février à la suite des baisses enregistrées dans le commerce de gros, les magasins d'alimentation et les pièces et accessoires pour l'automobile.

L'emploi dans les services a diminué de 0.5% et les réductions dans les services récréatifs, les services extérieurs des entreprises et les services personnels ont plus que contrebalancé les progressions enregistrées dans les services divers. La baisse de 1.0% de la construction est en grande partie attribuable à la composante du bâtiment, et celle de 0.4% dans les finances, assurances et immeuble est causée principalement par des diminutions touchant les assurances et l'immeuble. Dans le secteur du forage, l'emploi a diminué de 1.6% en raison des réductions dans l'abattage en Colombie-Britannique et dans la région de l'Atlantique. La hausse de 0.4% dans les mines est attribuable à des augmentations dans tous les secteurs.

- (1) Voir Présentation statistique sous Concepts et méthodes à la fin de la présente publication.
- (2) L'indice composite s'applique à l'ensemble des activités économiques sauf l'agriculture, la pêche et le piégeage, l'éducation et les services connexes, les services d'hygiène et de bien-être, les organisations religieuses, les ménages privés et l'administration publique et la défense. Les données sont fondées sur les déclarations soumises par les employeurs comptant au moins (20) employés au cours d'un mois quelconque de l'année.

In the *Atlantic Region*, the industrial composite employment index dropped 0.3% from January to February largely reflecting declines in Nova Scotia and New Brunswick. Employment declined in logging, fish products and building construction. There were somewhat offsetting gains in transportation.

The *Quebec* composite index of employment fell 0.8% from January to February. Manufacturing employment fell by 1.0% as the result of widespread decreases in durable goods plus declines in food and beverages, textile products and paper and allied industries. Decreases in hotels, restaurants and taverns, building construction and food stores were partially offset by gains in logging and transportation.

In *Ontario*, the composite employment index decreased 0.5%. This decline largely reflected widespread decreases in non-durables manufacturing, declines in transportation especially water transport and services, and reductions in both wholesale and retail trade.

The composite index of employment for the *Prairie Region* declined 0.4% in February as decreases in Saskatchewan and Alberta more than offset gains in Manitoba. Employment decreased in both durables and non-durables manufacturing, building construction and business services. Somewhat offsetting gains were recorded in department stores and communication.

In *British Columbia*, the composite index of employment fell 0.5%. Employment declines were recorded in logging, mineral fuels, non-durables manufacturing, building, water transport and services, retail trade, insurance and real estate and hotels, restaurants and taverns.

Earnings and Hours

Seasonally-adjusted, average weekly earnings rose 0.8% at the Canada industrial composite level in February. Gains occurred in all industry divisions except forestry and construction and in all provinces except Newfoundland and Nova Scotia.

Unadjusted for seasonal variations, average weekly earnings for the Canada industrial composite rose 1.1% to \$194.08. All provinces except Prince Edward Island and Nova Scotia contributed to the overall advance in the level of earnings.

In *forestry*, average weekly earnings increased from \$245.16 in January to \$252.47 in February largely reflecting widespread gains in hourly earnings. This increase was smaller than usual mainly due to the decline in hours worked in British Columbia.

Average weekly earnings in *mining* rose 1.0% in February to \$265.94 mainly reflecting increases in mineral fuels and services incidental to mining. Average weekly hours of hourly-rated wage-earners showed little change as gains in mineral fuels and services incidental to mining were offset by declines in metals. Average hourly earnings rose 5 cents to \$6.04 with increases in metals and services incidental to mining.

Dans la *région de l'Atlantique*, l'indice composite de l'emploi a fléchi de 0.3% entre janvier et février, principalement en raison de diminutions enregistrées en Nouvelle-Écosse et au Nouveau-Brunswick. L'emploi a diminué dans l'abattage, les produits de la pêche et la construction. Ces diminutions ont quelque peu été compensées par des progressions dans les transports.

Au *Québec*, l'indice composite de l'emploi a fléchi de 0.8% entre janvier et février 1975. La baisse de 1.0% de l'emploi dans les industries manufacturières est attribuable aux réductions généralisées observées dans le cas des biens durables et à des diminutions dans les secteurs des aliments et boissons, des produits du textile et du papier et produits connexes. Des diminutions notées dans les hôtels, restaurants et tavernes, la construction et les magasins d'alimentation ont été en partie compensées par les hausses dans l'abattage et dans les transports.

En *Ontario*, l'indice composite de l'emploi a fléchi de 0.5%. Cette baisse est en grande partie attribuable aux diminutions généralisées dans les industries manufacturières des biens non durables, les transports, en particulier les transports par eau et services, et le commerce de gros et de détail.

L'indice composite de l'emploi dans la *région des Prairies* a diminué de 0.4% en février. Les baisses enregistrées en Saskatchewan et en Alberta ont plus que contrebalancé les accroissements signalés au Manitoba. L'emploi a diminué dans les industries manufacturières des biens durables et de biens non durables, dans la construction et dans les services extérieurs d'entreprises. Ces diminutions ont été quelque peu compensées par des accroissements enregistrés dans le cas des magasins à rayons et des communications.

En *Colombie-Britannique*, l'indice composite de l'emploi a diminué de 0.5%. L'emploi a diminué dans le cas de l'abattage, des produits minéraux, des industries de biens non durables, de la construction, des transports par eau et services, du commerce de détail, des assurances et de l'immobilier, ainsi que des hôtels, restaurants et tavernes.

Gains et heures de travail

Les gains hebdomadaires moyens *désaisonnalisés* ont augmenté de 0.8% en février pour l'ensemble des activités économiques au Canada. Des augmentations ont été enregistrées dans toutes les divisions économiques, sauf le forestage et la construction, et dans toutes les provinces à l'exception de Terre-Neuve et de la Nouvelle-Écosse.

Les gains hebdomadaires moyens *non désaisonnalisés* ont augmenté de 1.1% pour atteindre \$194.08. Des augmentations ont été enregistrées dans toutes les provinces, sauf à l'Île-du-Prince-Édouard et en Nouvelle-Écosse.

Dans le *forestage*, les gains hebdomadaires moyens ont augmenté de \$245.16 en janvier à \$252.47 en février à la suite de hausses dans les heures de travail. L'augmentation a été moins importante qu'à l'accoutumée, principalement d'une diminution des heures de travail en Colombie-Britannique.

Les gains hebdomadaires moyens dans les *mines* ont augmenté de 1.0% pour atteindre en février \$265.94. Cette hausse est en grande partie attribuable aux augmentations enregistrées dans le cas des produits minéraux et des services miniers. Le nombre moyen d'heures de travail par semaine des employés payés à l'heure a peu changé, car les baisses observées dans les combustibles minéraux et dans les services ont été compensées par une réduction pour ce qui est des métaux.

horaires moyens ont augmenté de 5 cents pour se fixer à \$6.04 en raison des hausses enregistrées dans les secteurs des métaux et des services miniers.

In *manufacturing*, average weekly earnings rose 1.2% to \$205.12. Widespread increases occurred in both durable and non-durable goods. All provinces except Newfoundland and Nova Scotia had increases. Average weekly hours remained unchanged, while average hourly earnings showed a 5 cent rise to \$4.82.

Dans les *industries manufacturières*, les gains hebdomadaires moyens ont progressé de 1.2% pour atteindre \$205.12. Les industries de biens durables et non durables font ressortir des augmentations généralisées. Il y a eu des progressions dans toutes les provinces, sauf à Terre-Neuve et en Nouvelle-Écosse. Le nombre d'heures de travail par semaine est resté inchangé, tandis que les gains horaires moyens s'accroissaient de 5 cents pour s'établir à \$4.82.

Average weekly earnings in *construction* rose from \$267.48 in January to \$271.30 in February. This rise reflected increased average hourly earnings (1.0%) in the building and engineering components. This rise in average hourly earnings was smaller than usual for this time of year.

Les gains hebdomadaires moyens dans la *construction* sont passés de \$267.48 en janvier à \$271.30 en février. Cette hausse est attribuable à une augmentation du nombre moyen d'heures de travail par semaine (+0.8%) et des gains hebdomadaires moyens (+1.0%) dans les composantes du bâtiment et du génie civil. Normalement, à cette époque de l'année, l'augmentation du nombre moyen d'heures de travail par semaine est plus importante.

In the *transportation, communications and other utilities*, average weekly earnings rose 0.6% in February reflecting increases in transportation and communications. Average weekly earnings in *trade* rose 1.7% with widespread increases in both wholesale and retail trade.

Dans les *transports, communications et autres services publics*, les gains hebdomadaires moyens ont augmenté de 0.6% en raison des hausses enregistrées dans les transports et communications. Les gains hebdomadaires moyens dans le *commerce* ont progressé de 1.7% en raison des augmentations généralisées touchant le commerce de gros et de détail.

Average weekly earnings in *finance, insurance and real estate* showed a little change over the month as declines in financial institutions were offset by gains in insurance and real estate. In *service*, average weekly earnings rose 0.3% to \$136.48 with rises in recreational, health and personal services.

Les gains hebdomadaires moyens dans les *finances, assurances et immobilier* ont peu changé, car les diminutions observées dans les établissements financiers ont contrebalancé les hausses enregistrées dans l'immobilier. Pour ce qui est des *services*, les gains hebdomadaires moyens ont augmenté de 0.3% pour atteindre \$136.48. Cette hausse est attribuable aux augmentations enregistrées dans les services récréatifs, les services extérieurs des entreprises et dans les services personnels.

(1) First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

Note: 1. The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which wages are spent. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue 62-002. 3. The data in this table relate to average weekly wages of hourly-rated wage-earners only. Although this statistics is no longer tabulated as part of this survey, a special manual calculation has been made in order to retain this table because of its extensive usage. An approximation of this calculation can be obtained by multiplying average weekly hours by average hourly earnings, for a particular industry-area cell. - Nota: 1. Les salaires hebdomadaires courants ont trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des salaires hebdomadaires courants pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les salaires sont dépensés. 2. Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no. 62-002 au catalogue. 3. Les données de ce tableau ont trait aux salaires hebdomadaires moyens des employés à salaire (heures déclarées) seulement. Bien que cette statistique ne figure plus dans les tableaux tirés de la présente enquête, on peut obtenir même fait un calcul spécial à la main en vue de maintenir ce tableau dont l'usage est très répandu. On peut obtenir une approximation de ce calcul en multipliant les heures hebdomadaires moyennes par la rémunération horaire moyennée pour un secteur particulier d'industrie-région.

TABLE 10. Average Weekly Earnings in Manufacturing in Current Dollars and Adjusted for Changes in the Consumer Price Index, for Canada

TABLEAU 10. Rémunération hebdomadaire moyenne dans manufactures en dollars courants et corrigée des variations de l'indice des prix à la consommation, Canada

Year and month Année et mois	Weekly earnings in current dollars Rémunération hebdomadaire en dollars courants	Index numbers of weekly earnings in current dollars (1961=100) Indices de la rémunération hebdomadaire en dollars courants	Weekly earnings in 1961 dollars Rémunération hebdomadaire en dollars de 1961	Index numbers of weekly earnings in 1961 dollars Indices de la rémunération hebdomadaire en dollars de 1961

First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

1. The current weekly earnings relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly earnings for any month is therefore adjusted in the above table by the Consumer Price Index for the following month as more representative of the period in which earnings are spent. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue 62-002. 3. This table relates to average weekly earnings of all employees. - Nota: 1. Les rémunérations hebdomadaires courantes ont trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des rémunérations hebdomadaires courantes pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les rémunérations sont dépensées. 2. Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no. 62-002 au Catalogue. 3. Ce tableau a trait à la rémunération hebdomadaire moyenne de tous les employés.

STATISTICAL DATA ON EMPLOYMENT, EARNINGS AND HOURS(1)
(based on the 1960 Standard Industrial Classification)

Continuous series from 1957 to date are available as follows:

Employment indexes (1961 = 100).

Average weekly earnings (formerly titled average weekly wages and salaries).

Average weekly hours and average hourly earnings of hourly-rated wage-earners.

Average weekly wages of hourly-rated wage-earners (available only for the period 1957-1970).

Number of employees and number of hourly-rated wage-earners (available on request basis only for periods prior to 1971).

1960

Monthly data were not published but are available on request.

Annual averages are shown in:

Review of Employment and Average Weekly Wages and Salaries, *Catalogue 72-201, 1957-67*; Review of Man Hours and Hourly Earnings, *Catalogue 72-202, 1957-67*.

1970

Employment Indexes, 1961-1964, for Canada and Ontario, for bridges and streets; engineering; construction; highway maintenance; transportation; and transportation, communication and other utilities. *Employment, Earnings and Hours, Catalogue 72-002, October 1971*.

Employment Indexes, 1965-1967, for Canada and Ontario, for bridges and streets; engineering; construction; highway maintenance; transportation; and transportation, communication and other utilities. *Catalogue 72-002, February 1968*.

Average Weekly Earnings, 1961-1969 for:

Transportation; Highway and bridge maintenance.

Region: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance.

Province: Transportation, communication and other utilities; Transportation.

Transportation, communication and other utilities; Transportation; Highway and bridge maintenance. *Catalogue 72-002, November 1971*.

Average Weekly Earnings, 1968-1970, for Canada, Ontario and Quebec for scientific and professional equipment; miscellaneous durable goods; non-durable goods; manufacturing; wholesale trade; industrial composite. *Catalogue 72-002, February 1972*.

Average Weekly Hours, Average Hourly Earnings, Average Wages of Hourly-rated Wage-earners - 1961-1967 for:

DONNÉES CHRONOLOGIQUES SUR L'EMPLOI, LES GAINS ET LA DURÉE DU TRAVAIL(1)
(fondées sur la Classification type des industries de 1960)

Les séries continues suivantes de 1957 jusqu'à aujourd'hui sont disponibles:

1. Indices de l'emploi (1961 = 100).
2. Gains hebdomadaires moyens.
3. Heures hebdomadaires moyennes et rémunération horaire moyenne des employés à salaire (heures déclarées).
4. Rémunération hebdomadaire moyenne des employés à salaire (heures déclarées) (disponibles pour la période 1957-1970 seulement).
5. Effectifs et nombre d'employés à salaire (heures déclarées) (disponibles sur demande seulement pour les périodes antérieures à 1971).

CONCEPTS AND METHODS

Each month the Monthly Employment, Payrolls and Labour Section of the Labour Division, through a mail survey, collects information on employment, earnings and hours which are tabulated in the data in this report. Data which, prior to March 1971, was published separately in "Employment and Average Weekly Wages and Salaries" (Catalogue 72-002) and in "Man-Hours and Earnings" (Catalogue 72-003) have been combined in this report. The following notes explain the concepts and methods used in the survey.

Reporting Unit

The reporting unit is usually the establishment, that is, the industrial unit which is a separate operating entity capable of producing all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "mark-up" or "gross profit" as well as data on employment and earnings. For purposes of detailed geographic statistics, the Section requests that the reporting unit be a sub-establishment unit which, though not capable of reporting all basic statistics, can report employment and payroll data for that particular location.

Generally, the survey covers larger companies only, that is, those having 20 or more employees in any month of the year. For all the establishments of a multi-establishment company are included if the company had 20 or more employees in total in any month of the year even though any single establishment may have had fewer employees.

Pay Period

Conceptually, the figures refer to the last seven days in the month. In practice, few establishments keep payroll records for precisely this period and establishments are therefore asked to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the figures are reduced to one week's proportion of the totals. The figures are reduced to the proportion of the week which the establishment operated in the pay period. The proportion of the fractions are the number of working days in the pay period. For employees paid at annual or monthly rates, earnings are not affected by the number of working days in the pay period. Proportions are used to reduce the earnings to a weekly basis with regard to the length of the calendar month.

When a holiday, layoff or industrial dispute occurs in an establishment that reports a pay period that is different from the last seven days of the month, an adjustment is made to the data, if the layoff or dispute affects the two periods differently, so that the data adequately reflects the actual situation during the reference period.

Industries covered by the survey, with the exceptions of fishing and trapping, education and related services, welfare services, religious organizations, private household production and defence. Because of the limitation of the survey to larger firms, there is somewhat uneven coverage of employment by industry as well as by province and urban area. The degree of total employment covered depends on the proportion

CONCEPTS ET MÉTHODES

Chaque mois, la Section des Statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail de la Division du travail recueille, par voie d'enquête postale, des données sur l'emploi, les gains et les heures de travail, données qui sont ensuite publiées ici sous forme de tableaux. Les données qui, avant mars 1971, étaient publiées séparément dans "Employment and Average Weekly Wages and Salaries" (n° 72-002 au catalogue) et dans "Man-Hours and Hourly Earnings" (n° 72-003 au catalogue) sont regroupées ici. Les notes qui suivent expliquent les concepts et la méthodologie de l'enquête.

Unité de déclaration

L'unité de déclaration est ordinairement l'établissement, c'est-à-dire la plus petite unité constituant un ensemble d'exploitation séparé en mesure de déclarer tous les éléments de base relevant de la statistique des activités économiques, y compris les données sur les entrées et les sorties qui sont nécessaires pour calculer la "valeur ajoutée" ou la "majoration brute" ou le "bénéfice brut" ainsi que des données sur l'emploi et les rémunérations. Pour obtenir des statistiques géographiques détaillées, la Section demande souvent que l'unité de déclaration se situe à un niveau qui est en deça de celui de l'établissement, mais qui permet quand même d'obtenir des données sur l'emploi et les rémunérations à ce niveau, même si, par définition, ce niveau ne peut fournir toutes les statistiques de base.

En règle générale, l'enquête vise seulement les grandes entreprises, c'est-à-dire les entreprises employant 20 employés ou plus au cours de n'importe quel mois de l'année. Toutefois, tous les établissements d'une entreprise à établissements multiples sont pris en compte si l'entreprise emploie 20 employés ou plus, au total, au cours de n'importe quel mois de l'année, même si un de ces établissements peut n'avoir eu que quelques employés.

Période de référence

En théorie, l'enquête vise les chiffres des sept derniers jours des mois de référence. Vu qu'en pratique peu d'établissements tiennent des registres de paye pour cette période précise, on permet aux établissements de faire porter leurs chiffres sur la (ou les) dernière(s) période(s) de paye de chaque mois.

Si la période de paye visée dépasse une semaine, les chiffres sont réduits en conséquence. Les numérateurs des fractions utilisées pour calculer l'équivalent hebdomadaire sont 5, 6 ou 7, suivant le nombre de jours ouvrables par semaine où l'établissement a été en exploitation pendant la période de paye. Les dénominateurs des fractions sont le nombre de jours ouvrables des diverses périodes de paye. Dans le cas du personnel qui est rémunéré sur une base annuelle ou mensuelle et dont les gains ne sont pas touchés par le nombre de jours ouvrables au cours du mois, on utilise des proportions fixes pour ramener les gains sur une base hebdomadaire, sans tenir compte de la longueur du mois civil.

En cas de jour férié, de congédiement ou de conflit du travail dans un établissement dont la période de paye ne correspond pas aux sept derniers jours du mois, les données sont rectifiées lorsque l'effet du jour férié, du congédiement ou du conflit n'est pas le même sur les deux périodes, de manière que les données soient le reflet fidèle de la situation pendant la période de référence.

Champ de l'enquête

Toutes les branches d'activité économique sont prises en compte dans l'enquête, à l'exception de l'agriculture, de la pêche et du piégeage, de l'éducation et des services connexes, des services d'hygiène et de bien-être, des organismes religieux, des ménages et de l'administration publique et de la défense. Parce que l'enquête se limite aux grandes entreprises, le champ d'observation de l'emploi par branche d'activité, par province et par région urbaine manque quelque peu d'uniformité. Le

tion of larger to smaller establishments. This proportion varies considerably among industries. The following table shows annual employment as reported in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms plus supplementary surveys. Estimates of total employment are published in "Estimates of Employees by Province and Industry" (Catalogue 72-008).

pourcentage de l'emploi total qui est observé dépend du rapport établissements aux petits établissements. Cette proportion varie blement d'une branche à l'autre. Le tableau suivant indique annuel de l'emploi, tel qu'il ressort de l'enquête, en pourcentage estimatif de l'emploi total, ce dernier étant la somme des r l'enquête sur l'emploi et la rémunération et des résultats d'une é échantillon auprès des petites entreprises ainsi que d'autres supplémentaires. Des estimations du nombre total d'employé bliées sous le titre "Estimations du nombre d'employés par prov industrie" (n° 72-008 au catalogue).

(1) Total estimated employment is derived by adding together data from the employment and payrolls survey of larger-firms and data from survey of smaller firms plus supplementary surveys. - L'estimation de l'emploi total est obtenue en additionnant les données de l'emploi et la paie dans les grandes entreprises à celles d'une enquête par échantillonnage dans les petites entreprises et d'autres supplémentaires.

(2) Includes recreational, business, personal and miscellaneous services only; data has not been published previously. - Comprend seulement services récréatifs, commerciaux, personnels et divers; ces données n'ont pas été publiées auparavant.

(3) These percentages are small because non-commercial services including education and related services, health and welfare service organizations and private households, are included in total estimated employment but are not part of the larger-firm employment survey. - Ces pourcentages sont petits parce que les services non commerciaux, y compris l'enseignement et les services connexes, la santé et les œuvres des organismes religieux et les ménages privés, sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur les grandes entreprises.

(4) Excludes non-commercial services and public administration and defence; data has not been published previously. - Ne comprend pas les services non commerciaux et l'administration publique et de la défense; ces données n'ont pas été publiées auparavant.

(5) These percentages are smaller because both non-commercial services and public administration and defence are included in total employment but are not part of the larger-firm employment survey. - Ces pourcentages sont plus petits parce que les services non commerciaux de même que l'administration publique et la défense nationale sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

(6) Data for forestry and construction by province are not available for periods more recent than 1970. Les données pour le forestage et la construction ne sont pas disponibles par province après l'année 1970.

Geographic Classification

Reporting units are assigned to a province, a county (as defined by the Census of Population) and, where applicable, to an urban area. Data for Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are aggregated in some tables to give statistics for the Atlantic Region. Similarly, data for Manitoba, Saskatchewan and Alberta are added together to provide totals for the Prairie Region. The Census of Population's "Metropolitan Area" definitions were used for the nineteen applicable urban areas. The definitions used for other urban areas are based on a labour market concept; the areas usually include the surrounding territory as well as the urban centre. A list showing the territory included in each tabulated urban area is available from the Monthly Employment,

Classification géographique

Les unités de déclaration sont affectées à une province (selon la définition établie par le recensement de la population), à une région urbaine. Les données de Terre-Neuve, du Prince-Edouard, de la Nouvelle-Ecosse et du Nouveau-Brunswick sont agrégées dans certains tableaux présentant des statistiques pour la région de l'Atlantique. De la même manière, les données du Manitoba, de la Saskatchewan et de l'Alberta sont additionnées pour former les totaux pour la région des Prairies. On a retenu la définition de "région métropolitaine" pour les dix-neuf régions urbaines applicables. Les définitions employées pour les autres régions urbaines sont fondées sur le concept du marché du travail; les régions incluent généralement le territoire avoisinant avec le centre urbain. Une liste montrant le territoire inclus dans chaque région urbaine tabulée est disponible du Monthly Employment,

and Labour Income Section. The reporting units not located in unincorporated urban area are included in county, provincial and totals.

Industrial Classification

All establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the largest net value added by these activities, or where not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not shifted from industry to industry each time its principal activity changes.

Statistics from the survey are based on the 1960 Standard Industrial Classification. A description of the various industries and a list of industries may be found in the "Standard Industrial Classification Manual", Catalogue 12-501 (1960). The "S.I.C. code" in the main tables refer to this manual. The tables contain a list of groupings not found in the Standard Industrial Classification. These include:

Industrial composite (031-899) - The sum of the industries included in the survey. (see Coverage)

Durable goods manufacturing (durable) - The sum of wood products (S.I.C. 250-259), furniture and fixtures (S.I.C. 260-269), primary metal industries (S.I.C. 290-298), metal fabricating industries (S.I.C. 300-309), machinery (except electrical) (S.I.C. 310-318), transportation equipment (S.I.C. 320-329), electrical products (S.I.C. 330-339), and non-metallic mineral products (S.I.C. 340-359).

Non-durable goods manufacturing (non-dur) - The sum of food and beverages (S.I.C. 100-147), tobacco processing and products (S.I.C. 150-153), rubber products (S.I.C. 160-169), leather products (S.I.C. 170-179), textile products (S.I.C. 180-229), knitting mills (S.I.C. 230-239), clothing (S.I.C. 240-249), paper and allied industries (S.I.C. 270-274), printing and publishing and allied industries (S.I.C. 280-289), petroleum and coal products (S.I.C. 360-369), chemicals and allied products (S.I.C. 370-379), and miscellaneous manufacturing industries (S.I.C. 380-399).

Contracting (404,421) - The sum of general contractors (S.I.C. 404) and special trade contractors (S.I.C. 421).

Engineering (406-409) - The sum of highway, bridge and other construction (S.I.C. 406) and other construction (S.I.C. 407-409).

In addition, the synthetic textile industry (201) is subdivided into spun yarn and fabrics (2011) and filament yarn and staple fibers (2012).

Employment data represent all employees on the payrolls of establishments in the reference period. The employee concept excludes owners or partners in unincorporated businesses, non-employees, the self-employed, unpaid family workers, persons on remunerative volunteer work, pensioners, home workers,

sur demande une liste indiquant le territoire compris dans chaque région urbaine en s'adressant à la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail. Les unités de déclaration situées ailleurs que dans une région urbaine retenue sont comprises dans les chiffres du comté, de la province et de la région.

Classification par activité économique

Tous les établissements appartiennent à une branche d'activité économique, qui est déterminée en fonction de leur activité principale. Si un établissement a plusieurs activités économiques, son activité principale est déterminée par la plus grande valeur nette ajoutée de ces activités, ou si cela n'est pas possible, par les recettes brutes au titre des différentes activités. Si un établissement exerce des activités très diverses, on ne le transfère pas nécessairement d'une branche à l'autre chaque fois que son activité principale change.

Les statistiques tirées de l'enquête sont fondées sur la Classification type des industries de 1960. On peut trouver une description des diverses activités économiques et groupes d'activités économiques dans le "Manuel de la classification type des industries", n° 12-501 au catalogue (1960). Les colonnes "code de la C.T.I." des principaux tableaux renvoient à ce manuel. Les tableaux renferment quelques groupements qui ne se trouvent pas dans la Classification type des industries. Ce sont:

Ensemble des industries (031-899) - l'ensemble des activités économiques visées par l'enquête. (voir Champ de l'enquête)

Manufactures, biens durables (durable) - l'ensemble de l'industrie des produits du bois (C.T.I. 250-259), de l'industrie des meubles et accessoires d'ameublement (C.T.I. 260-269), de l'industrie des métaux (formes primaires) (C.T.I. 290-298), de l'industrie des produits métalliques (C.T.I. 300-309), de l'industrie de la machinerie (sauf le matériel électrique) (C.T.I. 310-318), de l'industrie du matériel de transport (C.T.I. 320-329), de l'industrie des appareils et du matériel électriques (C.T.I. 330-339), et de l'industrie des produits minéraux non métalliques (C.T.I. 340-359).

Manufactures, biens non durables (non dur.) - L'ensemble de l'industrie des aliments et boissons (C.T.I. 100-147), de l'industrie du traitement et des produits du tabac (C.T.I. 150-153), de l'industrie des produits du caoutchouc (C.T.I. 160-169), de l'industrie des produits du cuir (C.T.I. 170-179), de l'industrie des produits du textile (C.T.I. 180-229), de l'industrie de la bonneterie (C.T.I. 230-239), de l'industrie du vêtement (C.T.I. 240-249), de l'industrie du papier et des produits connexes (C.T.I. 270-274) de l'imprimerie, de l'édition et des industries connexes (C.T.I. 280-289), de l'industrie du pétrole, du charbon et de leurs dérivés (C.T.I. 360-369), de l'industrie chimique et des produits connexes (C.T.I. 370-379) et des industries manufacturières diverses (C.T.I. 380-399).

Bâtiment (404, 421) - L'ensemble des entrepreneurs généraux (C.T.I. 404) et des entrepreneurs spécialisés (C.T.I. 421).

Genie civil (C.T.I. 406-409) - L'ensemble de la construction de routes, ponts et rues (C.T.I. 406) et des autres constructions (C.T.I. 407-409).

En outre, l'industrie des textiles synthétiques (201) est subdivisée en filés et tissus (2011) et en filés de filaments et fibres discontinues (2012).

Emploi

Les données sur l'emploi représentent tous les employés inscrits aux registres de paye des unités de déclaration au cours de la période de référence. Le concept d'employé exclut les propriétaires actifs ou partenaires d'entreprises non constituées en corporation, les membres des conseils d'administration qui ne travaillent pas dans l'entreprise, les travailleurs

and persons providing services to an establishment on the basis of a contract for services. Counted as employed, therefore, are all wage-earners and salaried employees who are paid for their services or are on paid absence during the reference period, except for casual employees working less than seven hours in the pay period. *Regular part-time* employees are treated as employed regardless of the number of hours worked during the pay period.

For example, an employee working for a part of the reference period and unemployed or on strike for the rest, is counted as employed. Employees not receiving pay for the entire reference period because of strike or as a consequence of a strike, or those persons on leave without pay, are not included among the employed.

Wage-earners

Wage-earners are defined by occupation rather than by the method of payment. They are those employees engaged in actual production and related operations, including maintenance, warehouse and delivery staffs, security staff, routemen, driver-salesmen, sales clerks in retail stores, waitresses, and working foremen performing functions similar to those of the employees whom they supervise, etc. Wage-earners may be paid a fixed monthly amount or on the basis of hours worked. The survey covers all wage-earners regardless of the method of payment and average weekly wages are computed for all. However, derivations of average weekly hours and average hourly earnings are based only upon data for wage-earners for whom hours data are available.

Salaried Employees

Salaried employees constitute executive, administrative, supervisory, technical and professional personnel, commission agents, and travelling salesmen directly responsible to the administration, as well as general office, clerical and related workers in the office and plant. In addition, working directors of incorporated businesses are included in this category.

Earnings

Earnings of wage-earners and salaried employees represent gross pay for the week, before deductions for taxes, unemployment insurance contributions, etc. Gross pay includes salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. The payroll concept does not include supplementary labour costs such as employers' contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or directors' fees.

The term "earnings" is used to denote the total of weekly wages of the wage-earners and salaries of the salaried employees. The publications prior to March 1971 contained this combined data entitled "Average Weekly Wages and Salaries". These data are comparable with "Average Weekly Earnings" of total employees in

autonomes, les travailleurs familiaux non rémunérés, les bénéficiaires de pensions, les travailleurs à domicile et les personnes fournissant des services à forfait ou sous contrat. Sont donc considérés comme employés tous les employés à salaire et tous les employés à traitement rémunérés pour leurs services ou qui sont en congé payé pendant la période de référence, à l'exception des occasionnels ayant travaillé moins de sept heures pendant la période de paye. Les *employés réguliers à temps partiel* sont comptés parmi les employés quel que soit le nombre d'heures travaillées pendant la période de paye.

Par exemple, une personne travaillant une partie de la période de référence et en chômage ou en grève le reste de la période, est comptée comme employée. Les employés qui ne sont pas rémunérés pendant la période de référence à cause d'une grève ou des conséquences d'une grève ou des personnes en congé sans paye ne figurent pas parmi les employés occupés.

Employés à salaire

L'employé à salaire est défini par la nature du travail plutôt que par le mode de rémunération. Les employés à salaire sont les employés effectivement engagés dans la production et dans des opérations connexes, y compris le personnel d'entretien, d'entrepôt et de livraison, le personnel de sécurité, les chauffeurs-livreurs, les vendeurs itinérants, les employés de magasins de détail, les serveuses et les contremaîtres remplissant des fonctions analogues à celles des employés dont ils ont la charge. Les employés à salaire peuvent être rémunérés sur une base mensuelle ou sur la base d'heures travaillées. L'enquête couvre tous les employés à salaire quel que soit leur mode de rémunération et les gains horaires moyens sont calculés pour tous. Toutefois, les heures hebdomadaires moyennes et les rémunérations horaires moyennes sont calculées à partir des données relatives aux employés à salaire dont on connaît le nombre d'heures de travail.

Employés à traitement

Les employés à traitement comprennent les directeurs, les administrateurs, les surveillants, les cadres techniques et spécialisés, les agents de commission, les voyageurs de commerce relevant directement de l'administration, ainsi que les employés de bureau, les commis et les assimilés, au bureau et à l'usine. Les membres des conseils d'administration d'entreprises constituées en corporation qui travaillent dans ces entreprises sont également compris dans cette catégorie.

Rémunération

Les rémunérations des employés à salaire et des employés à traitement représentent les gains bruts de la semaine, avant déductions d'impôt, de cotisations d'assurance-chômage, etc. La rémunération brute comprend les salaires, la rémunération au taux fixe, la rémunération du travail aux pièces et les commissions régulières sur le rendement, les primes de vie chère et autres gratifications régulières, les gains pour travail supplémentaire et les paiements aux personnes en congé payé pendant la semaine de l'enquête. La rémunération ne comprend pas les frais supplémentaires d'oeuvre tels que les cotisations de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie, à la caisse d'indemnités d'accidents de travail et à d'autres régimes de prévoyance; ni le coût du matériel, la valeur de la pension, les frais de déplacement, les indemnités de retraite, les versements à intervalles irréguliers et peu fréquents ni les jetons de présence des administrateurs.

Le terme "rémunérations" désigne l'ensemble des rémunérations des employés à salaire et des employés à traitement. Les publications antérieures à mars 1971 renfermaient des données réunies sous le titre "Weekly Wages and Salaries". Ces données sont comparables avec les "rémunérations hebdomadaires moyennes" de l'ensemble des

nt publication. The system now provides separate earnings all wage-earners and salaried employees whereas formerly "Average Weekly Wages" for hourly-rated wage-earners was

mbers

index numbers are calculated by dividing the current month's (or payroll) by the monthly-average of the total base employment (or payroll). The current employment consists of all reported by establishments that meet our size criteria in that period. Base year employment consists of the employment of establishments that had 20 or more employees in any month of the base year. The payroll index is calculated in a similar fashion.

Seasonally-adjusted index numbers remove from the employment figures those regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the true, and irregular components of the time series. The X-11 method of the U.S. Census Bureau is used to calculate the seasonally-adjusted index numbers; additional seasonally-adjusted figures may be found in "Employment, earnings and hours, seasonally-adjusted series January 1961 - December 1971" (Catalogue

The average weekly hours figure is obtained by dividing total hours by the number of wage-earners who worked those hours. Hourly earnings are obtained by dividing total weekly earnings by the number of wage-earners. Both figures apply only to the subset of wage-earners for whom hours are reported. It should be noted that total hours include hours actually worked and that the wage-earner total includes part-time wage-earners and casuals working more than seven hours in one week. Annual statistics are calculated from the monthly data, with the exception of those shown as (p); the latter are based on monthly averages.

Presentation

Each month, statistics for three months are prepared by the Employment, Payrolls and Labour Income Section. Data for the current month, are entitled first estimates. They are based on a limited number of returns (usually about 50%) and only preliminary figures are released in the Statistics Canada Daily Estimates table of this publication. Simultaneously, preliminary figures are prepared for the month immediately preceding the current data and third estimates for the month prior to that. The latter estimates are of higher quality than that of the first estimates, with a higher rate of returns (typically, 65% and 75%, respectively). Consequently full details for both months are shown in the present publication.

On completion of the third estimate, further revisions to the data are made to incorporate late returns and corrected information from our respondents or to rectify mechanical errors. Larger corrections are calculated immediately and appear in the historical tables and in column for the previous year in tables 2, 3 and 4 of the present publication. The smaller corrections are completed in the tables when all returns are retabulated to produce revised annual averages; these data are contained in catalogue 72-202.

en compte ici. Ce système permet maintenant d'avoir des données distinctes pour tous les employés à salaire et les employés à traitement tandis qu'autrefois on ne pouvait connaître que les "rémunérations hebdomadaires moyennes" des employés à salaire rémunérés à taux horaire.

Nombres-indices

On obtient les nombres-indices en divisant le nombre total d'employés (ou la rémunération) du mois courant par la moyenne mensuelle du nombre d'employés (ou de la rémunération) de l'année de base. Le nombre courant d'employés est l'ensemble des employés déclarés par les établissements dont la taille répond à notre critère pendant la période courante. Le nombre d'employés pour l'année de base est le nombre d'employés des établissements employant 20 employés ou plus pendant n'importe quel mois de l'année 1961. L'indice de la rémunération est calculé de la même manière.

La désaisonnalisation des nombres-indices a pour effet d'éliminer des indices de l'emploi les fluctuations qui se produisent à intervalles réguliers et qui s'appellent variations saisonnières. Les nombres-indices désaisonnalisés représentent donc assez bien la tendance, le cycle et les composantes irrégulières de la série chronologique. La variante X-11 de la méthode II du recensement des États-Unis est utilisée pour calculer les nombres-indices désaisonnalisés; on peut trouver d'autres séries désaisonnalisées dans "Emploi, rémunérations et heures, séries désaisonnalisées janvier 1961-décembre 1971" (n° 72-206 au catalogue).

Moyennes

On calcule les heures hebdomadaires moyennes en divisant le nombre total d'heures-hommes par le nombre d'employés à salaire qui ont fait ces heures. On obtient les rémunérations horaires moyennes en divisant la rémunération hebdomadaire totale des employés à salaire rémunérés à l'heure par le nombre total de leurs heures par semaine. Ces deux moyennes s'appliquent seulement aux employés à salaire dont le nombre d'heures est déclaré. À remarquer que le nombre total d'heures comprend les heures supplémentaires réelles et que le total des employés à salaire comprend les employés à salaire à temps partiel et les occasionnels qui travaillent plus de sept heures par semaine. À l'exception des statistiques provisoires (p), qui sont fondées sur les moyennes mensuelles, les statistiques annuelles sont établies à partir de l'ensemble des données mensuelles.

Présentation statistique

Chaque mois, la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail prépare des statistiques pour trois mois. Les données du premier mois, le mois le plus récent, sont appelées "premières estimations". Elles sont fondées sur un nombre limité de déclarations (environ 50%) et seuls des chiffres très généraux sont publiés dans Le Quotidien de Statistique Canada et dans le tableau "Premières estimations" de la présente publication. En même temps, la Section prépare des deuxième estimations pour le mois qui précède le mois le plus récent, et des troisième estimations pour le mois qui précède celui-là. Ces deux dernières estimations sont de meilleure qualité que les premières en raison de la disponibilité d'un plus grand nombre de réponses (d'habitude 65% pour les deuxième estimations et 75% pour les troisième). Par conséquent, la présente publication contient tous les détails pour ces deux mois.

Une fois terminées les troisième estimations, on effectue d'autres rectifications à la lumière des déclarations des retardataires et des corrections reçues de nos enquêtés, ou par suite de la correction de certaines erreurs mécaniques. Les corrections les plus importantes sont effectuées immédiatement; elles paraissent dans les tableaux chronologiques et spéciaux ainsi que dans la colonne de l'année précédente aux tableaux 2, 3 et 4 de la présente publication. Les corrections de moindre importance sont effectuées dans les tableaux annuels quand toutes les réponses ont été totalisées de nouveau en vue de la production de chiffres et de moyennes annuelles rectifiés; ces données sont publiées dans les publications 72-201 et 72-202.

Monthly ES - 1 A Report

EMPLOYMENT, PAYROLLS AND MANHOURS

for month of _____

Please type or use lead pencil.
Final mailing deadline is the
10th of the month. Earlier mail-
ing is appreciated.

Keep one copy for your files.
Do not write in shaded areas.

Directions are mailed separately;
extra copies are available on re-
quest.

Please make any necessary changes in above name or mailing address

1. If you had any employees drawing pay in the last period(s)
of the month indicated, please complete this report. If not, when do you expect to hire employees?

2. NUMBER OF FEMALE EMPLOYEES: (last pay period(s)
in month)

Wage-earners 001	Salaried employees 002	Total females 003
		004 (omit cents)

3. TOTAL PAYROLL(\$): Gross sum of all payments made at any time during the month that
constitute salaries and wages for income tax purposes (see directions) \$

4. PAYROLL DETAIL		WAGE-EARNERS (Non supervisory production, operational, maintenance, security, housekeeping, warehousing, transport, food service and similar staffs: include retail sales clerks)						SALARIED EMPLOYEES (executive, administrative, professional, technical, supervisory, office, clerical & related staffs)		
A. Data for the last pay period(s) in month only		Number of operating days plus paid holidays and days closed for vacations (see directions) (nearest day)		Wage-earners for whom hours data are available (include overtime hours worked)		Wage-earners for whom hours data are not available

PUBLICATIONS SUR L'EMPLOI ET LA RÉMUNÉRATION

Les publications suivantes de la Division du travail contiennent des données sur l'emploi, la rémunération et les heures de travail dans l'industrie, d'après le concept de l'établissement:

02 - Employment, Earnings and Hours, M. Angl.

(Indices de l'emploi et de la rémunération, par région et par activité économique; moyennes des gains et des rémunérations hebdomadaires, heures hebdomadaires moyennes et gains horaires moyens; comparaisons chronologiques; graphiques et notes explicatives).

05 - Estimations du Revenu du Travail; M. Bil.

(Estimations mensuelles, brutes et désaisonnalisées, des rémunérations et du revenu supplémentaire du travail, pour certaines activités économiques et certaines régions; avec totaux annuels pour une période de 10 ans).

08 - Estimations du nombre d'employés par province et par industrie, M. Bil.

(Estimations du nombre total d'employés; comparaisons avec les chiffres correspondants du mois précédent et de l'année précédente).

1 - Review of Employment and Average Weekly Wages and Salaries, A. Angl.

(Indices de l'emploi et de la rémunération et rémunérations hebdomadaires moyennes, par activité économique et par région: indices mensuels et annuels, pour une longue période; graphiques et notes explicatives).

2 - Review of Man-Hours and Hourly Earnings, A. Angl.

Heures hebdomadaires moyennes et rémunération horaire et hebdomadaire moyenne, par activité économique et par région, données mensuelles et annuelles, pour une longue période; graphiques et notes explicatives).

4 - Earnings and Hours of Work in Manufacturing, 1969, Angl.

(Données distinctes sur les gains et les heures de travail des hommes et des femmes, ouvriers et salariés, pour une semaine d'octobre, à partir de 1946, réparties par activité économique et par région; graphiques et notes explicatives. Des données spéciales sont obtenues par voie de rotation d'année en année).

5 - Indices de l'emploi désaisonnalisés. Janvier 1961 à décembre 1970, Bil.

(Indices de l'emploi, par activité économique et par région: non désaisonnalisés, facteurs finals de désaisonnalisation, désaisonnalisés et moyennes mobiles MDC; heures hebdomadaires moyennes et gains horaires moyens).

- Labour Income, 1926-1958 - épuisé, Angl.

(Estimations annuelles du revenu du travail, de 1926 à 1958, avec chiffres mensuels à partir de 1947; explications des sources, des méthodes et des concepts.)

- Estimations du nombre d'employés par province et par industrie, 1961-1968, Bil.

(Estimations du nombre total de salariés, par mois et par année, pour les principales divisions d'activité économique, Canada et provinces. Revue des concepts, des sources et des méthodes et indicateurs de la variabilité d'échantillonnage.)

- Coûts de la main-d'oeuvre dans l'industrie manufacturière, 1968, Bil.

- Coûts de la main-d'oeuvre au Canada-Mines, carrières et puits de pétrole, 1969, Bil.

(Publication annuelle couvrant diverses branches d'activité sur une base cyclique ou irrégulière. Estimations de certains coûts de main-d'oeuvre, par groupe d'activité économique et par région - Publication conjointe de la Division du travail de Statistique Canada et de la Direction de l'économie et des recherches du ministère du Travail du Canada).

- Gains et heures de travail au Canada - Commerce de détail, septembre 1970, Bil.

(Gains hebdomadaires moyens, gains horaires moyens et heures hebdomadaires moyennes des employés des deux sexes dans le commerce de détail, selon la situation, ("à plein temps", "à temps partiel et occasionnels" et rattachés au "siège social", pour le Canada, les provinces et certaines régions urbaines).

Outre les publications énumérées ci-dessus, Statistique Canada publie une grande variété de bulletins statistiques sur la situation économique et social du Canada. On peut se procurer gratuitement un catalogue complet des publications courantes en s'adressant à Statistique Canada, K1A 0T6.

EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

72-002 - Employment, Earnings and Hours, M., Engl.

(Industry and area index numbers of employment and payrolls, averages of weekly earnings, salaries and wages, of hours per week and hourly earnings; historical comparisons; charts and explanatory material).

72-005 - Estimates of Labour Income, M. Bil.

(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, specific industries and regions; with annual totals covering a 10 year period).

72-008 - Estimates of Employees by Province and Industry, M. Bil.

(Estimates of total numbers of employees, with comparisons with a month and a year earlier).

72-201 - Review of Employment and Average Weekly Wages and Salaries, A. Engl.

(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).

72-202 - Review of Man-Hours and Hourly Earnings, A. Engl.

(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, over a lengthy period; charts and explanatory material).

72-204 - Earnings and Hours of Work in Manufacturing, 1969 Engl.

(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one month from October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).

72-206 - Seasonally-adjusted Employment Indexes, January 1961 - December 1970, Bil.

(Industry and area index numbers of employment: unadjusted, final seasonal factors, seasonally-adjusted and moving average; average weekly hours and hourly earnings).

72-502 - Labour Income, 1926-58 - Out of print, Engl.

(A record of annual estimates of labour income from 1926 to 1958, along with monthly figures from 1947; contains explanations of sources, methods and concepts).

72-508 - Estimates of Employees by Province and Industry, 1961-68, Bil.

(Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and the United States; contains a review of concepts, sources and methods and indicators of sampling variability).

72-510 - Labour Costs in Manufacturing 1968, Bil.

72-511 - Labour Costs in Canada, Mines, Quarries and Oil Wells 1969, Bil.

(An annual publication covering various industries on a cycle or occasional basis. Estimates of selected Labour Costs, by industry group and area - Report prepared jointly by Labour Division of Statistics Canada, Economics and Research Branch of Labour Canada).

72-601 - Earnings and Hours of Work in Canada - Retail Trade Industry, September 1970, Bil.

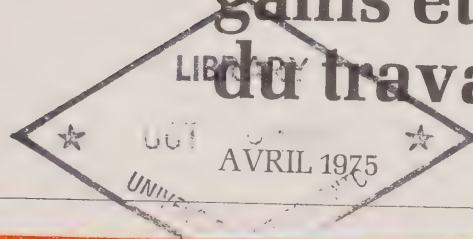

(Average Weekly Earnings, Average Hourly Earnings and Average Weekly Hours of Male and Female Employees in Retail Trade, by Employee Status i.e. "full-time", "part-time and casual" and "head office" employees for Canada, and selected urban areas).

In addition to the selected publications listed above, Statistics Canada publishes a wide range of statistical reports on Canadian economic and social affairs. A comprehensive catalogue of all current publications is available free on request from Statistics Canada, Ottawa (Canada), K1A 0T6.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- . . figures not available.
- . . . figures not appropriate or not applicable.
- nil or zero.
- — amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE

In addition, in this publication (except as otherwise noted), blanks in those columns where wage-earners and salaried employees data are shown separately indicate that representative data for wage-earners for whom hours are recorded are not available.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- . . nombres indisponibles.
- . . . n'ayant pas lieu de figurer.
- néant ou zéro.
- — nombres infimes.
- p nombres provisoires.
- r nombres rectifiés.
- x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

NOTA

On remarquera que, dans la présente publication (sauf i contraire) les colonnes laissées en blanc dans le cas des en traitement et des employés à salaire indiqués séparément, signifie données relatives aux employés pour lesquels les heures sont enreg sont pas disponibles.

COMMENTARY

First Estimates(1) - April 1975

Seasonally-adjusted, the first estimate of the Canada industrial index of employment (1961 = 100) showed a 0.1% rise from March to April. Employment increased in forestry, mining, insurance and real estate and service; trade showed no change and remaining industry divisions showed declines.

Unadjusted for seasonal variations, average weekly earnings in Canada composite level rose 1.7% to \$199.12. Gains occurred in all industry divisions except mining and in all five regions.

Preliminary Data(1) - March 1975

Employment - (Seasonally-adjusted)

Preliminary data for March 1975 showed a 0.4% decline in the industrial composite index of employment. Decreases were recorded in all industry divisions except forestry and transportation, communication and other utilities, which rose.

Employment in trade fell 0.9% from February to March. This reflected widespread losses in wholesale and retail, especially department stores. Service employment fell 1.0% in March as gains in personal and miscellaneous services more than offset rises in financial and business services.

Manufacturing showed a 0.3% decline as gains in motor vehicles were more than offset by widespread declines in both durable and non-durable goods. Mining employment showed a 2.0% loss as the increases in logging to industrial disputes more than offset gains in metals. The 0.9% drop in construction employment largely reflected decreases in the building component.

Employment in finance, insurance and real estate showed no change over the month as losses in insurance and real estate were offset by gains in financial institutions. Forestry employment rose 0.3% as the increases in logging in British Columbia and Quebec more than offset the declines in the Atlantic Region. The 0.3% rise in communication, communication and other utilities mainly reflected gains in transport and services and in utilities.

In the Atlantic Region, employment fell 0.2% as declines in New Brunswick and Prince Edward Island more than offset gains in Nova Scotia and Newfoundland. Decreases in employment were recorded in logging, fish products, department stores and hotels, and taverns. Somewhat offsetting gains occurred in metals, machinery and equipment and highway and bridge maintenance.

For more information on Statistical Presentation under Concepts and Methods, see the back of this publication.

The Industrial Composite is the sum of all industries with the exception of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, households and public administration and defence. All figures are based on returns received from employers having twenty (20) or more employees in any month of the year.

OBSERVATIONS

Premières estimations(1) - Avril 1975

La première estimation, désaisonnalisée, de l'indice composite(2) de l'emploi dans les activités économiques du Canada (1961 = 100) fait état d'une augmentation de 0.1% entre mars et avril. Des augmentations ont été enregistrées dans le forestage, les mines, les finances, les assurances et l'immeuble et les services; le commerce n'a affiché aucune variation et il y a eu une diminution dans les autres branches d'activité.

Les gains hebdomadaires moyens non désaisonnalisés ont augmenté de 1.7% en avril pour atteindre \$199.12 au niveau de l'ensemble du Canada. Des augmentations ont été enregistrées dans toutes les divisions d'activité économique à l'exception des mines, et dans toutes les régions.

Données provisoires(1) - Mars 1975

Emploi - (Chiffres désaisonnalisés)

Les données provisoires de mars 1975 révèlent une diminution de 0.4% de l'indice composite de l'emploi dans les activités économiques du Canada. Des baisses ont été enregistrées dans toutes les branches d'activité sauf dans le forestage et les transports, communications et autres services d'utilité publique où il y a eu une augmentation.

Dans le commerce, l'emploi a diminué de 0.9% de février à mars. Cette baisse s'explique par les pertes générales enregistrées dans le commerce de gros et de détail, en particulier dans les magasins à rayons. Dans le secteur des services, l'emploi a diminué de 1.0% en mars parce que les baisses dans les services personnels et divers ont plus que neutralisé les hausses dans les services récréatifs et extérieurs des entreprises.

Les industries manufacturières ont accusé une baisse de 0.3% car les baisses générales dans la fabrication des biens durables et non durables ont eu plus de poids que les hausses dans la fabrication des véhicules automobiles. Dans les mines, l'emploi a diminué de 2.0% car la baisse dans les mines de métaux a plus que compensé les gains dans les mines métalliques. La baisse de 0.9% de l'emploi dans la construction résulte en grande partie d'un ralentissement dans le secteur du bâtiment.

Dans les finances, les assurances et l'immeuble, la situation de l'emploi n'a guère changé par rapport au mois précédent, car les pertes dans les assurances et l'immeuble ont neutralisé les gains dans les établissements financiers. L'emploi a augmenté de 0.9% dans le forestage parce que les augmentations au niveau de l'abattage en Colombie-Britannique et au Québec ont été plus considérables que les baisses enregistrées dans la région de l'Atlantique. La hausse de 0.3% dans le secteur des transports, des communications et autres services d'utilité publique reflète surtout les gains enregistrés dans le transport par eau et les services auxiliaires ainsi que dans les services d'utilité publique.

Dans la région de l'Atlantique, le niveau de l'emploi a diminué de 0.2% car les baisses enregistrées au Nouveau-Brunswick et dans l'Île-du-Prince-Édouard ont plus que neutralisé les augmentations en Nouvelle-Écosse et à Terre-Neuve. La baisse de l'emploi a été ressentie dans l'abattage, les produits de la pêche, les magasins à rayons et les hôtels, restaurants et tavernes. Des hausses compensatrices ont été enregistrées dans l'industrie des métaux, le matériel de transport, l'entretien des routes et des ponts.

(1) Voir la note sur la présentation statistique sous la rubrique "Concepts et méthodes" à la fin de la présente publication.

(2) L'ensemble des industries comprend toutes les branches d'activité sauf l'agriculture, la pêche et le piégeage, l'éducation et les services connexes, les services d'hygiène et de bien-être, les organisations religieuses, les ménages privés et l'administration publique et la défense. Toutes les statistiques sont fondées sur les déclarations reçues des employeurs ayant vingt(20) employés ou plus à leur service au cours d'un mois quelconque de l'année.

The *Quebec* composite employment index fell 1.0% from February to March. Declines in asbestos owing to industrial disputes and widespread losses in non-durables manufacturing occasioned the largest portions of this decline. There were, in addition, reductions in employment in building and department stores. Employment rose in logging, railway transport and water transport and services.

In *Ontario*, the composite index of employment showed a slight rise in March. Increased employment in motor vehicles balanced reductions in employment in non-durables, department and variety stores, and business and personal services.

The industrial composite index of employment for the *Prairie Region* showed a 0.6% decline in March. Reductions in Alberta and Manitoba more than offset gains in Saskatchewan. Employment declined in both durables and non-durables manufacturing, in both building and engineering construction, and in business and personal services.

In *British Columbia*, employment at the industrial composite level rose 0.5% in March. Gains in logging and water transport and services more than offset declines in wholesale food, department stores, hotels, restaurants and taverns, and both durable and non-durable goods.

Earnings and Hours

Seasonally-adjusted, average weekly earnings rose 0.6% at the Canada industrial composite level in March. Gains were recorded in all industry divisions except construction and finance, insurance and real estate, and in all provinces except Quebec.

Unadjusted for seasonal variations, average weekly earnings for the Canada industrial composite rose 0.9% to \$195.82. All provinces contributed to the overall rise in the level of earnings.

In *forestry*, average weekly earnings jumped 5.8% to \$266.47 mainly reflecting increased hours worked in British Columbia.

Average weekly earnings in *mining*, rose from \$265.63 in February to \$271.91 in March mainly reflecting increased hourly earnings in metals and reduced employment - owing to industrial disputes - of lower-paid wage-earners in asbestos. Average weekly hours of hourly-rated wage-earners dropped from 40.8 to 40.6, while average hourly earnings rose 18 cents to \$6.20.

In *manufacturing*, average weekly earnings rose 0.8% to \$206.47. Widespread gains were recorded in both durables and non-durables. All provinces except Newfoundland showed increased earnings. Average weekly hours fell from 38.7 in February to 38.3 in March, while average hourly earnings rose from \$4.83 to \$4.92.

Average weekly earnings in *construction* dropped 2.2% in March to \$265.45. For the most part, this decline reflected a short work week in some areas owing to the Easter holiday. Average weekly hours dropped 6.2% in building and 10.8% in engineering. Average

Au *Québec*, l'indice composite de l'emploi a reculé de 1.0% février à mars. La baisse de production d'amiante en raison de congédiements et les pertes générales dans la fabrication de biens non durables ont été les principaux facteurs de cette diminution. L'emploi a en outre diminué dans le bâtiment et les magasins à rayons. Il y a eu accroissement de l'emploi dans l'abattage, le secteur du transport ferroviaire et le transport par eau et les services.

En *Ontario*, l'indice composite de l'emploi a affiché une augmentation en mars. La hausse de l'emploi dans la fabrication de véhicules automobiles a équilibré les baisses dans la fabrication de biens non durables, les magasins à rayons et les bazars, les services extérieurs des entreprises, industriels et personnels.

L'indice composite de l'emploi dans la *région des Prairies* enregistré une diminution de 0.6% en mars. Des baisses en Alberta et Manitoba ont plus que neutralisé les gains en Saskatchewan. L'emploi a régressé dans la fabrication des biens durables et non durables, le bâtiment et les travaux de génie civil, dans les services extérieurs des entreprises et personnels.

En *Colombie-Britannique*, l'indice composite de l'emploi s'est accru de 0.5% en mars. Des gains dans l'abattage, le transport par eau et les services ont plus que compensé les baisses dans le commerce de gros, les produits alimentaires, les magasins à rayons, hôtels, restaurants et dans la fabrication de biens durables et non durables.

Gains et heures de travail

Les gains hebdomadaires moyens désaisonnalisés au niveau de l'ensemble des activités économiques pour le Canada ont augmenté de 0.6% en mars. Des augmentations ont été enregistrées dans toutes les divisions d'activité sauf dans la construction et les finances, les assurances et l'immeuble, et dans toutes les provinces à l'exception du Québec.

Les gains hebdomadaires moyens non désaisonnalisés ont augmenté de 0.9% pour atteindre \$195.82 au niveau de l'ensemble du Canada. Les provinces ont contribué à l'augmentation générale du niveau des gains.

Dans le *forêtage*, les gains hebdomadaires moyens se sont élevés de 5.8% pour atteindre \$266.47 en raison surtout d'une augmentation des heures travaillées.

Dans les *mines*, les gains hebdomadaires moyens sont passés de \$265.63 en février à \$271.91 en mars par suite principalement d'une majoration des gains horaires dans les mines métalliques et d'une réduction de l'emploi consécutive à des conflits du travail chez les ouvriers non rémunérés des mines d'amiante. Le nombre moyen d'heures hebdomadaires travaillées par les employés à salaire (heures déclarées) a baissé de 40.8 à 40.6, tandis que les gains horaires moyens ont monté de \$4.83 à \$4.92.

Dans les *industries manufacturières*, les gains hebdomadaires moyens ont augmenté de 0.8% pour atteindre \$206.47. Des augmentations ont été enregistrées dans la fabrication des biens durables. Les gains ont augmenté dans toutes les provinces sauf en Nouvelle-Écosse. Le nombre moyen d'heures hebdomadaires est tombé de 38.7 en février à 38.3 en mars, alors que les gains horaires moyens sont passés de \$4.83 à \$4.92.

Dans la *construction*, les gains hebdomadaires moyens sont passés de \$265.45 en mars, ce qui représente une diminution de 2.2%. Ceci s'explique en grande partie par la semaine réduite de travail dans les régions à cause du congé de Pâques. La moyenne des heures hebdomadaires

earnings rose 6 cents to \$7.18 due to rises in the building
ent.

n transportation, communication and other utilities, average
earnings rose 0.4% in March mainly due to gains in communi-
nd utilities. Average weekly earnings in trade rose 1.8% to
mainly owing to rises in the retail component.

verage weekly earnings in finance, insurance and real estate
% in March mainly due to increases in insurance and real
hile the 1.3% increase in service was in all components.

Year-to-date

ent

he average of the monthly employment indexes for the first
nths of 1975, compared with the same period for 1974,
0.1% decline in the industrial composite employment index
da. Increases were recorded in all industry divisions except
nd manufacturing, which declined.

employment in forestry fell 5.6% over the year mainly reflect-
es in logging in New Brunswick and British Columbia. In
employment was up 1.6% as gains in iron and coal more than
es in asbestos and services incidental to mining.

st quarter manufacturing employment was down 4.9% from
period a year earlier with decreases being recorded in 13 out
or groups. Only machinery, printing and publishing, and
showed gains of more than two percent. Declines of ten per
ore were recorded in wood products, textile products,
nd fixtures, knitting mills and transportation equipment.

construction, employment was up 1.3% mainly reflecting
ier engineering as the remaining components showed little
ne 3.8% rise in transportation, communication and other
gely reflected rises in communication and utilities. Employe-
ne transportation component rose 1.5% over the year as
truck transport somewhat offset gains in air transport and
d urban transit.

employment in trade was up 2.9% reflecting widespread rises
wholesale and retail components, while the 4.7% rise in
urance and real estate was in both financial institutions and
nd real estate. Service employment was up 3.3% over the
omponents showed higher levels of employment with the
eing in business services.

average of data for the first three months of 1975,
with the same period for 1974, showed a 14.6% rise in
ekly earnings at the Canada industrial composite level. The
ns ranged from 11.7% in finance, insurance and real estate
forestry; the provincial advances ranged from 12.9% in
0.9% in Newfoundland and Prince Edward Island.

res a diminué de 6.2% dans le bâtiment et de 10.8% dans les travaux de
génie civil. Les gains horaires moyens se sont accrus de 6 cents pour
atteindre \$7.18 par suite de hausses dans le secteur du bâtiment.

*Dans les transports, communications et autres services d'utilité
publique*, les gains hebdomadaires moyens ont augmenté de 0.4% en mars
en raison surtout d'augmentations dans les communications et les services
d'utilité publique. Les gains hebdomadaires moyens dans le commerce ont
augmenté de 1.8% pour atteindre \$153.40 en raison surtout des hausses
enregistrées dans le commerce de détail.

Dans le secteur des finances, des assurances et de l'immeuble, les
gains hebdomadaires moyens ont progressé de 1.3% en mars en raison
surtout d'augmentations dans les assurances et l'immeuble, alors que la
hausse de 1.3% dans les services s'es fait sentir dans tous les secteurs.

Chiffres cumulés

Emploi

La moyenne des trois premiers mois de 1975 pour l'ensemble des
industries canadiennes a régressé de 0.1% par rapport à la période
correspondante de 1974. Des augmentations ont été enregistrées dans
toutes les divisions d'activité sauf dans le forestage et les industries
manufacturières où il y a eu diminution.

Dans le forestage, l'emploi a diminué de 5.6% par rapport à l'année
précédente en raison surtout des réductions dans l'abattage au Nouveau-
Brunswick et en Colombie-Britannique. Dans les mines, le niveau de
l'emploi a augmenté de 1.6% car les augmentations dans les mines de fer
et de charbon ont plus que compensé les pertes dans l'amiante et les
services miniers.

Pour le premier trimestre, le niveau de l'emploi dans les industries
manufacturières a régressé de 4.9% par rapport à la période correspondante
de 1974, des baisses ayant été observées dans 13 des 20 groupes d'activité.
Les seuls secteurs où l'augmentation a été supérieure à 2% ont été celui des
machines, de l'imprimerie et de l'édition, et des produits chimiques. Des
baisses de 10% et même davantage ont été enregistrées dans les produits
du bois, les produits textiles, les meubles et accessoires d'ameublement, la
bonneterie et le matériel de transport.

Dans la construction, l'emploi a augmenté de 1.3% en raison surtout
de hausses dans les autres travaux de génie civil car les autres éléments
n'ont pratiquement pas varié. L'augmentation de 3.8% dans les transports,
les communications et autres services d'utilité publique est attribuable en
majeure partie aux communications et aux services d'utilité publique. Dans
les transports, l'emploi a progressé de 1.5% par rapport à l'année précéden-
te car les baisses dans le transport par camion ont neutralisé quelque peu
les hausses dans le transport aérien et les services auxiliaires et dans le
transport urbain.

Le commerce a vu son emploi augmenter de 2.9% par suite
d'augmentations générales dans le commerce de gros et de détail, tandis
que la hausse de 4.7% dans les finances, les assurances et l'immeuble a été
concentrée dans les établissements financiers et les assurances et l'immeu-
ble. Dans les services, l'emploi s'est accru de 3.3% par rapport à l'année
précédente; tous les secteurs ont affiché un niveau d'emploi supérieur et en
particulier les services extérieurs des entreprises.

Gains

La moyenne du premier trimestre de 1975 pour l'ensemble des
industries au Canada a progressé de 14.6% par rapport à la période
correspondante de 1974 en ce qui concerne les gains hebdomadaires
moyens. Les augmentations se sont échelonnées entre 11.7% dans les
finances, les assurances et l'immeuble et 18.3% dans le forestage; au niveau
des provinces, les augmentations ont varié entre 12.9% en Ontario et 20.9%
à Terre-Neuve et dans l'Île-du-Prince-Édouard.

(1) First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

Note: 1. The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which wages were spent. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue 62-002. 3. The data in this table relate to average weekly wages of hourly-manufactured wage-earners only. Although this statistics is no longer tabulated as part of this survey, a special manual calculation has been made in order to retain this table because of its extensive usage. An approximation of this calculation can be obtained by multiplying average weekly hours by average hourly earnings, for a particular industry-area cell. - Nota: 1. Les salaires hebdomadaires courants ont trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des salaires hebdomadaires courants pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les salaires ont été dépensés. 2. Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no 62-002 au catalogue. 3. Les données de ce tableau ont trait aux salaires hebdomadaires moyens des employés à salaire (heures déclarées) seulement. Bien que cette statistique ne figure plus dans les tableaux tirés de la présente enquête, on a quand même fait un calcul spécial à la main en vue de maintenir ce tableau dont l'usage est très répandu. On peut obtenir une approximation de ce calcul en multipliant les heures hebdomadaires moyennes par la rémunération horaire moyenne pour un secteur particulier d'industrie-région.

TABLE 10. Average Weekly Earnings in Manufacturing in Current Dollars and Adjusted for Changes in the Consumer Price Index, for Canada

st estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de
larations.

1. The current weekly earnings relate to the last pay periods in the month, while the Consumer Price Index relates
o the beginning of the month. The current average of weekly earnings for any month is therefore adjusted in the
bove table by the Consumer Price Index for the following month as more representative of the period in which
arnings are spent. 2. For Consumer Price Index statistics, construction methods and component details, see
onthly report "Prices and Price Index" Catalogue 62-002. 3. This table relates to average weekly earnings of
ll employees. - Nota: 1. Les rémunérations hebdomadaires courantes se rapportent au début du mois. La moyenne des rémunérations
ebdomadaires courantes pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des
rix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les rémuné-
ations sont dépensées. 2. Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes
e construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no 62-002
Catalogue. 3. Ce tableau a trait à la rémunération hebdomadaire moyenne de tous les employés.

STATISTICAL DATA ON EMPLOYMENT, EARNINGS AND HOURS(1)
(based on the 1960 Standard Industrial Classification)

Continuous series from 1957 to date are available as follows:

Employment indexes (1961 = 100).

Average weekly earnings (formerly titled average weekly wages and salaries).

Average weekly hours and average hourly earnings of hourly-rated wage-earners.

Average weekly wages of hourly-rated wage-earners (available only for the period 1957-1970).

Number of employees and number of hourly-rated wage-earners (available on request basis only for periods prior to 1971).

1960

Monthly data were not published but are available on

Annual averages are shown in:

Review of Employment and Average Weekly Wages and Salaries, *Catalogue 72-201, 1957-67*; Review of Man Hours and Hourly Earnings, *Catalogue 72-202, 1957-67*.

1970

Employment Indexes, 1961-1964, for Canada and Ontario, for bridges and streets; engineering; construction; highway maintenance; transportation; and transportation, communication and other utilities. *Employment, Earnings and Hours, Catalogue 72-002, October 1971*.

Employment Indexes, 1965-1967, for Canada and Ontario, for bridges and streets; engineering; construction; highway maintenance; transportation; and transportation, communication and other utilities. *Catalogue 72-002, February 1968*.

Average Weekly Earnings, 1961-1969 for:

Transportation; Highway and bridge maintenance.

Region: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance.

Provinces: Transportation, communication and other utilities; Transportation.

Transportation, communication and other utilities; Transportation; Highway and bridge maintenance. *Catalogue 72-002, November 1971*.

Average Weekly Earnings, 1968-1970, for Canada, Ontario, for scientific and professional equipment; miscellaneous industries; non-durable goods; manufacturing; wholesale trade; industrial composite. *Catalogue 72-002, February 1972*.

Average Weekly Hours, Average Hourly Earnings, Average Wages of Hourly-rated Wage-earners - 1961-1967 for:

DONNÉES CHRONOLOGIQUES SUR L'EMPLOI, LES GAINS ET LA DURÉE DU TRAVAIL(1)
(fondées sur la Classification type des industries de 1960)

Les séries continues suivantes de 1957 jusqu'à aujourd'hui sont disponibles:

1. Indices de l'emploi (1961 = 100).
2. Gains hebdomadaires moyens.
3. Heures hebdomadaires moyennes et rémunération horaire moyenne des employés à salaire (heures déclarées).
4. Rémunération hebdomadaire moyenne des employés à salaire (heures déclarées) (disponibles pour la période 1957-1970 seulement).
5. Effectifs et nombre d'employés à salaire (heures déclarées) (disponibles sur demande seulement pour les périodes antérieures à 1971).

A. 1957-1960

Les données mensuelles n'ont pas été publiées mais sont disponibles sur demande.

Les moyennes annuelles figurent dans:

Review of Employment and Average Weekly Wages and Salaries, *n° 72-201 au catalogue, 1957-1967* Review of Man Hours and Hourly Earnings, *n° 72-202 au catalogue, 1957-1967*.

B. 1961-1970

Indices de l'emploi, 1961-1964, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir *Employment, Earnings and Hours, n° 72-002 au catalogue, octobre 1971*.

Indices de l'emploi, 1965-1967, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir le *n° 72-002 au catalogue, février 1968*.

Gains hebdomadaires moyens, 1961-1969, pour:

Canada: Transports; entretien des routes et des ponts.

Région de l'Atlantique: Transports, communications et autres services publics; transports; entretien des routes et des ponts.

Nouvelle-Ecosse: Transports, communications et autres services publics; transports.

Québec: Transports, communications et autres services publics; transports; entretien des routes et des ponts. *n° 72-002 au catalogue, novembre 1971*.

Gains hebdomadaires moyens, 1968-1970, Canada, Ontario et Toronto pour les instruments scientifiques et professionnels; les manufactures diverses; les biens non durables; les manufactures; le commerce de gros; le commerce; et l'ensemble des industries. Voir le *n° 72-002 au catalogue, février 1972*.

Heures hebdomadaires moyennes, Rémunération horaire moyenne, Gains hebdomadaires moyens des employés à salaire (heures déclarées), 1961-1967 for:

Canada: Highways, bridges and streets; Engineering; Construction.

Ontario: Highways, bridges and streets; Engineering; Construction; Highway and bridge maintenance. *Catalogue 72-002, June 1972.*

Average Weekly Hours, Average Hourly Earnings, Average Weekly Wages - 1961-1969 Canada - Atlantic Region - Quebec - for highway and bridge maintenance - Catalogue 72-002, December 1971.

All other available monthly and annual data for 1961-1964 are published in:

Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, Catalogue 72-504.

All other available monthly and annual data published for 1965 are in *Catalogue 72-201 and 72-202, 1957-1967.*

All other available monthly and annual data for 1966 are published in *Catalogue 72-201 and 72-202, 1966-1968.*

All other available monthly and annual data for 1967 are published in *Catalogue 72-201 and 72-202, 1967-1969.*

All other available monthly and annual data for 1968-1970 are published in *Catalogue 72-201 and 72-202, 1968-1970.*

C. 1971-1973

Employment indexes and average weekly earnings for 1973 for Canada, Atlantic Region, Nova Scotia and Halifax for department stores, retail trade, trade and industrial composite, Catalogue 72-002 July 1974.

Employment indexes, unadjusted and seasonally-adjusted, percent female, total employees, average weekly earnings from January 1973 to June 1974, for Canada and Quebec, for highway and bridge maintenance, transportation, communication and other utilities and industrial composite. Catalogue 72-002 September 1974.

Employment for salaried employees, wage-earners (all), wage-earners (hours reported), average weekly earnings for salaried employees and wage-earners (all), average weekly hours and average hourly earnings for wage-earners (hours reported) from January 1973 to June 1974 for highway and bridge maintenance. Catalogue 72-002 September 1974.

All other series are published in the monthly issues of *Catalogue 72-002 for 1971, 1972 and 1973.*

(1) The issues of the publications referred to in this list contain the latest available data for any given series. Data for these series shown in other issues of these publications may have since been revised.

Canada: Les routes, les ponts et les rues; le génie; la construction.

Ontario: Les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts. Voir le n° 72-002 au catalogue, juin 1972.

Heures hebdomadaires moyennes, rémunération horaire et gains hebdomadaires moyens - 1961-1969 Canada - Région de l'Atlantique - Québec - pour l'entretien des routes et des ponts - n° 72-002 au catalogue, décembre 1971.

Toutes les autres données mensuelles et annuelles disponibles pour 1961-1964 sont publiées dans:

Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, n° 72-504 au catalogue.

Toutes les autres données mensuelles et annuelles disponibles pour 1965 figurent dans les n°s 72-201 et 72-202 au catalogue, 1957-1967.

Toutes les autres données mensuelles et annuelles disponibles pour 1966 sont publiées dans les n°s 72-201 et 72-202 au catalogue, 1966-1968.

Toutes les autres données mensuelles et annuelles disponibles pour 1967 sont publiées dans les n°s 72-201 et 72-202 au catalogue, 1967-1969.

Toutes les autres données mensuelles et annuelles disponibles pour la période 1968-1970 sont publiées dans les n°s 72-201 et 72-202 au catalogue, 1968-1970.

C. 1971-1973

Indices de l'emploi et gains hebdomadaires moyens, 1973 pour la Région de l'Atlantique, Nouvelle-Ecosse et Halifax pour les commerces de détail, le commerce et l'ensemble des industries. Voir le n° 72-002 au catalogue, juillet 1974.

Indices de l'emploi, non désaisonnalisés et désaisonnalisés, pourcentage de femmes, le nombre d'employés, rémunération hebdomadaire et heures déclarées de janvier 1973 à juin 1974, pour Canada et Québec, pour les routes et ponts, transports, communication et autres industries publiques et l'ensemble des industries. Voir le n° 72-002 au catalogue, septembre 1974.

Nombre d'employés à traitement, ensemble des employés à salaire (heures déclarées), rémunération hebdomadaire et heures déclarées de janvier 1973 à juin 1974 pour Canada et Québec, pour l'entretien des routes et des ponts. Voir le n° 72-002 au catalogue, septembre 1974.

Toutes les autres séries sont publiées dans les bulletins mensuels de *Catalogue 72-002* pour les années 1971, 1972 et 1973.

(1) Les numéros des publications susmentionnées renferment les données disponibles pour toute série donnée. Les données de ces séries figurant dans d'autres numéros de ces publications peuvent avoir été rectifiées depuis.

CONCEPTS AND METHODS

Each month the Monthly Employment, Payrolls and Labour Section of the Labour Division, through a mail survey, collects data on employment, earnings and hours which are tabulated in the data in this report. Data which, prior to March 1971, were published separately in "Employment and Average Weekly Wages and Salaries" (Catalogue 72-002) and in "Man-Hours and Hourly Earnings" (Catalogue 72-003) have been combined in this report. The following notes explain the concepts and methods used in the survey.

Reporting Unit

The reporting unit is usually the establishment, that is, the industrial unit which is a separate operating entity capable of producing all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "mark-up" or "gross profit" as well as data on employment and earnings. For purposes of detailed geographic statistics, the Section requests that the reporting unit be a sub-establishment unit, though not capable of reporting all basic statistics, can report employment and payroll data for that particular location.

Generally, the survey covers larger companies only, that is, those having 20 or more employees in any month of the year. In all the establishments of a multi-establishment company are included if the company had 20 or more employees in total in any month of the year even though any single establishment may have had fewer employees.

Pay Period

Conceptually, the figures refer to the last seven days in the month. In practice, few establishments keep payroll records for precisely this period and establishments are therefore asked to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the figures are reduced to one week's proportion of the totals. The number of the fractions used in calculating these weekly equivalents is 5, 6 or 7, depending on the number of working days per week which the establishment operated in the pay period. The number of the fractions are the number of working days in the pay periods. For employees paid at annual or monthly rates, earnings are not affected by the number of working days in the pay period. Proportions are used to reduce the earnings to a weekly basis with regard to the length of the calendar month.

When a holiday, layoff or industrial dispute occurs in an establishment that reports a pay period that is different from the last week of the month, an adjustment is made to the data, if the layoff or dispute affects the two periods differently, so that the data accurately reflects the actual situation during the reference period.

Industries are covered by the survey, with the exceptions of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private households, public administration and defence. Because of the limitation of the survey to larger firms, there is somewhat uneven coverage of employment by industry as well as by province and urban area. The percentage of total employment covered depends on the proportion

CONCEPTS ET MÉTHODES

Chaque mois, la Section des Statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail de la Division du travail recueille, par voie d'enquête postale, des données sur l'emploi, les gains et les heures de travail, données qui sont ensuite publiées ici sous forme de tableaux. Les données qui, avant mars 1971, étaient publiées séparément dans "Employment and Average Weekly Wages and Salaries" (n° 72-002 au catalogue) et dans "Man-Hours and Hourly Earnings" (n° 72-003 au catalogue) sont regroupées ici. Les notes qui suivent expliquent les concepts et la méthodologie de l'enquête.

Unité de déclaration

L'unité de déclaration est ordinairement l'établissement, c'est-à-dire la plus petite unité constituant un ensemble d'exploitation séparé en mesure de déclarer tous les éléments de base relevant de la statistique des activités économiques, y compris les données sur les entrées et les sorties qui sont nécessaires pour calculer la "valeur ajoutée" ou la "majoration brute" ou le "bénéfice brut" ainsi que des données sur l'emploi et les rémunérations. Pour obtenir des statistiques géographiques détaillées, la Section demande souvent que l'unité de déclaration se situe à un niveau qui est en deça de celui de l'établissement, mais qui permet quand même d'obtenir des données sur l'emploi et les rémunérations à ce niveau, même si, par définition, ce niveau ne peut fournir toutes les statistiques de base.

En règle générale, l'enquête vise seulement les grandes entreprises, c'est-à-dire les entreprises employant 20 employés ou plus au cours de n'importe quel mois de l'année. Toutefois, tous les établissements d'une entreprise à établissements multiples sont pris en compte si l'entreprise emploie 20 employés ou plus, au total, au cours de n'importe quel mois de l'année, même si un de ces établissements peut n'avoir eu que quelques employés.

Période de référence

En théorie, l'enquête vise les chiffres des sept derniers jours des mois de référence. Vu qu'en pratique peu d'établissements tiennent des registres de paye pour cette période précise, on permet aux établissements de faire porter leurs chiffres sur la (ou les) dernière(s) période(s) de paye de chaque mois.

Si la période de paye visée dépasse une semaine, les chiffres sont réduits en conséquence. Les numérateurs des fractions utilisées pour calculer l'équivalent hebdomadaire sont 5, 6 ou 7, suivant le nombre de jours ouvrables par semaine où l'établissement a été en exploitation pendant la période de paye. Les dénominateurs des fractions sont le nombre de jours ouvrables des diverses périodes de paye. Dans le cas du personnel qui est rémunéré sur une base annuelle ou mensuelle et dont les gains ne sont pas touchés par le nombre de jours ouvrables au cours du mois, on utilise des proportions fixes pour ramener les gains sur une base hebdomadaire, sans tenir compte de la longueur du mois civil.

En cas de jour férié, de congédiement ou de conflit du travail dans un établissement dont la période de paye ne correspond pas aux sept derniers jours du mois, les données sont rectifiées lorsque l'effet du jour férié, du congédiement ou du conflit n'est pas le même sur les deux périodes, de manière que les données soient le reflet fidèle de la situation pendant la période de référence.

Champ de l'enquête

Toutes les branches d'activité économique sont prises en compte dans l'enquête, à l'exception de l'agriculture, de la pêche et du piégeage, de l'éducation et des services connexes, des services d'hygiène et de bien-être, des organismes religieux, des ménages et de l'administration publique et de la défense. Parce que l'enquête se limite aux grandes entreprises, le champ d'observation de l'emploi par branche d'activité, par province et par région urbaine manque quelque peu d'uniformité. Le

tion of larger to smaller establishments. This proportion varies considerably among industries. The following table shows annual employment as reported in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms plus supplementary surveys. Estimates of total employment are published in "Estimates of Employees by Province and Industry" (Catalogue 72-008).

pourcentage de l'emploi total qui est observé dépend du rapport d'établissements aux petits établissements. Cette proportion varie d'un établissement d'une branche à l'autre. Le tableau suivant indique le pourcentage annuel de l'emploi, tel qu'il ressort de l'enquête, en pourcentage estimatif de l'emploi total, ce dernier étant la somme des résultats de l'enquête sur l'emploi et la rémunération et des résultats d'une enquête d'échantillon auprès des petites entreprises ainsi que d'autres enquêtes supplémentaires. Des estimations du nombre total d'employés sont publiées sous le titre "Estimations du nombre d'employés par province et industrie" (n° 72-008 au catalogue).

Larger-Firm Survey Employment as a Percentage of Total Estimated Employment, by Industry Division, for Canada and Provinces, 1972 Annual Averages(1)

Emploi des grandes entreprises en tant que pourcentage de l'estimation de l'emploi total par branche d'activité pour le Canada et les provinces, moyennes annuelles de 1972(1)

- (1) Total estimated employment is derived by adding together data from the employment and payrolls survey of larger-firms and data from survey of smaller firms plus supplementary surveys. - L'estimation de l'emploi total est obtenue en additionnant les données de l'enquête sur l'emploi et la paie dans les grandes entreprises à celles d'une enquête par échantillonnage dans les petites entreprises et d'autres enquêtes supplémentaires.
- (2) Includes recreational, business, personal and miscellaneous services only; data has not been published previously. - Comprend seulement les services récréatifs, commerciaux, personnels et divers; ces données n'ont pas été publiées auparavant.
- (3) These percentages are small because non-commercial services including education and related services, health and welfare services, organizations and private households, are included in total estimated employment but are not part of the larger-firm employment survey. - Ces pourcentages sont petits parce que les services non commerciaux, y compris l'enseignement et les services connexes, la santé et les œuvres sociales, les organismes religieux et les ménages privés, sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.
- (4) Excludes non-commercial services and public administration and defence; data has not been published previously. - Ne comprend pas les services non commerciaux et l'administration publique et de la défense; ces données n'ont pas été publiées auparavant.
- (5) These percentages are smaller because both non-commercial services and public administration and defence are included in total estimated employment but are not part of the larger-firm employment survey. - Ces pourcentages sont plus petits parce que les services non commerciaux, l'administration publique et la défense nationale sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.
- (6) Data for forestry and construction by province are not available for periods more recent than 1970. Les données pour le forestage et la construction ne sont pas disponibles par province après l'année 1970.

Geographic Classification

Reporting units are assigned to a province, a county (as defined by the Census of Population) and, where applicable, to an urban area. Data for Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are aggregated in some tables to give statistics for the Atlantic Region. Similarly, data for Manitoba, Saskatchewan and Alberta are added together to provide totals for the Prairie Region. The Census of Population's "Metropolitan Area" definitions were used for the nineteen applicable urban areas. The definitions used for other urban areas are based on a labour market concept; the areas usually include the surrounding territory as well as the urban centre. A list showing the territory included in each tabulated urban area is available from the Monthly Employment,

Classification géographique

Les unités de déclaration sont affectées à une province, (selon la définition établie par le recensement de la population) à un lieu, à une région urbaine. Les données de Terre-Neuve, du Prince-Édouard, de la Nouvelle-Écosse et du Nouveau-Brunswick sont agrégées dans certains tableaux présentant des statistiques pour la région de l'Atlantique. De la même manière, les données du Manitoba, de la Saskatchewan et de l'Alberta sont additionnées pour former les totaux pour la région des Prairies. On a retenu la définition de "région métropolitaine" pour les dix-neuf régions urbaines applicables. Les définitions employées pour les autres régions urbaines sont fondées sur le concept du marché du travail; les régions urbaines incluent généralement le territoire avoisinant avec le centre urbain. On

and Labour Income Section. The reporting units not located in the unincorporated urban area are included in county, provincial and totals.

Industrial Classification

All establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the largest net value added by these activities, or where not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not shifted from industry to industry each time its principal activity changes.

Statistics from the survey are based on the 1960 Standard Industrial Classification. A description of the various industries and their principal activities may be found in the "Standard Industrial Classification Manual", Catalogue 12-501 (1960). The "S.I.C. code" in the main tables refer to this manual. The tables contain a few changes not found in the Standard Industrial Classification.

Industrial composite (031-899) - The sum of the industries included in the survey. (see Coverage)

Durable goods manufacturing (durable) - The sum of wood products (S.I.C. 250-259), furniture and fixtures (S.I.C. 260-269), primary metal industries (S.I.C. 290-298), metal fabricating industries (S.I.C. 300-309), machinery (except electrical) (S.I.C. 310-318), transportation equipment (S.I.C. 320-329), electrical products (S.I.C. 330-339), and non-metallic mineral products (S.I.C. 340-359).

Non-durable goods manufacturing (non-dur) - The sum of food and beverages (S.I.C. 100-147), tobacco processing and products (S.I.C. 150-153), rubber products (S.I.C. 160-169), leather products (S.I.C. 170-179), textile products (S.I.C. 180-229), knitting mills (S.I.C. 230-239), clothing (S.I.C. 240-249), paper and allied industries (S.I.C. 270-274), printing and publishing and allied industries (S.I.C. 280-289), petroleum and coal products (S.I.C. 360-369), chemicals and allied products (S.I.C. 370-379), and miscellaneous manufacturing industries (S.I.C. 380-399).

Building (404,421) - The sum of general contractors (S.I.C. 1500-1599) and special trade contractors (S.I.C. 421).

Engineering (406-409) - The sum of highway, bridge and other construction (S.I.C. 406) and other construction (S.I.C. 407-409).

In addition, the synthetic textile industry (201) is subdivided into spun yarn and fabrics (2011) and filament yarn and staple fibers (2012).

Employment data represent all employees on the payrolls of establishments in the reference period. The employee concept excludes owners or partners in unincorporated businesses, non-employees, the self-employed, unpaid family workers, persons

sur demande une liste indiquant le territoire compris dans chaque région urbaine en s'adressant à la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail. Les unités de déclaration situées ailleurs que dans une région urbaine retenue sont comprises dans les chiffres du comté, de la province et de la région.

Classification par activité économique

Tous les établissements appartiennent à une branche d'activité économique, qui est déterminée en fonction de leur activité principale. Si un établissement a plusieurs activités économiques, son activité principale est déterminée par la plus grande valeur nette ajoutée de ces activités, ou si cela n'est pas possible, par les recettes brutes au titre des différentes activités. Si un établissement exerce des activités très diverses, on ne le transfère pas nécessairement d'une branche à l'autre chaque fois que son activité principale change.

Les statistiques tirées de l'enquête sont fondées sur la Classification type des industries de 1960. On peut trouver une description des diverses activités économiques et groupes d'activités économiques dans le "Manuel de la classification type des industries", n° 12-501 au catalogue (1960). Les colonnes "code de la C.T.I." des principaux tableaux renvoient à ce manuel. Les tableaux renferment quelques groupements qui ne se trouvent pas dans la Classification type des industries. Ce sont:

Ensemble des industries (031-899) - l'ensemble des activités économiques visées par l'enquête. (voir Champ de l'enquête)

Manufactures, biens durables (durable) - l'ensemble de l'industrie des produits du bois (C.T.I. 250-259), de l'industrie des meubles et accessoires d'ameublement (C.T.I. 260-269), de l'industrie des métaux (formes primaires) (C.T.I. 290-298), de l'industrie des produits métalliques (C.T.I. 300-309), de l'industrie de la machinerie (sauf le matériel électrique) (C.T.I. 310-318), de l'industrie du matériel de transport (C.T.I. 320-329), de l'industrie des appareils et du matériel électriques (C.T.I. 330-339), et de l'industrie des produits minéraux non métalliques (C.T.I. 340-359).

Manufactures, biens non durables (non dur.) - L'ensemble de l'industrie des aliments et boissons (C.T.I. 100-147), de l'industrie du traitement et des produits du tabac (C.T.I. 150-153), de l'industrie des produits du caoutchouc (C.T.I. 160-169), de l'industrie des produits du cuir (C.T.I. 170-179), de l'industrie des produits du textile (C.T.I. 180-229), de l'industrie de la bonneterie (C.T.I. 230-239), de l'industrie du vêtement (C.T.I. 240-249), de l'industrie du papier et des produits connexes (C.T.I. 270-274) de l'imprimerie, de l'édition et des industries connexes (C.T.I. 280-289), de l'industrie du pétrole, du charbon et de leurs dérivés (C.T.I. 360-369), de l'industrie chimique et des produits connexes (C.T.I. 370-379) et des industries manufacturières diverses (C.T.I. 380-399).

Bâtiment (404, 421) - L'ensemble des entrepreneurs généraux (C.T.I. 404) et des entrepreneurs spécialisés (C.T.I. 421).

Genie civil (C.T.I. 406-409) - L'ensemble de la construction de routes, ponts et rues (C.T.I. 406) et des autres constructions (C.T.I. 409).

En outre, l'industrie des textiles synthétiques (201) est subdivisée en filés et tissus (2011) et en filés de filaments et fibres discontinues (2012).

Emploi

Les données sur l'emploi représentent tous les employés inscrits aux registres de paye des unités de déclaration au cours de la période de référence. Le concept d'employé exclut les propriétaires actifs ou partenaires d'entreprises non constituées en corporation, les membres des conseils

doing non-remunerative volunteer work, pensioners, home workers, and persons providing services to an establishment on the basis of a contract for services. Counted as employed, therefore, are all wage-earners and salaried employees who are paid for their services or are on paid absence during the reference period, except for casual employees working less than seven hours in the pay period. *Regular part-time* employees are treated as employed regardless of the number of hours worked during the pay period.

For example, an employee working for a part of the reference period and unemployed or on strike for the rest, is counted as employed. Employees not receiving pay for the entire reference period because of strike or as a consequence of a strike, or those persons on leave without pay, are not included among the employed.

Wage-earners

Wage-earners are defined by occupation rather than by the method of payment. They are those employees engaged in actual production and related operations, including maintenance, warehouse and delivery staffs, security staff, routemen, driver-salesmen, sales clerks in retail stores, waitresses, and working foremen performing functions similar to those of the employees whom they supervise, etc. Wage-earners may be paid a fixed monthly amount or on the basis of hours worked. The survey covers all wage-earners regardless of the method of payment and average weekly wages are computed for all. However, derivations of average weekly hours and average hourly earnings are based only upon data for wage-earners for whom hours data are available.

Salaried Employees

Salaried employees constitute executive, administrative, supervisory, technical and professional personnel, commission agents, and travelling salesmen directly responsible to the administration, as well as general office, clerical and related workers in the office and plant. In addition, working directors of incorporated businesses are included in this category.

Earnings

Earnings of wage-earners and salaried employees represent gross pay for the week, before deductions for taxes, unemployment insurance contributions, etc. Gross pay includes salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. The payroll concept does not include supplementary labour costs such as employers' contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or directors' fees.

The term "earnings" is used to denote the total of weekly wages of the wage-earners and salaries of the salaried employees. The publications prior to March 1971 contained this combined data entitled "Average Weekly Wages and Salaries". These data are comparable with "Average Weekly Earnings" of total employees in

d'administration qui ne travaillent pas dans l'entreprise, les travailleurs autonomes, les travailleurs familiaux non rémunérés, les bénéficiaires de pensions, les travailleurs à domicile et les personnes fournissant des services à forfait ou sous contrat. Sont donc considérés comme employés tous les employés à salaire et tous les employés à traitement rémunérés pour leurs services ou qui sont en congé payé pendant la période de référence, à l'exception des occasionnels ayant travaillé moins de sept heures pendant la période de paye. Les *employés réguliers à temps partiel* sont comptés parmi les employés quel que soit le nombre d'heures travaillées pendant la période de paye.

Par exemple, une personne travaillant une partie de la période de référence et en chômage ou en grève le reste de la période, est comptée comme employée. Les employés qui ne sont pas rémunérés pendant la période de référence à cause d'une grève ou des conséquences d'une grève ou les personnes en congé sans paye ne figurent pas parmi les employés occupés.

Employés à salaire

L'employé à salaire est défini par la nature du travail plutôt que par le mode de rémunération. Les employés à salaire sont les employés engagés dans la production et dans des opérations assimilées, y compris le personnel d'entretien, d'entrepôt et de livraison, le personnel de sécurité, les chauffeurs-livriers, les vendeurs itinérants, les employés des magasins de détail, les serveuses et les contremaîtres remplissant des fonctions analogues à celles des employés dont ils ont la charge. Les employés à salaire peuvent être rémunérés sur une base mensuelle ou hebdomadaire suivant le nombre d'heures travaillées. L'enquête couvre tous les employés à salaire quel que soit leur mode de rémunération et les gains hebdomadaires moyens sont calculés pour tous. Toutefois, les heures hebdomadaires moyennes et les rémunérations horaires moyennes sont calculées à partir des données relatives aux employés à salaire dont on connaît le nombre d'heures de travail.

Employés à traitement

Les employés à traitement comprennent les directeurs, les administrateurs, les surveillants, les cadres techniques et spécialisés, les agents de commission, les voyageurs de commerce relevant directement de l'administration, ainsi que les employés de bureau, les commis et les employés assimilés, au bureau et à l'usine. Les membres des conseils d'administration d'entreprises constituées en corporation qui travaillent dans l'usine sont également compris dans cette catégorie.

Rémunération

Les rémunérations des employés à salaire et des employés à traitement représentent les gains bruts de la semaine, avant déductions d'impôt, de cotisations d'assurance-chômage, etc. La rémunération brute comprend les salaires, la rémunération au taux ou à la pièce, la rémunération du travail aux pièces et les commissions régulières, au rendement, les primes de vie chère et autres gratifications régulières, les gains pour travail supplémentaire et les paiements aux personnes en congé payé pendant la semaine de l'enquête. La rémunération ne comprend pas les frais supplémentaires d'œuvre tels que les cotisations de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie, à la caisse d'indemnités d'accidents de travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur de la pension, les paiements de nature, les frais de déplacement, les indemnités de retraite, les versements à intervalles irréguliers et peu fréquents ni les jetons de présence des administrateurs.

Le terme "rémunérations" désigne l'ensemble des rémunérations des employés à salaire et des employés à traitement. Les publications antérieures à mars 1971 renfermaient des données réunies sous le titre "Average Weekly Wages and Salaries". Ces données sont comparables aux "rémunérations hebdomadaires moyennes" de l'ensemble des em

ent publication. The system now provides separate earnings for all wage-earners and salaried employees whereas formerly "Average Weekly Wages" for hourly-rated wage-earners was.

Numbers

Index numbers are calculated by dividing the current month's employment (or payroll) by the monthly-average of the total base employment (or payroll). The current employment consists of all employment reported by establishments that meet our size criteria in the current period. Base year employment consists of the employment of establishments that had 20 or more employees in any month of the base year. The payroll index is calculated in a similar fashion.

Seasonally-adjusted index numbers remove from the employment index those regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the underlying, and irregular components of the time series. The X-11 method of the U.S. Census Bureau is used to calculate the seasonally-adjusted index numbers; additional seasonally-adjusted index numbers may be found in "Employment, earnings and hours, seasonally-adjusted series January 1961 - December 1971" (Catalogue

The average weekly hours figure is obtained by dividing total hours by the number of wage-earners who worked those hours. Hourly earnings are obtained by dividing total weekly earnings by the number of wage-earners by their total weekly hours. Both averages apply only to the subset of wage-earners for whom earnings are reported. It should be noted that total hours include hours actually worked and that the wage-earner total includes part-time wage-earners and casuals working more than seven hours in one week. Annual statistics are calculated from the monthly data, with the exception of those shown as (p); the latter are based on monthly averages.

Presentation

For each month, statistics for three months are prepared by the Employment, Payrolls and Labour Income Section. Data for the most current month, are entitled first estimates. They are based on a limited number of returns (usually about 50%) and only preliminary figures are released in the Statistics Canada Daily Release table of this publication. Simultaneously, preliminary estimates are prepared for the month immediately preceding the current data and third estimates for the month prior to that. The latter estimates are of higher quality than that of the first estimates, the higher rate of returns (typically, 65% and 75%, respectively). Consequently full details for both months are shown in the publication.

After completion of the third estimate, further revisions to the data are made to incorporate late returns and corrected information from our respondents or to rectify mechanical errors. Larger corrections are calculated immediately and appear in the historical tables and in column for the previous year in tables 2, 3 and 4 of the publication. The smaller corrections are completed in the tables when all returns are retabulated to produce revised annual averages; these data are contained in catalogue

(72-202).

en compte ici. Ce système permet maintenant d'avoir des données distinctes pour tous les employés à salaire et les employés à traitement tandis qu'autrefois on ne pouvait connaître que les "rémunérations hebdomadaires moyennes" des employés à salaire rémunérés à taux horaire.

Nombres-indices

On obtient les nombres-indices en divisant le nombre total d'employés (ou la rémunération) du mois courant par la moyenne mensuelle du nombre d'employés (ou de la rémunération) de l'année de base. Le nombre courant d'employés est l'ensemble des employés déclarés par les établissements dont la taille répond à notre critère pendant la période courante. Le nombre d'employés pour l'année de base est le nombre d'employés des établissements employant 20 employés ou plus pendant n'importe quel mois de l'année 1961. L'indice de la rémunération est calculé de la même manière.

La désaisonnalisation des nombres-indices a pour effet d'éliminer des indices de l'emploi les fluctuations qui se produisent à intervalles réguliers et qui s'appellent variations saisonnières. Les nombres-indices désaisonnalisés représentent donc assez bien la tendance, le cycle et les composantes irrégulières de la série chronologique. La variante X-11 de la méthode II du recensement des Etats-Unis est utilisée pour calculer les nombres-indices désaisonnalisés; on peut trouver d'autres séries désaisonnalisées dans "Emploi, rémunérations et heures, séries désaisonnalisées janvier 1961-décembre 1971" (n° 72-206 au catalogue).

Moyennes

On calcule les heures hebdomadaires moyennes en divisant le nombre total d'heures-hommes par le nombre d'employés à salaire qui ont fait ces heures. On obtient les rémunérations horaires moyennes en divisant la rémunération hebdomadaire totale des employés à salaire rémunérés à l'heure par le nombre total de leurs heures par semaine. Ces deux moyennes s'appliquent seulement aux employés à salaire dont le nombre d'heures est déclaré. À remarquer que le nombre total d'heures comprend les heures supplémentaires réelles et que le total des employés à salaire comprend les employés à salaire à temps partiel et les occasionnels qui travaillent plus de sept heures par semaine. À l'exception des statistiques provisoires (p), qui sont fondées sur les moyennes mensuelles, les statistiques annuelles sont établies à partir de l'ensemble des données mensuelles.

Présentation statistique

Chaque mois, la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail prépare des statistiques pour trois mois. Les données du premier mois, le mois le plus récent, sont appelées "premières estimations". Elles sont fondées sur un nombre limité de déclarations (environ 50%) et seuls des chiffres très généraux sont publiés dans Le Quotidien de Statistique Canada et dans le tableau "Premières estimations" de la présente publication. En même temps, la Section prépare des deuxième estimations pour le mois qui précède le mois le plus récent, et des troisième estimations pour le mois qui précède celui-là. Ces deux dernières estimations sont de meilleure qualité que les premières en raison de la disponibilité d'un plus grand nombre de réponses (d'habitude 65% pour les deuxième estimations et 75% pour les troisième). Par conséquent, la présente publication contient tous les détails pour ces deux mois.

Une fois terminées les troisième estimations, on effectue d'autres rectifications à la lumière des déclarations des retardataires et des corrections reçues de nos enquêtés, ou par suite de la correction de certaines erreurs mécaniques. Les corrections les plus importantes sont effectuées immédiatement; elles paraissent dans les tableaux chronologiques et spéciaux ainsi que dans la colonne de l'année précédente aux tableaux 2, 3 et 4 de la présente publication. Les corrections de moindre importance sont effectuées dans les tableaux annuels quand toutes les réponses ont été totalisées de nouveau en vue de la production de chiffres et de moyennes annuelles rectifiés; ces données sont publiées dans les publications 72-201 et 72-202.

Monthly ES - 1A Report

EMPLOYMENT, PAYROLLS AND MANHOURS

for month of _____

Please type or use lead pencil.
Final mailing deadline is the
10th of the month. Earlier mail-
ing is appreciated.

Keep one copy for your files.

Do not write in shaded areas.

Directions are mailed separately;
extra copies are available on re-
quest.

Please make any necessary changes in above name or mailing address

1. If you had any employees drawing pay in the last period(s)
of the month indicated, please complete this report. If not, when do you expect to hire employees?

2. NUMBER OF FEMALE EMPLOYEES: (last pay period(s) in month)

Wage-earners 001	Salaried employees 002	Total females 003
		004 (omit cents)

3. TOTAL PAYROLL(S): Gross sum of all payments made at any time during the month that
constitute salaries and wages for income tax purposes (see directions) \$

4. PAYROLL DETAIL		WAGE-EARNERS (Non supervisory production, operational, maintenance, security, housekeeping, warehousing, transport, food service and similar staffs: include retail sales clerks)						SALARIED EMPLOYEES (executive, administrative, professional, technical, supervisory, office, clerical & related staffs)		
A. Data for the last pay period(s) in month only		Number of operating days plus paid holidays and days closed for vacations (see directions) (nearest day)		Wage-earners for whom hours data are available (include overtime hours worked)		Wage-earners for whom hours data are not available				
Give inclusive dates From To		During entire pay period	During last seven days of month	Number of employees	Hours worked and hours of paid absence	Gross pay (omit cents) \$	Number of employees	Gross pay (omit cents) \$	Number of employees	Gross pay (omit cents) \$
REGULAR EMPLOYEES Full & Part time	Monthly	010	011	012	013	014	015	016	017	018
	Semi-monthly	020	021	022	023	024	025	026	027	028

EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

72-002 - Employment, Earnings and Hours, M., Engl.

(Industry and area index numbers of employment and payrolls, averages of weekly earnings, salaries and wages, and of hours per week and hourly earnings; historical comparisons; charts and explanatory material).

72-005 - Estimates of Labour Income, M. Bil.

(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, specific industries and regions; with annual totals covering a 10 year period).

72-008 - Estimates of Employees by Province and Industry, M. Bil.

(Estimates of total numbers of employees, with comparisons with a month and a year earlier).

72-201 - Review of Employment and Average Weekly Wages and Salaries, A. Engl.

(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).

72-202 - Review of Man-Hours and Hourly Earnings, A. Engl.

(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, over a lengthy period; charts and explanatory material).

72-204 - Earnings and Hours of Work in Manufacturing, 1969 Engl.

(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week ending October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).

72-206 - Seasonally-adjusted Employment Indexes, January 1961 - December 1970, Bil.

(Industry and area index numbers of employment: unadjusted, final seasonal factors, seasonally-adjusted and moving average; average weekly hours and hourly earnings).

72-502 - Labour Income, 1926-58 - Out of print, Engl.

(A record of annual estimates of labour income from 1926 to 1958, along with monthly figures from 1947; contains explanations of sources, methods and concepts).

72-508 - Estimates of Employees by Province and Industry, 1961-68, Bil.

(Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).

72-510 - Labour Costs in Manufacturing 1968, Bil.

72-511 - Labour Costs in Canada, Mines, Quarries and Oil Wells 1969, Bil.

(An annual publication covering various industries on a cycle or occasional basis. Estimates of selected employment, Labour Costs, by industry group and area - Report prepared jointly by Labour Division of Statistics Canada and Economics and Research Branch of Labour Canada).

72-601 - Earnings and Hours of Work in Canada - Retail Trade Industry, September 1970, Bil.

(Average Weekly Earnings, Average Hourly Earnings and Average Weekly Hours of Male and Female Employees in Retail Trade, by Employee Status i.e. "full-time", "part-time and casual" and "head office" employees for Canada, provinces and selected urban areas).

In addition to the selected publications listed above, Statistics Canada publishes a wide range of statistical reports on Canadian economic and social affairs. A comprehensive catalogue of all current publications is available free on request from Statistics Canada, Ottawa (Canada), K1A 0T6.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- . . figures not available.
- . . . figures not appropriate or not applicable.
- nil or zero.
- - amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE

In addition, in this publication (except as otherwise noted), blanks in those columns where wage-earners and salaried employees data are shown separately indicate that representative data for wage-earners for whom hours are recorded are not available.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- . . nombres indisponibles.
- . . . n'ayant pas lieu de figurer.
- néant ou zéro.
- - nombres infimes.
- p nombres provisoires.
- r nombres rectifiés.
- x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

NOTA

On remarquera que, dans la présente publication (sauf à contraire) les colonnes laissées en blanc dans le cas des em- traitement et des employés à salaire indiqués séparément, signifient données relatives aux employés pour lesquels les heures sont enreg- sont pas disponibles.

COMMENTARY

First Estimates(1) – May 1975

Seasonally-adjusted, the first estimate of the Canada industrial composite(2) index of employment (1961 = 100) showed a 0.7% rise from April to May. Employment increased in all industry divisions, forestry and mining, and in all five regions.

Unadjusted for seasonal variations, average weekly earnings rose 0.7% in May to \$200.04 at the Canada composite level. Gains were recorded in all industry divisions, except forestry, and in all regions except the Atlantic Region.

Preliminary Date(1) – April 1975

Employment (Seasonally-adjusted)

Preliminary data for April 1975 showed a 0.3% decline in the industrial composite index of employment. Decreases in mining, construction, and transportation, communication and utilities more than offset increases in the remaining industry divisions.

Employment in manufacturing fell 0.9% from March to April. Decreases were recorded in many components in both durables and non-durables; the largest were in paper and allied industries and food products. Industrial disputes in water transport and services, post office, plus declines in railway transport, highway and maintenance and electric power occasioned most of the 1.2% decline in employment in transportation, communication and other services in April. Employment in construction fell 0.9% largely due to declines in the engineering component.

Employment rose 0.4% due to gains in food stores, department stores and retail stores. The 0.7% rise in finance, insurance and real estate was due to gains in financial institution and insurance and real estate. Service employment was up 0.3% as gains in business and personal services more than offset declines in recreational and miscellaneous services. The 2.2% rise in mining was largely in mineral fuels, while the 2.2% increase in forestry largely reflected increases in New Brunswick and Ontario.

In the Atlantic Region, employment rose 0.7% in April. Gains were recorded in logging and forestry services, fish products, retail trade, hotels, restaurants and taverns.

For more information on Statistical Presentation under Concepts and Methods, see the back of this publication.

The Industrial Composite is the sum of all industries with the exception of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, government, households and public administration and defence. All figures are based on returns received from employers having 20 or more employees in any month of the year.

OBSERVATIONS

Premières estimations(1) – Mai 1975

La première estimation désaisonnalisée de l'indice composite(2) de l'emploi dans les activités économiques du Canada (1961 = 100) fait état d'une augmentation de 0.7% entre avril et mai 1975. Le niveau de l'emploi a augmenté dans toutes les divisions d'activité économique, sauf le forage et les mines, et dans les cinq régions du pays.

Les gains hebdomadaires moyens non désaisonnalisés ont augmenté de 0.8% en mai pour atteindre \$200.04 au niveau de l'ensemble du Canada. Toutes les divisions d'activité économique à l'exception du forage, et toutes les régions à l'exception de celle de l'Atlantique ont contribué à cette augmentation.

Données provisoires(1) – Avril 1975

Emploi (chiffres désaisonnalisés)

Les données provisoires d'avril 1975 indiquent une diminution de 0.3% de l'indice composite de l'emploi dans les activités économiques du Canada depuis le mois précédent. Les baisses observées dans les industries manufacturières, la construction, les transports, les communications et autres services d'utilité publique ont plus que neutralisé les augmentations dans les autres divisions d'activité économique.

L'emploi dans les industries manufacturières a baissé de 0.9% entre mars et avril. Des baisses ont été enregistrées dans de nombreux secteurs de fabrication de biens durables et non durables; la plus considérable a été observée dans l'industrie du papier et des produits connexes et celle des appareils et du matériel électriques. Les conflits ouvriers dans les transports par eau, les services auxiliaires et les postes, combinés à des baisses dans le transport ferroviaire, l'entretien des routes et ponts et l'énergie électrique ont été les principaux facteurs de la diminution de 1.2% du niveau de l'emploi dans les transports, les communications et les autres services d'utilité publique en avril. Dans la construction, l'emploi a diminué de 0.9% en raison surtout de baisses dans les travaux de génie civil.

L'emploi dans le commerce a progressé de 0.4% par suite d'augmentations dans les magasins d'alimentation, les magasins à rayons et les bazars. La hausse de 0.7% dans la branche des finances, assurances et immeuble provient tant des établissements financiers, que des assurances et de l'immeuble. Dans la branche des services, l'emploi a marqué une avance de 0.3% parce que les augmentations dans les services extérieurs des entreprises et personnels ont plus que compensé les baisses observées dans les services récréatifs et divers. La hausse de 1.1% dans les mines provient en grande partie du secteur des combustibles minéraux, tandis que celle de 2.2% dans le forage s'explique en grande partie par les augmentations enregistrées au Nouveau-Brunswick et en Colombie-Britannique.

Dans la région de l'Atlantique, l'emploi a progressé de 0.7% en avril. Des hausses ont été observées dans l'abattage du bois et les services forestiers, l'industrie du poisson, le commerce de détail et les hôtels, restaurants et tavernes.

(1) Voir la note sur la présentation statistique sous la rubrique 'Concepts et méthodes' à la fin de la présente publication.

(2) L'ensemble des industries comprend toutes les branches d'activité sauf l'agriculture, la pêche et le piégeage, l'éducation et les services connexes, les services d'hygiène et de bien-être, les organisations religieuses, les ménages privés et l'administration publique et la défense. Toutes les statistiques sont fondées sur les déclarations reçues des employeurs ayant vingt (20) employés ou plus à leur service au cours d'un mois quelconque de l'année.

The *Quebec* composite index fell 0.7% in April. Employment declined substantially in logging, durable goods, non-durable goods, building and water transport and services. Somewhat offsetting gains occurred in retail trade, financial institutions, insurance and real estate, business services and hotels, restaurants and taverns.

In *Ontario*, the composite employment index dropped 0.6% from March to April. Widespread declines in manufacturing employment were responsible for the largest portion of the overall decline. There were, in addition, decreases in communication, electric power, recreational and personal services. The rise in trade employment was largely in the retail sector. Construction showed virtually no change over the month as declines in engineering offset gains in building.

The industrial composite employment index for the *Prairie Region* showed a slight rise in April as gains in Alberta more than offset declines in Manitoba and Saskatchewan. Employment advances in logging, mineral fuels, durable goods and insurance and real estate were virtually balanced by declines in building, transportation and wholesale trade.

In *British Columbia*, the composite index was up 0.5% from March to April. Highlighting this increase were rises in hotels, restaurants and taverns, building, logging and wood products. Somewhat offsetting declines occurred in transportation and communication.

Earnings and Hours

Seasonally-adjusted, average weekly earnings rose 1.3% at the Canada composite level in April. Gains were recorded in all industry divisions and in all provinces except Newfoundland and Nova Scotia, which declined.

Unadjusted for seasonal variations, average weekly earnings at the Canada composite level rose 1.4% to \$198.42. All provinces except Newfoundland and Nova Scotia contributed to the overall rise in the level of earnings.

In *forestry*, average weekly earnings rose 1.0% to \$266.98 as increases in hours paid in British Columbia were somewhat offset by declines in the Atlantic Region and Quebec.

Average weekly earnings in *mining* fell from \$273.47 in March to \$271.96 in April. Average weekly hours of hourly-rated wage-earners dropped from 40.6 to 40.2, while average hourly earnings fell 6 cents to \$6.21. For the most part, these declines reflected reductions in mineral fuels and services incidental to mining.

In *manufacturing*, average weekly earnings rose 1.9% in April to \$209.65 reflecting widespread increases in both durables (2.3%) and non-durables (1.4%). Average weekly hours increased to 38.8 from 38.3, while average hourly earnings climbed 4 cents to \$4.95.

Au *Québec*, l'indice composite de l'emploi a reculé de 0.7%. L'emploi a baissé considérablement dans l'abattage du bois, la fabrication de biens durables et de biens non durables, le bâtiment, les transports et les services auxiliaires. Des augmentations compensatrices survenues dans le commerce de détail, les établissements financiers, assurances et de l'immeuble, les services extérieurs des entreprises, hôtels, restaurants et tavernes.

En *Ontario*, l'indice composite de l'emploi a régressé de 0.6% mars et avril. Un ralentissement généralisé d'activité dans le manufacturier explique en grande partie la baisse générale. Des augmentations ont en outre été observées dans les communications, l'électricité, les services récréatifs et personnels. La hausse de l'emploi le commerce provient en grande partie du commerce de détail. L'indice de la construction n'a guère varié par rapport au mois précédent. Les baisses dans les travaux de génie civil ont neutralisé les hausses dans le bâtiment.

Dans la *région des Prairies*, l'indice composite de l'emploi a légèrement augmenté en avril, parce que les augmentations en Alberta plus que compensé les baisses observées au Manitoba et en Saskatchewan. Les augmentations de l'emploi dans l'abattage du bois, les combustibles minéraux, les biens durables, les assurances et l'immeuble ont été partiellement neutralisées par des baisses dans le bâtiment, les transports et le commerce de gros.

En *Colombie-Britannique*, l'indice composite de l'emploi a progressé de 0.5% entre mars et avril. Des hausses dans les hôtels, restaurants, les tavernes, le bâtiment, l'abattage du bois et les produits du bois ont contribué à cette augmentation. Celle-ci a été neutralisée en partie par quelque peu de baisses dans les transports et les communications.

Gains et heures de travail

Les gains hebdomadaires moyens désaisonnalisés au Canada, l'ensemble des activités économiques du Canada ont augmenté de 1.3% entre mars et avril. Des augmentations ont été enregistrées dans toutes les divisions d'activité et dans toutes les provinces, à l'exception de la Nouvelle-Écosse où il y a eu diminution.

Les gains hebdomadaires moyens non désaisonnalisés se sont élevés de 1.4% pour atteindre \$198.42 au niveau de l'ensemble du Canada. Une augmentation générale des gains a été observée dans toutes les provinces sauf à Terre-Neuve et en Nouvelle-Écosse.

Dans le *forêtage*, les gains hebdomadaires moyens ont augmenté de 1.0% pour atteindre \$266.98. L'augmentation du nombre d'heures rémunérées en Colombie-Britannique a été en partie neutralisée par des baisses dans la région de l'Atlantique et au Québec.

Dans les *mines*, les gains hebdomadaires moyens sont tombés de \$273.47 en mars à \$271.96 en avril. Le nombre moyen d'heures hebdomadaires travaillées par les ouvriers payés à l'heure est passé de 40.6 à 40.2, tandis que les gains horaires moyens ont baissé de 6 cents pour passer à \$6.21. Dans une large mesure, ces baisses s'expliquent par des réductions dans les combustibles minéraux et les services miniers.

Dans les *industries manufacturières*, les gains hebdomadaires moyens ont augmenté de 1.9% en avril pour atteindre \$209.65. Des augmentations générales dans la fabrication des biens durables et non durables (1.4%). Le nombre moyen d'heures hebdomadaires travaillées est passé de 38.3 à 38.8, tandis que les gains horaires moyens se sont élevés de 4 cents pour atteindre \$4.95.

Average weekly earnings in *construction* jumped 5.8% in April .31. For the most part, this rise reflected a resumption of activity following a short work week the previous month in areas. Average weekly hours rose from 36.8 to 39.3, while hourly earnings showed a 5-cent rise to \$7.23.

The 1.0% rise in average weekly earnings in *transportation, communication and other utilities* largely reflected gains reported in transportation and utilities. In *trade*, average weekly earnings rose with gains in both wholesale (1.4%) and retail (0.8%).

Average weekly earnings in *finance, insurance and real estate* rose 0.4% to \$189.59 as increases in financial institutions more than offset declines in insurance and real estate. In *service*, average weekly earnings increased 0.7% largely reflecting rises in business and professional services.

Dans la construction, les gains hebdomadaires moyens ont monté de 5.8% en avril pour se situer à \$281.31. Pour la majeure partie, l'augmentation est le résultat d'une reprise de l'activité normale après une semaine réduite de travail le mois précédent dans certaines régions. Le nombre moyen d'heures hebdomadaires est passé de 36.8 à 39.3, tandis que les gains horaires moyens ont progressé de 5 cents pour atteindre \$7.23.

La hausse de 1.0% des gains hebdomadaires moyens dans les *transports, les communications et autres services d'utilité publique* est attribuable en grande partie aux augmentations dans les transports et les services d'utilité publique. Dans le *commerce*, les gains hebdomadaires moyens se sont accrus de 0.9% par suite de hausses dans le commerce de gros (1.4%) et le commerce de détail (0.8%).

Dans le secteur des *finances, des assurances et de l'immeuble*, les gains hebdomadaires moyens ont enregistré une progression de 0.4% pour atteindre \$189.59 parce que les hausses dans les établissements financiers ont plus que compensé les baisses dans les assurances et l'immeuble. Dans les *services*, les gains hebdomadaires moyens se sont accrus de 0.7% en raison surtout des hausses dans les services extérieurs des entreprises et les services divers.

Fer et acier.....	291
Fonderie de fer.....	294

Les importants qui ont contribué à des modifications notables des données par rapport à celles du mois
ont indiqués au début de la présente publication.
Les méthodes sont décrits à la fin de la présente publication.

(1) First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

Note: 1. The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which wages were spent. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue 62-002. 3. The data in this table relate to average weekly wages of hourly-rated wage-earners only. Although this statistics is no longer tabulated as part of this survey, a special manual calculation has been made in order to retain this table because of its extensive usage. An approximation of this calculation can be obtained by multiplying average weekly hours by average hourly earnings, for a particular industry-area cell. - Nota: 1. Les salaires hebdomadaires courants ont trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des salaires hebdomadaires courants pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les salaires ont été dépensés. 2. Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no 62-002 au catalogue. 3. Les données de ce tableau ont trait aux salaires hebdomadaires moyens des employés à salaire (heures déclarées) seulement. Bien que cette statistique ne figure plus dans les tableaux tirés de la présente enquête, on a quand même fait un calcul spécial à la main en vue de maintenir ce tableau dont l'usage est très répandu. On peut obtenir une approximation de ce calcul en multipliant les heures hebdomadaires moyennes par la rémunération horaire moyenne pour un secteur particulier d'industrie-région.

First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

1. The current weekly earnings relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly earnings for any month is therefore adjusted in the above table by the Consumer Price Index for the following month as more representative of the period in which earnings are spent. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue 62-002. 3. This table relates to average weekly earnings of all employees. - Nota: 1. Les rémunérations hebdomadaires courantes on trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des rémunérations hebdomadaires courantes pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les rémunérations sont dépensées. 2. Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no 62-002 au Catalogue. 3. Ce tableau a trait à la rémunération hebdomadaire moyenne de tous les employés.

Données sur les grandes entreprises

TABLEAU 18. Heures hebdomadaires moyennes désaisonnalisées et non désaisonnalisées des employés à salaire (heures déclarées), certaines séries, Canada - fin

Year - Année	J	F	M	A	M	J	J	A	S	O	N	D	Average - Moyenne
--------------------	---	---	---	---	---	---	---	---	---	---	---	---	-------------------------

Non-metals, except fuels - Autres que de métaux, sauf les combustibles:

unadjusted - non désaisonnalisé

[illegible]

Construction:

unadjusted - non désaisonnalisé

[illegible]

Building - Bâtiment:

unadjusted - non désaisonnalisé

[illegible]

Engineering - Génie civil:

unadjusted - non désaisonnalisé

[illegible]

Urban transit - Transports urbains:

unadjusted - non désaisonnalisé

[illegible]

Highway and bridge maintenance - Entretien des routes et ponts:

unadjusted - non désaisonnalisé

[illegible]

Hotels, restaurants and taverns - Hotels, restaurants et tavernes:

unadjusted - non désaisonnalisé

[illegible]

Laundries, cleaners and pressers - Blanchissage, nettoyage et pressage:

unadjusted - non désaisonnalisé

[illegible]

CHRONOLOGICAL DATA ON EMPLOYMENT, EARNINGS AND HOURS(1)
(based on the 1960 Standard Industrial Classification)

Continuous series from 1957 to date are available as follows:

Employment indexes (1961 = 100).

Average weekly earnings (formerly titled average weekly wages and salaries).

Average weekly hours and average hourly earnings of hourly-rated wage-earners.

Average weekly wages of hourly-rated wage-earners (available only for the period 1957-1970).

Number of employees and number of hourly-rated wage-earners (available on request basis only for periods prior to 1971).

1960

Monthly data were not published but are available on

Annual averages are shown in:

Review of Employment and Average Weekly Wages and Salaries, *Catalogue 72-201, 1957-67*; Review of Man Hours and Hourly Earnings, *Catalogue 72-202, 1957-67*.

1970

Employment Indexes, 1961-1964, for Canada and Ontario, for bridges and streets; engineering; construction; highway maintenance; transportation; and transportation, communication and other utilities. *Employment, Earnings and Hours, Catalogue 72-002, October 1971*.

Employment Indexes, 1965-1967, for Canada and Ontario, for bridges and streets; engineering; construction; highway maintenance; transportation; and transportation, communication and other utilities. *Catalogue 72-002, February 1968*.

Average Weekly Earnings, 1961-1969 for:

Transportation; Highway and bridge maintenance.

Region: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance.

Atlantic: Transportation, communication and other utilities; Transportation.

Transportation, communication and other utilities; Transportation; Highway and bridge maintenance. *Catalogue 72-002, November 1971*.

Average Weekly Earnings, 1968-1970, for Canada, Ontario and Quebec, for scientific and professional equipment; miscellaneous manufacturing industries; non-durable goods; manufacturing; wholesale trade; industrial composite. *Catalogue 72-002, February 1972*.

Average Weekly Hours, Average Hourly Earnings, Average Wages of Hourly-rated Wage-earners - 1961-1967 for:

DONNÉES CHRONOLOGIQUES SUR L'EMPLOI, LES GAINS ET LA DURÉE DU TRAVAIL(1)
(fondées sur la Classification type des industries de 1960)

Les séries continues suivantes de 1957 jusqu'à aujourd'hui sont disponibles:

1. Indices de l'emploi (1961 = 100).
2. Gains hebdomadaires moyens.
3. Heures hebdomadaires moyennes et rémunération horaire moyenne des employés à salaire (heures déclarées).
4. Rémunération hebdomadaire moyenne des employés à salaire (heures déclarées) (disponibles pour la période 1957-1970 seulement).
5. Effectifs et nombre d'employés à salaire (heures déclarées) (disponibles sur demande seulement pour les périodes antérieures à 1971).

A. 1957-1960

Les données mensuelles n'ont pas été publiées mais sont disponibles sur demande.

Les moyennes annuelles figurent dans:

Review of Employment and Average Weekly Wages and Salaries, *n° 72-201 au catalogue, 1957-1967* Review of Man Hours and Hourly Earnings, *n° 72-202 au catalogue, 1957-1967*.

B. 1961-1970

Indices de l'emploi, 1961-1964, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir *Employment, Earnings and Hours, n° 72-002 au catalogue, octobre 1971*.

Indices de l'emploi, 1965-1967, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir le *n° 72-002 au catalogue, février 1968*.

Gains hebdomadaires moyens, 1961-1969, pour:

Canada: Transports; entretien des routes et des ponts.

Région de l'Atlantique: Transports, communications et autres services publics; transports; entretien des routes et des ponts.

Nouvelle-Ecosse: Transports, communications et autres services publics; transports.

Québec: Transports, communications et autres services publics; transports; entretien des routes et des ponts. *n° 72-002 au catalogue, novembre 1971*.

Gains hebdomadaires moyens, 1968-1970, Canada, Ontario et Toronto pour les instruments scientifiques et professionnels; les manufactures diverses; les biens non durables; les manufactures; le commerce de gros; le commerce; et l'ensemble des industries. Voir le *n° 72-002 au catalogue, février 1972*.

Heures hebdomadaires moyennes, Rémunération horaire moyenne, Gains hebdomadaires moyens des employés à salaire (heures déclarées), 1961-1967 for:

Canada: Highways, bridges and streets; Engineering; Construction.

Ontario: Highways, bridges and streets; Engineering; Construction; Highway and bridge maintenance. *Catalogue 72-002, June 1972.*

Average Weekly Hours, Average Hourly Earnings, Average Weekly Wages - 1961-1969 Canada - Atlantic Region - Quebec - for highway and bridge maintenance - Catalogue 72-002, December 1971.

All other available monthly and annual data for 1961-1964 are published in:

CONCEPTS AND METHODS

Each month the Monthly Employment, Payrolls and Labour Section of the Labour Division, through a mail survey, collects data on employment, earnings and hours which are tabulated and the data in this report. Data which, prior to March 1971, were published separately in "Employment and Average Weekly Wages and Salaries" (Catalogue 72-002) and in "Man-Hours and Earnings" (Catalogue 72-003) have been combined in this report. The following notes explain the concepts and methods used in the survey.

Reporting Unit

The reporting unit is usually the establishment, that is, the industrial unit which is a separate operating entity capable of producing all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "mark-up" or "gross profit" as well as data on employment and earnings. For purposes of detailed geographic statistics, the Section requests that the reporting unit be a sub-establishment unit although not capable of reporting all basic statistics, can report employment and payroll data for that particular location.

Generally, the survey covers larger companies only, that is, those having 20 or more employees in any month of the year. For all the establishments of a multi-establishment company are included if the company had 20 or more employees in total in any month of the year even though any single establishment may have had fewer than 20 employees.

Pay Period

Conceptually, the figures refer to the last seven days in the month. In practice, few establishments keep payroll records for precisely this period and establishments are therefore required to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the data are reduced to one week's proportion of the totals. The factors of the fractions used in calculating these weekly equivalents are 5, 6 or 7, depending on the number of working days per week which the establishment operated in the pay period. The denominators of the fractions are the number of working days in the month. For employees paid at annual or monthly rates, earnings are not affected by the number of working days in the month. Proportions are used to reduce the earnings to a weekly basis without regard to the length of the calendar month.

When a holiday, layoff or industrial dispute occurs in an establishment that reports a pay period that is different from the last seven days of the month, an adjustment is made to the data, if the holiday or dispute affects the two periods differently, so that the data accurately reflects the actual situation during the reference period.

All industries are covered by the survey, with the exceptions of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private household production, public administration and defence. Because of the limitation of the survey to larger firms, there is somewhat uneven coverage of employment by industry as well as by province and urban area. The coverage of total employment covered depends on the proportion

CONCEPTS ET MÉTHODES

Chaque mois, la Section des Statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail de la Division du travail recueille, par voie d'enquête postale, des données sur l'emploi, les gains et les heures de travail, données qui sont ensuite publiées ici sous forme de tableaux. Les données qui, avant mars 1971, étaient publiées séparément dans "Employment and Average Weekly Wages and Salaries" (n° 72-002 au catalogue) et dans "Man-Hours and Hourly Earnings" (n° 72-003 au catalogue) sont regroupées ici. Les notes qui suivent expliquent les concepts et la méthodologie de l'enquête.

Unité de déclaration

L'unité de déclaration est ordinairement l'établissement, c'est-à-dire la plus petite unité constituant un ensemble d'exploitation séparé en mesure de déclarer tous les éléments de base relevant de la statistique des activités économiques, y compris les données sur les entrées et les sorties qui sont nécessaires pour calculer la "valeur ajoutée" ou la "majoration brute" ou le "bénéfice brut" ainsi que des données sur l'emploi et les rémunérations. Pour obtenir des statistiques géographiques détaillées, la Section demande souvent que l'unité de déclaration se situe à un niveau qui est en deçà de celui de l'établissement, mais qui permet quand même d'obtenir des données sur l'emploi et les rémunérations à ce niveau, même si, par définition, ce niveau ne peut fournir toutes les statistiques de base.

En règle générale, l'enquête vise seulement les grandes entreprises, c'est-à-dire les entreprises employant 20 employés ou plus au cours de n'importe quel mois de l'année. Toutefois, tous les établissements d'une entreprise à établissements multiples sont pris en compte si l'entreprise emploie 20 employés ou plus, au total, au cours de n'importe quel mois de l'année, même si un de ces établissements peut n'avoir eu que quelques employés.

Période de référence

En théorie, l'enquête vise les chiffres des sept derniers jours des mois de référence. Vu qu'en pratique peu d'établissements tiennent des registres de paye pour cette période précise, on permet aux établissements de faire porter leurs chiffres sur la (ou les) dernière(s) période(s) de paye de chaque mois.

Si la période de paye visée dépasse une semaine, les chiffres sont réduits en conséquence. Les numérateurs des fractions utilisées pour calculer l'équivalent hebdomadaire sont 5, 6 ou 7, suivant le nombre de jours ouvrables par semaine où l'établissement a été en exploitation pendant la période de paye. Les dénominateurs des fractions sont le nombre de jours ouvrables des diverses périodes de paye. Dans le cas du personnel qui est rémunéré sur une base annuelle ou mensuelle et dont les gains ne sont pas touchés par le nombre de jours ouvrables au cours du mois, on utilise des proportions fixes pour ramener les gains sur une base hebdomadaire, sans tenir compte de la longueur du mois civil.

En cas de jour férié, de congédiement ou de conflit du travail dans un établissement dont la période de paye ne correspond pas aux sept derniers jours du mois, les données sont rectifiées lorsque l'effet du jour férié, du congédiement ou du conflit n'est pas le même sur les deux périodes, de manière que les données soient le reflet fidèle de la situation pendant la période de référence.

Champ de l'enquête

Toutes les branches d'activité économique sont prises en compte dans l'enquête, à l'exception de l'agriculture, de la pêche et du piégeage, de l'éducation et des services connexes, des services d'hygiène et de bien-être, des organismes religieux, des ménages et de l'administration publique et de la défense. Parce que l'enquête se limite aux grandes entreprises, le champ d'observation de l'emploi par branche d'activité, par province et par région urbaine manque quelque peu d'uniformité. Le

tion of larger to smaller establishments. This proportion varies considerably among industries. The following table shows annual employment as reported in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms plus supplementary surveys. Estimates of total employment are published in "Estimates of Employees by Province and Industry" (Catalogue 72-008).

pourcentage de l'emploi total qui est observé dépend du rapport des établissements aux petits établissements. Cette proportion varie considérablement d'une branche à l'autre. Le tableau suivant indique le pourcentage annuel de l'emploi, tel qu'il ressort de l'enquête, en pourcentage du chiffre estimatif de l'emploi total, ce dernier étant la somme des résultats de l'enquête sur l'emploi et la rémunération et des résultats d'une enquête d'échantillon auprès des petites entreprises ainsi que d'autres enquêtes supplémentaires. Des estimations du nombre total d'employés sont publiées sous le titre "Estimations du nombre d'employés par province et industrie" (n° 72-008 au catalogue).

(1) Total estimated employment is derived by adding together data from the employment and payrolls survey of larger-firms and data from a sample survey of smaller firms plus supplementary surveys. - L'estimation de l'emploi total est obtenue en additionnant les données de l'enquête sur l'emploi et la paie dans les grandes entreprises à celles d'une enquête par échantillonnage dans les petites entreprises et d'autres enquêtes supplémentaires.

(2) Includes recreational, business, personal and miscellaneous services only; data has not been published previously. - Comprend seulement services récréatifs, commerciaux, personnels et divers; ces données n'ont pas été publiées auparavant.

(3) These percentages are small because non-commercial services including education and related services, health and welfare services, religious organizations and private households, are included in total estimated employment but are not part of the larger-firm employment survey. - Ces pourcentages sont petits parce que les services non commerciaux, y compris l'enseignement et les services connexes, la santé et les oeuvres sociales, les organismes religieux et les ménages privés, sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

(4) Excludes non-commercial services and public administration and defence; data has not been published previously. - Ne comprend pas les services non commerciaux et l'administration publique et de la défense; ces données n'ont pas été publiées auparavant.

(5) These percentages are smaller because both non-commercial services and public administration and defence are included in total estimated employment but are not part of the larger-firm employment survey. - Ces pourcentages sont plus petits parce que les services non commerciaux de même que l'administration publique et la défense nationale sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

(6) Data for forestry and construction by province are not available for periods more recent than 1970. Les données pour le forestage et la construction ne sont pas disponibles par province après l'année 1970.

Geographic Classification

Reporting units are assigned to a province, a county (as defined by the Census of Population) and, where applicable, to an urban area. Data for Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are aggregated in some tables to give statistics for the Atlantic Region. Similarly, data for Manitoba, Saskatchewan and Alberta are added together to provide totals for the Prairie Region. The Census of Population's "Metropolitan Area" definitions were used for the nineteen applicable urban areas. The definitions used for other urban areas are based on a labour market concept; the areas usually include the surrounding territory as well as

Classification géographique

Les unités de déclaration sont affectées à une province, à un lieu, à une région urbaine. Les données de Terre-Neuve, de l'Île-du-Prince-Édouard, de la Nouvelle-Écosse et du Nouveau-Brunswick sont agrégées dans certains tableaux présentant des statistiques pour la région de l'Atlantique. De la même manière, les données du Manitoba, de la Saskatchewan et de l'Alberta sont additionnées pour former le total pour la région des Prairies. On a retenu la définition de "région métropolitaine" établie pour le recensement de la population dans le cas des régions urbaines. Les définitions employées pour les autres régions ur-

an centre. A list showing the territory included in each urban area is available from the Monthly Employment, and Labour Income Section. The reporting units not located in the urban area are included in county, provincial and totals.

Industrial Classification

All establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the largest net value added by these activities, or where not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not usually shifted from industry to industry each time its principal activity changes.

The statistics from the survey are based on the 1960 Standard Industrial Classification. A description of the various industries and groups of industries may be found in the "Standard Industrial Classification Manual", Catalogue 12-501 (1960). The "S.I.C. code" in the main tables refer to this manual. The tables contain a number of groupings not found in the Standard Industrial Classification. These include:

Industrial composite (031-899) - The sum of the industries included in the survey. (see Coverage)

Durable goods manufacturing (durable) - The sum of wood products (S.I.C. 250-259), furniture and fixtures (S.I.C. 260-269), primary metal industries (S.I.C. 290-298), metal fabricating industries (S.I.C. 300-309), machinery (except electrical) (S.I.C. 310-318), transportation equipment (S.I.C. 320-329), electrical products (S.I.C. 330-339), and non-metallic mineral products (S.I.C. 340-359).

Non-durable goods manufacturing (non-dur) - The sum of food and beverages (S.I.C. 100-147), tobacco processing and products (S.I.C. 150-153), rubber products (S.I.C. 160-169), leather products (S.I.C. 170-179), textile products (S.I.C. 180-229), knitting mills (S.I.C. 230-239), clothing (S.I.C. 240-249), paper and allied industries (S.I.C. 270-274), printing, publishing and allied industries (S.I.C. 280-289), petroleum and coal products (S.I.C. 360-369), chemicals and chemical products (S.I.C. 370-379), and miscellaneous manufacturing industries (S.I.C. 380-399).

Building (404,421) - The sum of general contractors (S.I.C. 404) and special trade contractors (S.I.C. 421).

Engineering (406-409) - The sum of highway, bridge and street construction (S.I.C. 406) and other construction (S.I.C. 407-409).

In addition, the synthetic textile industry (201) is subdivided into spun yarn and fabrics (2011) and filament yarn and staple fibres (2012).

ent

Employment data represent all employees on the payrolls of reporting units in the reference period. The employee concept excludes owners or partners in unincorporated businesses, non-

sont fondées sur le concept du marché du travail; les régions englobent ordinairement le territoire avoisinant avec le centre urbain. On peut obtenir sur demande une liste indiquant le territoire compris dans chaque région urbaine en s'adressant à la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail. Les unités de déclaration situées ailleurs que dans une région urbaine retenue sont comprises dans les chiffres du comté, de la province et de la région.

Classification par activité économique

Tous les établissements appartiennent à une branche d'activité économique, qui est déterminée en fonction de leur activité principale. Si un établissement a plusieurs activités économiques, son activité principale est déterminée par la plus grande valeur nette ajoutée de ces activités, ou si cela n'est pas possible, par les recettes brutes au titre des différentes activités. Si un établissement exerce des activités très diverses, on ne le transfère pas nécessairement d'une branche à l'autre chaque fois que son activité principale change.

Les statistiques tirées de l'enquête sont fondées sur la Classification type des industries de 1960. On peut trouver une description des diverses activités économiques et groupes d'activités économiques dans le "Manuel de la classification type des industries", n° 12-501 au catalogue (1960). Les colonnes "code de la C.T.I." des principaux tableaux renvoient à ce manuel. Les tableaux renferment quelques groupements qui ne se trouvent pas dans la Classification type des industries. Ce sont:

Ensemble des industries (031-899) - l'ensemble des activités économiques visées par l'enquête. (voir Champ de l'enquête)

Manufactures, biens durables (durable) - l'ensemble de l'industrie des produits du bois (C.T.I. 250-259), de l'industrie des meubles et accessoires d'ameublement (C.T.I. 260-269), de l'industrie des métaux (formes primaires) (C.T.I. 290-298), de l'industrie des produits métalliques (C.T.I. 300-309), de l'industrie de la machinerie (sauf le matériel électrique) (C.T.I. 310-318), de l'industrie du matériel de transport (C.T.I. 320-329), de l'industrie des appareils et du matériel électriques (C.T.I. 330-339), et de l'industrie des produits minéraux non métalliques (C.T.I. 340-359).

Manufactures, biens non durables (non dur.) - L'ensemble de l'industrie des aliments et boissons (C.T.I. 100-147), de l'industrie du traitement et des produits du tabac (C.T.I. 150-153), de l'industrie des produits du caoutchouc (C.T.I. 160-169), de l'industrie des produits du cuir (C.T.I. 170-179), de l'industrie des produits du textile (C.T.I. 180-229), de l'industrie de la bonneterie (C.T.I. 230-239), de l'industrie du vêtement (C.T.I. 240-249), de l'industrie du papier et des produits connexes (C.T.I. 270-274) de l'imprimerie, de l'édition et des industries connexes (C.T.I. 280-289), de l'industrie du pétrole, du charbon et de leurs dérivés (C.T.I. 360-369), de l'industrie chimique et des produits connexes (C.T.I. 370-379) et des industries manufacturières diverses (C.T.I. 380-399).

Bâtiment (404, 421) - L'ensemble des entrepreneurs généraux (C.T.I. 404) et des entrepreneurs spécialisés (C.T.I. 421).

Genie civil (C.T.I. 406-409) - L'ensemble de la construction de routes, ponts et rues (C.T.I. 406) et des autres constructions (C.T.I. 407-409).

En outre, l'industrie des textiles synthétiques (201) est subdivisée en filés et tissus (2011) et en filés de filaments et fibres discontinues (2012).

Emploi

Les données sur l'emploi représentent tous les employés inscrits aux registres de paye des unités de déclaration au cours de la période de référence. Le concept d'employé exclut les propriétaires actifs ou partenai-

working directors, the self-employed, unpaid family workers, persons doing non-remunerative volunteer work, pensioners, home workers, and persons providing services to an establishment on the basis of a contract for services. Counted as employed, therefore, are all wage-earners and salaried employees who are paid for their services or are on paid absence during the reference period, except for casual employees working less than seven hours in the pay period. *Regular part-time* employees are treated as employed regardless of the number of hours worked during the pay period.

For example, an employee working for a part of the reference period and unemployed or on strike for the rest, is counted as employed. Employees not receiving pay for the entire reference period because of strike or as a consequence of a strike, or those persons on leave without pay, are not included among the employed.

Wage-earners

Wage-earners are defined by occupation rather than by the method of payment. They are those employees engaged in actual production and related operations, including maintenance, warehouse and delivery staffs, security staff, routemen, driver-salesmen, sales clerks in retail stores, waitresses, and working foremen performing functions similar to those of the employees whom they supervise, etc. Wage-earners may be paid a fixed monthly amount or on the basis of hours worked. The survey covers all wage-earners regardless of the method of payment and average weekly wages are computed for all. However, derivations of average weekly hours and average hourly earnings are based only upon data for wage-earners for whom hours data are available.

Salaried Employees

Salaried employees constitute executive, administrative, supervisory, technical and professional personnel, commission agents, and travelling salesmen directly responsible to the administration, as well as general office, clerical and related workers in the office and plant. In addition, working directors of incorporated businesses are included in this category.

Earnings

Earnings of wage-earners and salaried employees represent gross pay for the week, before deductions for taxes, unemployment insurance contributions, etc. Gross pay includes salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. The payroll concept does not include supplementary labour costs such as employers' contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or directors' fees.

The term "earnings" is used to denote the total of weekly wages of the wage-earners and salaries of the salaried employees. The publications prior to March 1971 contained this combined data entitled "Average Weekly Wages and Salaries". These data are comparable with "Average Weekly Earnings" of total employees in

res d'entreprises non constituées en corporation, les membres des conseils d'administration qui ne travaillent pas dans l'entreprise, les travailleurs autonomes, les travailleurs familiaux non rémunérés, les bénévoles, les pensionnés, les travailleurs à domicile et les personnes fournissant des services à forfait ou sous contrat. Sont donc considérés comme employés tous les employés à salaire et tous les employés à traitement qui sont rémunérés pour leurs services ou qui sont en congé payé pendant la période de référence, à l'exception des occasionnels ayant travaillé moins de sept heures pendant la période de paye. Les *employés réguliers à temps partiel* sont comptés parmi les employés quel que soit le nombre d'heures travaillées pendant la période de paye.

Par exemple, une personne travaillant une partie de la période de référence et en chômage ou en grève le reste de la période, est comptée comme occupée. Les employés qui ne sont pas rémunérés pour toute la période de référence à cause d'une grève ou des conséquences d'une grève, ou les personnes en congé sans paye ne figurent pas parmi les personnes occupées.

Employés à salaire

L'employé à salaire est défini par la nature du travail plutôt que par le mode de rémunération. Les employés à salaire sont les personnes travaillant effectivement à la production et à des opérations assimilées, en particulier le personnel d'entretien, d'entrepôt et de livraison, le personnel de sécurité, les chauffeurs-livreurs, les vendeurs itinérants, les commis des magasins de détail, les serveuses et les contremaîtres remplissant des fonctions analogues à celles des employés dont ils ont la charge, et les employés à salaire peuvent être rémunérés sur une base mensuelle ou hebdomadaire suivant le nombre d'heures travaillées. L'enquête couvre tous les employés à salaire quel que soit leur mode de rémunération et les gains hebdomadaires moyens et les rémunérations horaires moyennes sont calculées uniquement d'après les données relatives aux employés à salaire dont on connaît le nombre d'heures de travail.

Employés à traitement

Les employés à traitement comprennent les directeurs, les administrateurs, les surveillants, les cadres techniques et spécialisés, les agents de commission, les voyageurs de commerce relevant directement de l'administration, ainsi que les employés de bureau, les commis et les travailleurs assimilés, au bureau et à l'usine. Les membres des conseils d'administration d'entreprises constituées en corporation qui travaillent dans l'entreprise sont également compris dans cette catégorie.

Rémunération

Les rémunérations des employés à salaire et des employés à traitement représentent les gains bruts de la semaine, avant déductions d'impôt, de cotisations d'assurance-chômage, etc. La rémunération brute comprend les salaires, la rémunération au taux ordinaire, la rémunération du travail aux pièces et les commissions régulières, les gains au rendement, les primes de vie chère et autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements aux personnes en congé payé pendant la semaine de l'enquête. Le concept de rémunération ne comprend pas les frais supplémentaires de l'œuvre tels que les cotisations de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie, à la caisse d'indemnisation des accidents de travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur de la pension, les paiements en nature, les frais de déplacement, les indemnités de retraite, les gratifications versées à intervalles irréguliers et peu fréquents ni les jetons de présence des administrateurs.

Le terme "rémunérations" désigne l'ensemble des gains des employés à salaire et des employés à traitement. Les publications antérieures à mars 1971 renfermaient des données réunies sous le titre "Average Weekly Wages and Salaries". Ces données sont comparables aux rémunérations hebdomadaires moyennes de l'ensemble des employés.

esent publication. The system now provides separate earnings for all wage-earners and salaried employees whereas formerly "Average Weekly Wages" for hourly-rated wage-earners was only for salaried employees.

Numbers

Index numbers are calculated by dividing the current month's employment (or payroll) by the monthly-average of the total base employment (or payroll). The current employment consists of all employment reported by establishments that meet our size criteria in the current period. Base year employment consists of the employment of establishments that had 20 or more employees in any month of the base year. The payroll index is calculated in a similar fashion.

Seasonally-adjusted index numbers remove from the employment indexes those regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the trend, cycle, and irregular components of the time series. The X-11 procedure of the U.S. Census Method II is used to calculate the seasonally-adjusted index numbers; additional seasonally-adjusted index numbers may be found in "Employment, earnings and hours, seasonally-adjusted series January 1961 - December 1971" (Catalogue

The average weekly hours figure is obtained by dividing total man-hours by the number of wage-earners who worked those hours. Average hourly earnings are obtained by dividing total weekly earnings of hourly-rated wage-earners by their total weekly hours. Both averages apply only to the subset of wage-earners for whom earnings are reported. It should be noted that total hours include hours actually worked and that the wage-earner total includes part-time wage-earners and casuals working more than seven hours in one week. Annual statistics are calculated from the monthly data, with the exception of those shown as preliminary (p); the latter are based on monthly averages.

Statistical Presentation

Each month, statistics for three months are prepared by the Employment, Payrolls and Labour Income Section. Data for the most current month, are entitled first estimates. They are based on a limited number of returns (usually about 50%) and only preliminary figures are released in the Statistics Canada Daily First Estimates table of this publication. Simultaneously, preliminary estimates are prepared for the month immediately preceding the current data and third estimates for the month prior to that. These latter estimates are of higher quality than that of the first estimate of the higher rate of returns (typically, 65% and 75%, respectively). Consequently full details for both months are shown in this publication.

After completion of the third estimate, further revisions to the data are made to incorporate late returns and corrected information from our respondents or to rectify mechanical errors. Larger corrections are calculated immediately and appear in the historical tables and in column for the previous year in tables 2, 3 and 4 of this publication. The smaller corrections are completed in the supplementary tables when all returns are retabulated to produce revised annual averages; these data are contained in catalogue 72-202.

en compte ici. Ce système permet maintenant d'avoir des données distinctes pour tous les employés à salaire et les employés à traitement tandis qu'autrefois on ne pouvait connaître que les "rémunérations hebdomadaires moyennes" des employés à salaire rémunérés à taux horaire.

Nombres-indices

On obtient les nombres-indices en divisant le nombre total d'employés (ou la rémunération) du mois courant par la moyenne mensuelle du nombre d'employés (ou de la rémunération) de l'année de base. Le nombre courant d'employés est l'ensemble des employés déclarés par les établissements dont la taille répond à notre critère pendant la période courante. Le nombre d'employés pour l'année de base est le nombre d'employés des établissements employant 20 employés ou plus pendant n'importe quel mois de l'année 1961. L'indice de la rémunération est calculé de la même manière.

La désaisonnalisation des nombres-indices a pour effet d'éliminer des indices de l'emploi les fluctuations qui se produisent à intervalles réguliers et qui s'appellent variations saisonnières. Les nombres-indices désaisonnalisés représentent donc assez bien la tendance, le cycle et les composantes irrégulières de la série chronologique. La variante X-11 de la méthode II du recensement des Etats-Unis est utilisée pour calculer les nombres-indices désaisonnalisés; on peut trouver d'autres séries désaisonnalisées dans "Emploi, rémunérations et heures, séries désaisonnalisées janvier 1961-décembre 1971" (n° 72-206 au catalogue).

Moyennes

On calcule les heures hebdomadaires moyennes en divisant le nombre total d'heures-hommes par le nombre d'employés à salaire qui ont fait ces heures. On obtient les rémunérations horaires moyennes en divisant la rémunération hebdomadaire totale des employés à salaire rémunérés à l'heure par le nombre total de leurs heures par semaine. Ces deux moyennes s'appliquent seulement aux employés à salaire dont le nombre d'heures est déclaré. À remarquer que le nombre total d'heures comprend les heures supplémentaires réelles et que le total des employés à salaire comprend les employés à salaire à temps partiel et les occasionnels qui travaillent plus de sept heures par semaine. À l'exception des statistiques provisoires (p), qui sont fondées sur les moyennes mensuelles, les statistiques annuelles sont établies à partir de l'ensemble des données mensuelles.

Présentation statistique

Chaque mois, la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail prépare des statistiques pour trois mois. Les données du premier mois, le mois le plus récent, sont appelées "premières estimations". Elles sont fondées sur un nombre limité de déclarations (environ 50%) et seuls des chiffres très généraux sont publiés dans Le Quotidien de Statistique Canada et dans le tableau "Premières estimations" de la présente publication. En même temps, la Section prépare des deuxième estimations pour le mois qui précède le mois le plus récent, et des troisième estimations pour le mois qui précède celui-là. Ces deux dernières estimations sont de meilleure qualité que les premières en raison de la disponibilité d'un plus grand nombre de réponses (d'habitude 65% pour les deuxième estimations et 75% pour les troisième). Par conséquent, la présente publication contient tous les détails pour ces deux mois.

Une fois terminées les troisième estimations, on effectue d'autres rectifications à la lumière des déclarations des retardataires et des corrections reçues de nos enquêtés, ou par suite de la correction de certaines erreurs mécaniques. Les corrections les plus importantes sont effectuées immédiatement; elles paraissent dans les tableaux chronologiques et spéciaux ainsi que dans la colonne de l'année précédente aux tableaux 2, 3 et 4 de la présente publication. Les corrections de moindre importance sont effectuées dans les tableaux annuels quand toutes les réponses ont été totalisées de nouveau en vue de la production de chiffres et de moyennes annuelles rectifiés; ces données sont publiées dans les publications 72-201 et 72-202.

EMPLOYMENT, PAYROLLS AND MANHOURS

for month of _____

Please type or use lead pencil.
Final mailing deadline is the
10th of the month. Earlier mail-
ing is appreciated.

Keep one copy for your files.

Do not write in shaded areas.

Directions are mailed separately;
extra copies are available on re-
quest.

Please make any necessary changes in above name or mailing address

1. If you had any employees drawing pay in the last period(s)
of the month indicated, please complete this report. If not, when do you expect to hire employees?

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- . . figures not available.
- . . . figures not appropriate or not applicable.
- nil or zero.
- - amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE

In addition, in this publication (except as otherwise noted), blanks in those columns where wage-earners and salaried employees data are shown separately indicate that representative data for wage-earners for whom hours are recorded are not available.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- . . nombres indisponibles.
- . . . n'ayant pas lieu de figurer.
- néant ou zéro.
- - nombres infimes.
- p nombres provisoires.
- r nombres rectifiés.
- x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

NOTA

On remarquera que, dans la présente publication (sauf in contraire) les colonnes laissées en blanc dans le cas des emp traitement et des employés à salaire indiqués séparément, signifient données relatives aux employés pour lesquels les heures sont enregi: sont pas disponibles.

First Estimates(1) – June 1975

Seasonally-adjusted, the first estimate of the Canada industrial composite(2) index of employment (1961 = 100) showed no change from May to June. Employment increased in forestry, durable goods manufacturing and service; there were declines in non-durable goods manufacturing and the remaining industry divisions.

Unadjusted for seasonal variations, average weekly earnings rose 0.2% at the Canada composite level. Gains were recorded in all industry divisions, except forestry, and in all five regions.

Preliminary Data(1) – May 1975

Employment (Seasonally-adjusted)

Preliminary data for May 1975 showed a 0.3% rise in the Canada industrial composite index of employment. Gains were recorded in all industry divisions, except forestry and mining.

Employment in manufacturing rose 0.4% from April to May. There were widespread rises in non-durables, especially in food and beverages, chemicals and chemical products, and clothing. Employment in durable goods declined as rises in wood products and other products were more than offset by losses in primary metal products. In metal fabricating industries, machinery, and transportation. In construction, employment was up 1.8% with gains in building and declines in building.

Service employment increased 0.6% as gains in business, trade, and miscellaneous services outweighed declines in the manufacturing component. Employment in trade rose 0.2%; wholesale and retail trade showed gains, while retail declined mainly due to department stores. The 0.8% rise in finance, insurance and real estate largely reflected gains in finance and real estate. Employment in transportation and other utilities advanced 0.6% as rises in transportation and services, truck transport and electric power more than offset declines in railway transport and post office.

Mining showed a 1.0% decline mainly reflecting losses in non-metals. Forestry employment dropped 3.1% as gains in Newfoundland and British Columbia were more than offset by declines in New Brunswick and Quebec.

For more information on Statistical Presentation under Concepts and Methods, see the back of this publication.

The Industrial Composite is the sum of all industries with the exception of agriculture, fishing and trapping, education and health services, health and welfare services, religious organizations, private households and public administration and defense. All statistics are based on returns received from employers having twenty (20) or more employees in any month of the

Premières estimations(1) – Juin 1975

La première estimation désaisonnalisée de l'indice composite(2) de l'emploi dans les activités économiques du Canada (1961 = 100) ne fait état d'aucune variation entre mai et juin. Le niveau de l'emploi a augmenté dans le forestage, la fabrication de biens durables et les services; il a diminué dans la fabrication des biens non durables et les autres divisions d'activité économique.

Les gains hebdomadaires moyens non désaisonnalisés ont augmenté de 1.2% au niveau de l'ensemble du Canada. Toutes les divisions d'activité économique à l'exception du forestage et toutes les régions ont contribué à cette augmentation.

Données provisoires(1) – Mai 1975

Emploi (Chiffres désaisonnalisés)

Les données provisoires de mai 1975 indiquent une progression de 0.3% de l'indice composite de l'emploi dans les activités économiques du Canada. Des augmentations ont été enregistrées dans toutes les divisions d'activité économique sauf dans le forestage et les mines.

Dans les industries manufacturières, l'emploi a progressé de 0.4% entre avril et mai. Des hausses générales ont été observées dans la fabrication des biens non durables, en particulier les aliments et les boissons, les produits chimiques et connexes et les vêtements. Dans la fabrication des biens durables, le niveau de l'emploi a diminué, les hausses observées dans les produits du bois et le matériel électrique ayant été plus que neutralisées par les baisses enregistrées dans le secteur de la première transformation des métaux, la fabrication de produits métalliques, des machines et du matériel de transport. Dans la construction, l'emploi a progressé de 1.8%, des hausses ayant été enregistrées dans les travaux de génie civil et des baisses dans le bâtiment.

L'emploi dans les services a augmenté de 0.6% parce que les hausses dans les services extérieurs des entreprises, personnels et divers ont eu plus de poids que les baisses dans les services récréatifs. Dans le commerce, le niveau de l'emploi a progressé de 0.2%; le commerce de gros a enregistré une hausse générale tandis que le commerce de détail a marqué une baisse imputable surtout aux magasins à rayons. L'augmentation de 0.8% dans la branche des finances, des assurances et de l'immeuble s'explique en majeure partie par les hausses dans les assurances et l'immeuble. Dans les transports, les communications et les autres services d'utilité publique, l'emploi a progressé de 0.6% parce que les hausses dans les transports par eau et les services auxiliaires, le camionnage et l'énergie électrique ont plus que compensé les baisses observées dans le secteur du transport ferroviaire et les postes.

Les mines ont accusé une baisse de 1.0% en raison surtout des pertes dans les métaux et les mines non métalliques. Dans le forestage, le niveau de l'emploi a reculé de 3.1% car les augmentations à Terre-Neuve et en Colombie-Britannique ont été plus que neutralisées par les diminutions au Nouveau-Brunswick et au Québec.

- (1) Voir la note sur la présentation statistique sous la rubrique "Concepts et méthodes" à la fin de la présente publication.
- (2) L'ensemble des industries comprend toutes les branches d'activité sauf l'agriculture, la pêche et le piégeage, l'éducation et les services connexes, les services d'hygiène et de bien-être, les organisations religieuses, les ménages privés et l'administration publique et la défense. Toutes les statistiques sont fondées sur les déclarations reçues des employeurs ayant vingt (20) employés ou plus à leur service au cours d'un mois quelconque de l'année.

In the *Atlantic Region*, employment rose 0.4% with gains in all provinces, except Newfoundland. Employment increased in fish products, wood products, primary metal industries, engineering, insurance and real estate, and hotels, restaurants and taverns. Somewhat offsetting declines occurred in forestry, paper and allied industries and building.

The *Quebec* composite index of employment rose 0.9% with gains in all industry divisions, except forestry. The largest rises were recorded in wood products, food and beverages, paper and allied industries, general contractors, water transport and services, insurance and real estate, and hotels, restaurants and taverns.

In *Ontario*, the composite index of employment fell 0.5% in May as well as all industry divisions recorded declines, except trade. Manufacturing employment dropped 0.3% as declines in motor vehicle assembling, metal fabricating industries, miscellaneous machinery, iron and steel mills, and miscellaneous manufacturing industries more than offset rises in electrical products, food and beverages, and chemicals and chemical products. Other decreases occurred in building, transportation, and recreational and personal services. Gains were recorded in engineering and retail trade.

The industrial composite index for the *Prairie Region* showed virtually no change from April to May as gains in Alberta offset declines in Manitoba and Saskatchewan. Employment advanced in wood products, transportation equipment, both wholesale and retail trade, and both financial institutions and insurance and real estate. There were declines in logging, building, engineering, and railway transport.

In *British Columbia*, employment rose 1.5% in May at the composite level. There were increases in logging, wood products, building, transportation, and hotels, restaurants and taverns. The decline in trade employment was largely in department stores.

Earnings and Hours

Seasonally-adjusted, average weekly earnings advanced 1.5% at the Canada composite level in May. Gains were recorded in all industry divisions, except transportation, communication and other utilities, and in all provinces.

Unadjusted for seasonal variations, average weekly earnings for the Canada industrial composite rose 1.4% to \$200.12. The provincial changes ranged from a 1.4% decline in New Brunswick to a 1.7% rise in British Columbia.

In *forestry*, average weekly earnings dropped 4.9% to \$253.71 mainly reflecting declines in hours paid and substantially increased employment in regions where earnings are below the national average.

Average weekly earnings in *mining* showed almost no change over the month as gains in non-metals balanced declines in mineral fuels and services incidental to mining. Average weekly hours of hourly-rated wage-earners fell from 40.0 to 39.6, while average hourly earnings rose 9 cents to \$6.34.

Dans la *région de l'Atlantique*, l'emploi a progressé de 0.4% à des hausses dans toutes les provinces sauf à Terre-Neuve. Le niveau de l'emploi a augmenté dans les produits de la pêche, les produits de la première transformation des métaux, les travaux de génie civil, assurances et l'immeuble, les hôtels, restaurants et tavernes. Des baisses quelque peu compensatrices ont été enregistrées dans le forestage, la transformation du papier et des produits connexes et le bâtiment.

Au *Québec*, l'indice composite de l'emploi a avancé de 0.9% à des hausses dans toutes les branches d'activité économique sauf le forestage. Les augmentations les plus considérables ont été enregistrées dans les secteurs suivants: produits du bois, aliments et boissons, produits du papier et produits connexes, entrepreneurs généraux, transport et services auxiliaires, assurance et immeuble, et hôtels, restaurants et tavernes.

En *Ontario*, l'indice composite de l'emploi a reculé de 0.5% toutes les divisions d'activité économique à l'exception du commerce enregistré des baisses. Dans les industries manufacturières, l'emploi a baissé de 0.3% parce que les baisses dans l'assemblage des véhicules automobiles, l'industrie des produits métalliques, la fabrication de produits divers, la fonte et l'affinage et les manufactures diverses ont partiellement neutralisé les hausses observées dans le secteur des produits électriques, aliments et boissons, des produits chimiques et connexes. Des baisses ont été aussi observées dans le domaine du bâtiment, des transports, services récréatifs et personnels. Il y a eu progression dans les travaux de génie civil et le commerce de détail.

Dans la *région des Prairies*, l'indice composite de l'emploi n'a pas varié entre avril et mai car les hausses en Alberta ont compensé les baisses au Manitoba et en Saskatchewan. Le niveau de l'emploi a progressé dans les produits du bois, le matériel de transport, le commerce de gros et de détail, les établissements financiers, les assurances et l'immeuble. Des baisses ont été enregistrées dans l'abattage du bois, le bâtiment, les travaux de génie civil et le transport ferroviaire.

En *Colombie-Britannique*, l'indice composite de l'emploi a avancé de 1.5%. Des hausses ont été enregistrées dans l'abattage du bois, les produits du bois, le bâtiment, les transports, les hôtels, restaurants et tavernes. La baisse du niveau de l'emploi dans le commerce de détail est imputable en grande partie aux magasins à rayons.

Gains et heures de travail

Les gains hebdomadaires moyens désaisonnalisés au Canada ont augmenté de 1.5% entre avril et mai. Des augmentations ont été enregistrées dans toutes les divisions d'activité, à l'exception des transports, des communications et autres services d'utilité publique, et dans toutes les provinces.

Les gains hebdomadaires moyens non désaisonnalisés, se sont élevés de 1.4% pour atteindre \$200.12 au niveau de l'ensemble du Canada. Les variations entre provinces se sont situées entre une baisse de 1.4% au Nouveau-Brunswick et une hausse de 1.7% en Colombie-Britannique.

Dans le *forestage*, les gains hebdomadaires moyens ont baissé de 4.9% pour se chiffrer à \$253.71, baisse attribuable surtout à la réduction du nombre d'heures rémunérées et à l'augmentation considérable de l'emploi dans les régions où les gains sont inférieurs à la moyenne nationale.

Dans les *mines*, les gains hebdomadaires moyens n'ont pas varié par rapport au mois précédent parce que les augmentations dans les mines non métalliques ont compensé les baisses dans les mines métalliques et les services miniers. Le nombre moyen d'heures hebdomadaires travaillées par les ouvriers payés à l'heure est tombé de 40.0 à 39.6, tandis que les gains horaires moyens ont augmenté de 9 cents pour atteindre \$6.34.

In *manufacturing*, average weekly earnings advanced 0.4% in both durables and non-durables. Average weekly hours fell from 38.8 to 38.5 mainly reflecting losses in durable goods. Hourly earnings rose from \$4.96 to \$5.01 due to widespread gains in both components.

Average weekly earnings in *construction* rose 0.9% to \$282.65 due to gains in building. Average weekly hours showed no change. Declines in building balanced rises in engineering. Average earnings showed a 5 cent rise to \$7.29 as gains in building more than offset a drop in engineering.

The 0.4% rise in average weekly in *transportation, communication and other utilities* mainly reflected rises in the transportation sector. Average weekly earnings in *trade* rose 2.1% to \$157.21 due to increases in retail trade.

Finance, insurance and real estate showed a rise of 0.3% in average weekly earnings with gains in both financial institutions and insurance and real estate. Average weekly earnings in *service* rose from \$141.01 in April to \$141.01 in May as gains were recorded in retail, business and personal services.

Dans les *industries manufacturières*, les gains hebdomadaires moyens ont progressé de 0.4% en raison de hausses dans les secteurs des biens durables et non durables. Le nombre moyen d'heures hebdomadaires est passé de 38.8 à 38.5 par suite surtout d'une baisse dans le secteur des biens durables. Les gains horaires moyens sont passés de \$4.96 à \$5.01 par suite des hausses généralisées dans les deux secteurs.

Dans la *construction*, les gains hebdomadaires moyens se sont accrus de 0.9% pour atteindre \$282.65, par suite surtout d'une hausse dans le secteur du bâtiment. Le nombre moyen d'heures hebdomadaires n'a pas varié car les baisses dans le secteur du bâtiment ont neutralisé les hausses dans les travaux de génie civil. Les gains horaires moyens ont augmenté de 5 cents pour atteindre \$7.29, les hausses dans le bâtiment ayant plus que compensé les baisses dans les travaux de génie civil.

L'accroissement de 0.4% des gains hebdomadaires moyens dans les *transports, les communications et autres services d'utilité publique* a été le principal facteur d'augmentation dans le domaine des transports. Dans le *commerce*, les gains hebdomadaires moyens ont augmenté de 2.1% pour atteindre \$157.21 en raison surtout des hausses dans le commerce de détail.

Dans le secteur des *finances, des assurances et de l'immeuble*, les gains hebdomadaires ont progressé de 0.3% tant dans les établissements financiers que les assurances et l'immeuble. Dans les *services*, les gains hebdomadaires moyens sont passés de \$139.48 en avril à \$141.01 en mai en raison des hausses observées dans les services récréatifs, extérieurs des entreprises et personnels.

(1) First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

Note: 1. The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which wages are spent. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue 62-002. 3. The data in this table relate to average weekly wages of hourly-rated wage-earners only. Although this statistics is no longer tabulated as part of this survey, a special manual calculation has been made in order to retain this table because of its extensive usage. An approximation of this calculation can be obtained by multiplying average weekly hours by average hourly earnings, for a particular industry-area cell. - Nota: 1. Les salaires hebdomadaires courants ont trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des salaires hebdomadaires courants pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les salaires sont dépensés. 2. Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no 62-002 au catalogue. 3. Les données de ce tableau ont trait aux salaires hebdomadaires moyens des employés à salaire (heures déclarées) seulement. Bien que cette statistique ne figure plus dans les tableaux moyens des employés à salaire (heures déclarées) même fait un calcul spécial à la main en vue de maintenir ce tableau dont l'usage est très répandu. On peut obtenir une approximation de ce calcul en multipliant les heures hebdomadaires moyennes par la rémunération horaire moyenne pour un secteur particulier d'industrie-région.

HISTORICAL DATA ON EMPLOYMENT, EARNINGS AND HOURS(1) (based on the 1960 Standard Industrial Classification)

Continuous series from 1957 to date are available as follows:

1. Employment indexes (1961 = 100).
2. Average weekly earnings (formerly titled average weekly wages and salaries).
3. Average weekly hours and average hourly earnings of hourly-rated wage-earners.
4. Average weekly wages of hourly-rated wage-earners (available only for the period 1957-1970).
5. Number of employees and number of hourly-rated wage-earners (available on request basis only for periods prior to 1971).

1957-1960

Monthly data were not published but are available on request.

Annual averages are shown in:

Review of Employment and Average Weekly Wages and Salaries, *Catalogue 72-201, 1957-67*; Review of Man Hours and Hourly Earnings, *Catalogue 72-202, 1957-67*.

1961-1970

Employment Indexes, 1961-1964, for Canada and Ontario, for highways, bridges and streets; engineering; construction; highway bridge maintenance; transportation; and transportation, communication and other utilities. Employment, Earnings and Hours, *Catalogue 72-002, October 1971*.

Employment Indexes, 1965-1967, for Canada and Ontario, for highways, bridges and streets; engineering; construction; highway bridge maintenance; transportation; and transportation, communication and other utilities. *Catalogue 72-002, February 1968*.

Average Weekly Earnings, 1961-1969 for:

Canada: Transportation; Highway and bridge maintenance.

Atlantic Region: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance.

Quebec: Transportation, communication and other utilities; Transportation.

Atlantic Region: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance. *Catalogue 72-002, November 1971*.

Average Weekly Earnings, 1968-1970, for Canada, Ontario and Quebec, for scientific and professional equipment; miscellaneous manufacturing industries; non-durable goods; manufacturing; wholesale trade; trade; industrial composite. *Catalogue 72-002, February 1972*.

Average Weekly Hours, Average Hourly Earnings, Average Hourly Wages of Hourly-rated Wage-earners - 1961-1967 for:

DONNÉES CHRONOLOGIQUES SUR L'EMPLOI, LES GAINS ET LA DURÉE DU TRAVAIL(1) (fondées sur la Classification type des industries de 1960)

Les séries continues suivantes de 1957 jusqu'à aujourd'hui sont disponibles:

1. Indices de l'emploi (1961 = 100).
2. Gains hebdomadaires moyens.
3. Heures hebdomadaires moyennes et rémunération horaire moyenne des employés à salaire (heures déclarées).
4. Rémunération hebdomadaire moyenne des employés à salaire (heures déclarées) (disponibles pour la période 1957-1970 seulement).
5. Effectifs et nombre d'employés à salaire (heures déclarées) (disponibles sur demande seulement pour les périodes antérieures à 1971).

A. 1957-1960

Les données mensuelles n'ont pas été publiées mais sont disponibles sur demande.

Les moyennes annuelles figurent dans:

Review of Employment and Average Weekly Wages and Salaries, *n° 72-201 au catalogue, 1957-1967* Review of Man Hours and Hourly Earnings, *n° 72-202 au catalogue, 1957-1967*.

B. 1961-1970

Indices de l'emploi, 1961-1964, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir Employment, Earnings and Hours, *n° 72-002 au catalogue, octobre 1971*.

Indices de l'emploi, 1965-1967, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir le *n° 72-002 au catalogue, février 1968*.

Gains hebdomadaires moyens, 1961-1969, pour:

Canada: Transports; entretien des routes et des ponts.

Région de l'Atlantique: Transports, communications et autres services publics; transports; entretien des routes et des ponts.

Nouvelle-Ecosse: Transports, communications et autres services publics; transports.

Québec: Transports, communications et autres services publics; transports; entretien des routes et des ponts. *n° 72-002 au catalogue, novembre 1971*.

Gains hebdomadaires moyens, 1968-1970, Canada, Ontario et Québec pour les instruments scientifiques et professionnels; les manufactures diverses; les biens non durables; les manufactures; le commerce de gros; le commerce; et l'ensemble des industries. Voir le *n° 72-002 au catalogue, février 1972*.

Heures hebdomadaires moyennes, Rémunération horaire moyenne, Gains hebdomadaires moyens des employés à salaire (heures déclarées), 1961-1967 for:

Canada: Highways, bridges and streets; Engineering; Construction.

Ontario: Highways, bridges and streets; Engineering; Construction; Highway and bridge maintenance. *Catalogue 72-002, June 1972.*

Average Weekly Hours, Average Hourly Earnings, Average Weekly Wages - 1961-1969 Canada - Atlantic Region - Quebec - for highway and bridge maintenance - Catalogue 72-002, December 1971.

All other available monthly and annual data for 1961-1964 are published in:

Toutes les autres données mensuelles et annuelles disponibles pour 1967 sont publiées dans les n°s 72-201 et 72-202 au catalogue, 1967-1969.

Toutes les autres données mensuelles et annuelles disponibles pour la période 1968-1970 sont publiées dans les n°s 72-201 et 72-202 catalogue, 1968-1970.

C. 1971-1973

Indices de l'emploi et gains hebdomadaires moyens, 1973, Canada, Région de l'Atlantique, Nouvelle-Ecosse et Halifax pour les magasins, le commerce de détail, le commerce et l'ensemble des industries. Voir le n° 72-002 au catalogue, juillet 1974.

Indices de l'emploi, non désaisonnalisés et désaisonnalisés, pourcentage de femmes, le nombre d'employés, rémunération hebdomadaire moyenne des employés à traitement, ensemble des employés à salaire, heures hebdomadaires moyennes et rémunération horaire moyenne des employés à salaire (heures déclarées) de janvier 1973 à juin 1974 pour Canada et Québec, pour l'entretien des routes et ponts, transports, communication et autres services publics et l'ensemble des industries. Voir le n° 72-002 au catalogue septembre 1974.

Nombre d'employés à traitement, ensemble des employés à salaire employés à salaire (heures déclarées), rémunération hebdomadaire moyenne des employés à traitement, ensemble des employés à salaire, heures hebdomadaires moyennes et rémunération horaire moyenne des employés à salaire (heures déclarées) de janvier 1973 à juin 1974 pour Canada et Québec, pour l'entretien des routes et ponts. Voir le n° 72-002 au catalogue, septembre 1974.

Toutes les autres séries sont publiées dans les bulletins mensuels n° 72-002 au catalogue pour les années 1971, 1972 et 1973.

(1) Les numéros des publications susmentionnées renferment les dernières données disponibles pour toute série donnée. Les données relatives à ces séries figurant dans d'autres numéros de ces publications peuvent avoir été rectifiées depuis.

CONCEPTS AND METHODS

Each month the Monthly Employment, Payrolls and Labour Income Section of the Labour Division, through a mail survey, collects information on employment, earnings and hours which are tabulated and presented in this report. Data which, prior to March 1971, were published separately in "Employment and Average Weekly Wages and Salaries" (Catalogue 72-002) and in "Man-Hours and Hourly Earnings" (Catalogue 72-003) have been combined in this report. The following notes explain the concepts and methods used in the survey.

Reporting Unit

The reporting unit is usually the establishment, that is, the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "gross mark-up" or "gross profit" as well as data on employment and payrolls. For purposes of detailed geographic statistics, the Section often requests that the reporting unit be a sub-establishment unit which, although not capable of reporting all basic statistics, can report employment and payroll data for that particular location.

Generally, the survey covers larger companies only, that is, companies having 20 or more employees in any month of the year. However, all the establishments of a multi-establishment company are included if the company had 20 or more employees in total in any month of the year even though any single establishment may have had only a few employees.

Reference Period

Conceptually, the figures refer to the last seven days in the specified months. In practice, few establishments keep payroll records covering precisely this period and establishments are therefore permitted to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the payroll data are reduced to one week's proportion of the totals. The numerators of the fractions used in calculating these weekly equivalents are 5, 6 or 7, depending on the number of working days per week in which the establishment operated in the pay period. The denominators of the fractions are the number of working days in the reference pay periods. For employees paid at annual or monthly rates, the earnings are not affected by the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, without regard to the length of the calendar month.

When a holiday, layoff or industrial dispute occurs in an establishment that reports a pay period that is different from the last seven days of the month, an adjustment is made to the data, if the holiday, layoff or dispute affects the two periods differently, so that the data accurately reflects the actual situation during the reference period.

Coverage

All industries are covered by the survey, with the exceptions of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private household and public administration and defence. Because of the limitation of the survey to larger firms, there is somewhat uneven coverage of employment by industry as well as by province and urban area. The percentage of total employment covered depends on the proportion

CONCEPTS ET MÉTHODES

Chaque mois, la Section des Statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail de la Division du travail recueille, par voie d'enquête postale, des données sur l'emploi, les gains et les heures de travail, données qui sont ensuite publiées ici sous forme de tableaux. Les données qui, avant mars 1971, étaient publiées séparément dans "Employment and Average Weekly Wages and Salaries" (n° 72-002 au catalogue) et dans "Man-Hours and Hourly Earnings" (n° 72-003 au catalogue) sont regroupées ici. Les notes qui suivent expliquent les concepts et la méthodologie de l'enquête.

Unité de déclaration

L'unité de déclaration est ordinairement l'établissement, c'est-à-dire la plus petite unité constituant un ensemble d'exploitation séparé en mesure de déclarer tous les éléments de base relevant de la statistique des activités économiques, y compris les données sur les entrées et les sorties qui sont nécessaires pour calculer la "valeur ajoutée" ou la "majoration brute" ou le "bénéfice brut" ainsi que des données sur l'emploi et les rémunérations. Pour obtenir des statistiques géographiques détaillées, la Section demande souvent que l'unité de déclaration se situe à un niveau qui est en deça de celui de l'établissement, mais qui permet quand même d'obtenir des données sur l'emploi et les rémunérations à ce niveau, même si, par définition, ce niveau ne peut fournir toutes les statistiques de base.

En règle générale, l'enquête vise seulement les grandes entreprises, c'est-à-dire les entreprises employant 20 employés ou plus au cours de n'importe quel mois de l'année. Toutefois, tous les établissements d'une entreprise à établissements multiples sont pris en compte si l'entreprise emploie 20 employés ou plus, au total, au cours de n'importe quel mois de l'année, même si un de ces établissements peut n'avoir eu que quelques employés.

Période de référence

En théorie, l'enquête vise les chiffres des sept derniers jours des mois de référence. Vu qu'en pratique peu d'établissements tiennent des registres de paye pour cette période précise, on permet aux établissements de faire porter leurs chiffres sur la (ou les) dernière(s) période(s) de paye de chaque mois.

Si la période de paye visée dépasse une semaine, les chiffres sont réduits en conséquence. Les numérateurs des fractions utilisées pour calculer l'équivalent hebdomadaire sont 5, 6 ou 7, suivant le nombre de jours ouvrables par semaine où l'établissement a été en exploitation pendant la période de paye. Les dénominateurs des fractions sont le nombre de jours ouvrables des diverses périodes de paye. Dans le cas du personnel qui est rémunéré sur une base annuelle ou mensuelle et dont les gains ne sont pas touchés par le nombre de jours ouvrables au cours du mois, on utilise des proportions fixes pour ramener les gains sur une base hebdomadaire, sans tenir compte de la longueur du mois civil.

En cas de jour férié, de congédiement ou de conflit du travail dans un établissement dont la période de paye ne correspond pas aux sept derniers jours du mois, les données sont rectifiées lorsque l'effet du jour férié, du congédiement ou du conflit n'est pas le même sur les deux périodes, de manière que les données soient le reflet fidèle de la situation pendant la période de référence.

Champ de l'enquête

Toutes les branches d'activité économique sont prises en compte dans l'enquête, à l'exception de l'agriculture, de la pêche et du piégeage, de l'éducation et des services connexes, des services d'hygiène et de bien-être, des organismes religieux, des ménages et de l'administration publique et de la défense. Parce que l'enquête se limite aux grandes entreprises, le champ d'observation de l'emploi par branche d'activité, par province et par région urbaine manque quelque peu d'uniformité. Le

tion of larger to smaller establishments. This proportion varies considerably among industries. The following table shows annual employment as reported in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms plus supplementary surveys. Estimates of total employment are published in "Estimates of Employees by Province and Industry" (Catalogue 72-008).

pourcentage de l'emploi total qui est observé dépend du rapport des grands établissements aux petits établissements. Cette proportion varie considérablement d'une branche à l'autre. Le tableau suivant indique le pourcentage annuel de l'emploi, tel qu'il ressort de l'enquête, en pourcentage du chiffre estimatif de l'emploi total, ce dernier étant la somme des résultats de l'enquête sur l'emploi et la rémunération et des résultats d'une enquête par échantillon auprès des petites entreprises ainsi que d'autres enquêtes supplémentaires. Des estimations du nombre total d'employés sont publiées sous le titre "Estimations du nombre d'employés par province et par industrie" (n° 72-008 au catalogue).

Larger-Firm Survey Employment as a Percentage of Total Estimated Employment, by Industry Division, for Canada and Provinces, 1972 Annual Averages(1)

(1) Total estimated employment is derived by adding together data from the employment and payrolls survey of larger-firms and data from a sample survey of smaller firms plus supplementary surveys. - L'estimation de l'emploi total est obtenue en additionnant les données de l'enquête sur l'emploi et la paie dans les grandes entreprises à celles d'une enquête par échantillonnage dans les petites entreprises et d'autres enquêtes supplémentaires.

(2) Includes recreational, business, personal and miscellaneous services only; data has not been published previously. - Comprend seulement les services récréatifs, commerciaux, personnels et divers; ces données n'ont pas été publiées auparavant.

(3) These percentages are small because non-commercial services including education and related services, health and welfare services, religious organizations and private households, are included in total estimated employment but are not part of the larger-firm employment survey. - Ces pourcentages sont petits parce que les services non commerciaux, y compris l'enseignement et les services connexes, la santé et les oeuvres sociales, les organismes religieux et les ménages privés, sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

(4) Excludes non-commercial services and public administration and defence; data has not been published previously. - Ne comprend pas les services non commerciaux et l'administration publique et de la défense; ces données n'ont pas été publiées auparavant.

(5) These percentages are smaller because both non-commercial services and public administration and defence are included in total estimated employment but are not part of the larger-firm employment survey. - Ces pourcentages sont plus petits parce que les services non commerciaux de même que l'administration publique et la défense nationale sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

(6) Data for forestry and construction by province are not available for periods more recent than 1970. Les données pour le forestage et la construction ne sont pas disponibles par province après l'année 1970.

Geographic Classification

Reporting units are assigned to a province, a county (as defined by the Census of Population) and, where applicable, to an urban area. Data for Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are aggregated in some tables to give statistics for the Atlantic Region. Similarly, data for Manitoba, Saskatchewan and Alberta are added together to provide totals for the Prairie Region. The Census of Population's "Metropolitan Area" definitions were used for the nineteen applicable urban areas. The definitions used for other urban areas are based on a labour market concept; the areas usually include the surrounding territory as well as the urban centre. A list showing the territory included in each

Classification géographique

Les unités de déclaration sont affectées à une province, à un comté (selon la définition établie par le recensement de la population) et, s'il y a lieu, à une région urbaine. Les données de Terre-Neuve, de l'Île-du-Prince-Édouard, de la Nouvelle-Écosse et du Nouveau-Brunswick sont agrégées dans certains tableaux présentant des statistiques pour la région de l'Atlantique. De la même manière, les données du Manitoba, de la Saskatchewan et de l'Alberta sont additionnées pour former le total pour la région des Prairies. On a retenu la définition de "région métropolitaine" pour les dix-neuf régions urbaines applicables. Les définitions employées pour les autres régions urbaines sont fondées sur le concept du marché du travail; les régions englobent

bulated urban area is available from the Monthly Employment, Payrolls and Labour Income Section. The reporting units not located in a tabulated urban area are included in county, provincial and regional totals.

Industrial Classification

All establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the largest net value added by these activities, or where this is not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not necessarily shifted from industry to industry each time its principal activity changes.

Statistics from the survey are based on the 1960 Standard Industrial Classification. A description of the various industries and groups of industries may be found in the "Standard Industrial Classification Manual", Catalogue 12-501 (1960). The "S.I.C. code" columns in the main tables refer to this manual. The tables contain a few groupings not found in the Standard Industrial Classification. These include:

Industrial composite (031-899) - The sum of the industries included in the survey. (see Coverage)

Durable goods manufacturing (durable) - The sum of wood products (S.I.C. 250-259), furniture and fixtures (S.I.C. 260-269), primary metal industries (S.I.C. 290-298), metal fabricating industries (S.I.C. 300-309), machinery (except electrical) (S.I.C. 310-318), transportation equipment (S.I.C. 320-329), electrical products (S.I.C. 330-339), and non-metallic mineral products (S.I.C. 340-359).

Non-durable goods manufacturing (non-dur) - The sum of food and beverages (S.I.C. 100-147), tobacco processing and products (S.I.C. 150-153), rubber products (S.I.C. 160-169), leather products (S.I.C. 170-179), textile products (S.I.C. 180-229), knitting mills (S.I.C. 230-239), clothing (S.I.C. 240-249), paper and allied industries (S.I.C. 270-274), printing, publishing and allied industries (S.I.C. 280-289), petroleum and coal products (S.I.C. 360-369), chemicals and chemical products (S.I.C. 370-379), and miscellaneous manufacturing industries (S.I.C. 380-399).

Building (404,421) - The sum of general contractors (S.I.C. 404) and special trade contractors (S.I.C. 421).

Engineering (406-409) - The sum of highway, bridge and street construction (S.I.C. 406) and other construction (S.I.C. 409).

In addition, the synthetic textile industry (201) is subdivided into spun yarn and fabrics (2011) and filament yarn and staple fibres (2012).

Employment

Employment data represent all employees on the payrolls of reporting units in the reference period. The employee concept excludes sole owners or partners in unincorporated businesses, non-voting directors, the self-employed, unpaid family workers, persons doing non-remunerative volunteer work, pensioners, home workers,

ordinairement le territoire avoisinant avec le centre urbain. On peut obtenir sur demande une liste indiquant le territoire compris dans chaque région urbaine en s'adressant à la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail. Les unités de déclaration situées ailleurs que dans une région urbaine retenue sont comprises dans les chiffres du comté, de la province et de la région.

Classification par activité économique

Tous les établissements appartiennent à une branche d'activité économique, qui est déterminée en fonction de leur activité principale. Si un établissement a plusieurs activités économiques, son activité principale est déterminée par la plus grande valeur nette ajoutée de ces activités, ou si cela n'est pas possible, par les recettes brutes au titre des différentes activités. Si un établissement exerce des activités très diverses, on ne le transfère pas nécessairement d'une branche à l'autre chaque fois que son activité principale change.

Les statistiques tirées de l'enquête sont fondées sur la Classification type des industries de 1960. On peut trouver une description des diverses activités économiques et groupes d'activités économiques dans le "Manuel de la classification type des industries", n° 12-501 au catalogue (1960). Les colonnes "code de la C.T.I." des principaux tableaux renvoient à ce manuel. Les tableaux renferment quelques groupements qui ne se trouvent pas dans la Classification type des industries. Ce sont:

Ensemble des industries (031-899) - l'ensemble des activités économiques visées par l'enquête. (voir Champ de l'enquête)

Manufactures, biens durables (durable) - l'ensemble de l'industrie des produits du bois (C.T.I. 250-259), de l'industrie des meubles et accessoires d'ameublement (C.T.I. 260-269), de l'industrie des métaux (formes primaires) (C.T.I. 290-298), de l'industrie des produits métalliques (C.T.I. 300-309), de l'industrie de la machinerie (sauf le matériel électrique) (C.T.I. 310-318), de l'industrie du matériel de transport (C.T.I. 320-329), de l'industrie des appareils et du matériel électriques (C.T.I. 330-339), et de l'industrie des produits minéraux non métalliques (C.T.I. 340-359).

Manufactures, biens non durables (non dur.) - L'ensemble de l'industrie des aliments et boissons (C.T.I. 100-147), de l'industrie du traitement et des produits du tabac (C.T.I. 150-153), de l'industrie des produits du caoutchouc (C.T.I. 160-169), de l'industrie des produits du cuir (C.T.I. 170-179), de l'industrie des produits du textile (C.T.I. 180-229), de l'industrie de la bonneterie (C.T.I. 230-239), de l'industrie du vêtement (C.T.I. 240-249), de l'industrie du papier et des produits connexes (C.T.I. 270-274) de l'imprimerie, de l'édition et des industries connexes (C.T.I. 280-289), de l'industrie du pétrole, du charbon et de leurs dérivés (C.T.I. 360-369), de l'industrie chimique et des produits connexes (C.T.I. 370-379) et des industries manufacturières diverses (C.T.I. 380-399).

Bâtiment (404, 421) - L'ensemble des entrepreneurs généraux (C.T.I. 404) et des entrepreneurs spécialisés (C.T.I. 421).

Genie civil (C.T.I. 406-409) - L'ensemble de la construction de routes, ponts et rues (C.T.I. 406) et des autres constructions (C.T.I. 409).

En outre, l'industrie des textiles synthétiques (201) est subdivisée en filés et tissus (2011) et en filés de filaments et fibres discontinues (2012).

Emploi

Les données sur l'emploi représentent tous les employés inscrits aux registres de paye des unités de déclaration au cours de la période de référence. Le concept d'employé exclut les propriétaires actifs ou partenaires d'entreprises non constituées en corporation, les membres des conseils d'administration qui ne travaillent pas dans l'entreprise, les travailleurs

and persons providing services to an establishment on the basis of a contract for services. Counted as employed, therefore, are all wage-earners and salaried employees who are paid for their services or are on paid absence during the reference period, except for casual employees working less than seven hours in the pay period. *Regular part-time* employees are treated as employed regardless of the number of hours worked during the pay period.

For example, an employee working for a part of the reference period and unemployed or on strike for the rest, is counted as employed. Employees not receiving pay for the entire reference period because of strike or as a consequence of a strike, or those persons on leave without pay, are not included among the employed.

Wage-earners

Wage-earners are defined by occupation rather than by the method of payment. They are those employees engaged in actual production and related operations, including maintenance, warehouse and delivery staffs, security staff, routemen, driver-salesmen, sales clerks in retail stores, waitresses, and working foremen performing functions similar to those of the employees whom they supervise, etc. Wage-earners may be paid a fixed monthly amount or on the basis of hours worked. The survey covers all wage-earners regardless of the method of payment and average weekly wages are computed for all. However, derivations of average weekly hours and average hourly earnings are based only upon data for wage-earners for whom hours data are available.

Salaried Employees

Salaried employees constitute executive, administrative, supervisory, technical and professional personnel, commission agents, and travelling salesmen directly responsible to the administration, as well as general office, clerical and related workers in the office and plant. In addition, working directors of incorporated businesses are included in this category.

Earnings

Earnings of wage-earners and salaried employees represent gross pay for the week, before deductions for taxes, unemployment insurance contributions, etc. Gross pay includes salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. The payroll concept does not include supplementary labour costs such as employers' contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or directors' fees.

The term "earnings" is used to denote the total of weekly wages of the wage-earners and salaries of the salaried employees. The publications prior to March 1971 contained this combined data entitled "Average Weekly Wages and Salaries". These data are comparable with "Average Weekly Earnings" of total employees in

autonomes, les travailleurs familiaux non rémunérés, les bénévoles pensionnés, les travailleurs à domicile et les personnes fournissant services à forfait ou sous contrat. Sont donc considérés comme employés tous les employés à salaire et tous les employés à traitement qui sont rémunérés pour leurs services ou qui sont en congé payé pendant la période de référence, à l'exception des occasionnels ayant travaillé moins de heures pendant la période de paye. Les employés réguliers à temps partiel sont comptés parmi les employés quel que soit le nombre d'heures qu'ils travaillent pendant la période de paye.

Par exemple, une personne travaillant une partie de la période de référence et en chômage ou en grève le reste de la période, est comptée comme occupée. Les employés qui ne sont pas rémunérés pour toute la période de référence à cause d'une grève ou des conséquences d'une grève ou les personnes en congé sans paye ne figurent pas parmi les personnes occupées.

Employés à salaire

L'employé à salaire est défini par la nature du travail plutôt que par le mode de rémunération. Les employés à salaire sont les personnes travaillant effectivement à la production et à des opérations assimilées, en particulier le personnel d'entretien, d'entrepôt et de livraison, le personnel de sécurité, les chauffeurs-livreurs, les vendeurs itinérants, les commis des magasins de détail, les serveuses et les contremaîtres remplissant des fonctions analogues à celles des employés dont ils ont la charge, etc. Les employés à salaire peuvent être rémunérés sur une base mensuelle fixe ou variable suivant le nombre d'heures travaillées. L'enquête couvre tous les employés à salaire quel que soit leur mode de rémunération et les gains hebdomadaires moyens sont calculés pour tous. Toutefois, les heures hebdomadaires moyennes et les rémunérations horaires moyennes sont calculées uniquement d'après les données relatives aux employés à salaire dont on connaît le nombre d'heures de travail.

Employés à traitement

Les employés à traitement comprennent les directeurs, les administrateurs, les surveillants, les cadres techniques et spécialisés, les agents de commission, les voyageurs de commerce relevant directement de l'administration, ainsi que les employés de bureau, les commis et les travailleurs assimilés, au bureau et à l'usine. Les membres des conseils d'administration d'entreprises constituées en corporation qui travaillent dans l'entreprise sont également compris dans cette catégorie.

Rémunération

Les rémunérations des employés à salaire et des employés à traitement représentent les gains bruts de la semaine, avant toutes les déductions d'impôt, de cotisations d'assurance-chômage, etc. La rémunération brute comprend les salaires, la rémunération au taux ordinaire, la rémunération du travail aux pièces et les commissions régulières, les primes au rendement, les primes de vie chère et autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements versés aux personnes en congé payé pendant la semaine de l'enquête. Le concept de rémunération ne comprend pas les frais supplémentaires de main-d'œuvre tels que les cotisations de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie, à la caisse d'indemnisation pour accidents de travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur de la pension, les paiements de nature, les frais de déplacement, les indemnités de retraite, les gratifications versées à intervalles irréguliers et peu fréquents ni les jetons de présence aux administrateurs.

Le terme "rémunérations" désigne l'ensemble des gains des employés à salaire et des employés à traitement. Les publications antérieures à mars 1971 renfermaient des données réunies sous le titre "Average Weekly Wages and Salaries". Ces données sont comparables aux "rémunérations hebdomadaires moyennes" de l'ensemble des employés

the present publication. The system now provides separate earnings data for all wage-earners and salaried employees whereas formerly only "Average Weekly Wages" for hourly-rated wage-earners was available.

Index Numbers

Index numbers are calculated by dividing the current month's employment (or payroll) by the monthly-average of the total base year employment (or payroll). The current employment consists of all employment reported by establishments that meet our size criteria in the current period. Base year employment consists of the employment of establishments that had 20 or more employees in any month of 1961. The payroll index is calculated in a similar fashion.

Seasonally-adjusted index numbers remove from the employment indexes those regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the trend, cycle, and irregular components of the time series. The X-11 variant of the U.S. Census Method II is used to calculate the seasonally-adjusted index numbers; additional seasonally-adjusted series may be found in "Employment, earnings and hours, seasonally-adjusted series January 1961 - December 1971" (Catalogue 72-206).

Averages

The average weekly hours figure is obtained by dividing total weekly man-hours by the number of wage-earners who worked those hours. Average hourly earnings are obtained by dividing total weekly wages of hourly-rated wage-earners by their total weekly hours. Both these averages apply only to the subset of wage-earners for whom hourly details are reported. It should be noted that total hours include overtime hours actually worked and that the wage-earner total includes part-time wage-earners and casuals working more than seven hours during one week. Annual statistics are calculated from the aggregate of the monthly data, with the exception of those shown as preliminary (p); the latter are based on monthly averages.

Statistical Presentation

Each month, statistics for three months are prepared by the Monthly Employment, Payrolls and Labour Income Section. Data for the first, most current month, are entitled first estimates. They are based on a limited number of returns (usually about 50%) and only highly aggregated figures are released in the Statistics Canada Daily and the First Estimates table of this publication. Simultaneously, second estimates are prepared for the month immediately preceding the most current data and third estimates for the month prior to that. Both of these latter estimates are of higher quality than that of the first because of the higher rate of returns (typically, 65% and 75%, respectively). Consequently full details for both months are shown in this publication.

After completion of the third estimate, further revisions to the data are made to incorporate late returns and corrected information received from our respondents or to rectify mechanical errors. Larger corrections are calculated immediately and appear in the historical and special tables and in column for the previous year in tables 2, 3 and 4 of this publication. The smaller corrections are completed in the annual tabulations when all returns are retabulated to produce revised figures and annual averages; these data are contained in catalogue 72-201 and 72-202.

en compte ici. Ce système permet maintenant d'avoir des données distinctes pour tous les employés à salaire et les employés à traitement tandis qu'autrefois on ne pouvait connaître que les "rémunérations hebdomadaires moyennes" des employés à salaire rémunérés à taux horaire.

Nombres-indices

On obtient les nombres-indices en divisant le nombre total d'employés (ou la rémunération) du mois courant par la moyenne mensuelle du nombre d'employés (ou de la rémunération) de l'année de base. Le nombre courant d'employés est l'ensemble des employés déclarés par les établissements dont la taille répond à notre critère pendant la période courante. Le nombre d'employés pour l'année de base est le nombre d'employés des établissements employant 20 employés ou plus pendant n'importe quel mois de l'année 1961. L'indice de la rémunération est calculé de la même manière.

La désaisonnalisation des nombres-indices a pour effet d'éliminer des indices de l'emploi les fluctuations qui se produisent à intervalles réguliers et qui s'appellent variations saisonnières. Les nombres-indices désaisonnalisés représentent donc assez bien la tendance, le cycle et les composantes irrégulières de la série chronologique. La variante X-11 de la méthode II du recensement des Etats-Unis est utilisée pour calculer les nombres-indices désaisonnalisés; on peut trouver d'autres séries désaisonnalisées dans "Emploi, rémunérations et heures, séries désaisonnalisées janvier 1961-décembre 1971" (n° 72-206 au catalogue).

Moyennes

On calcule les heures hebdomadaires moyennes en divisant le nombre total d'heures-hommes par le nombre d'employés à salaire qui ont fait ces heures. On obtient les rémunérations horaires moyennes en divisant la rémunération hebdomadaire totale des employés à salaire rémunérés à l'heure par le nombre total de leurs heures par semaine. Ces deux moyennes s'appliquent seulement aux employés à salaire dont le nombre d'heures est déclaré. À remarquer que le nombre total d'heures comprend les heures supplémentaires réelles et que le total des employés à salaire comprend les employés à salaire à temps partiel et les occasionnels qui travaillent plus de sept heures par semaine. À l'exception des statistiques provisoires (p), qui sont fondées sur les moyennes mensuelles, les statistiques annuelles sont établies à partir de l'ensemble des données mensuelles.

Présentation statistique

Chaque mois, la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail prépare des statistiques pour trois mois. Les données du premier mois, le mois le plus récent, sont appelées "premières estimations". Elles sont fondées sur un nombre limité de déclarations (environ 50%) et seuls des chiffres très généraux sont publiés dans Le Quotidien de Statistique Canada et dans le tableau "Premières estimations" de la présente publication. En même temps, la Section prépare des deuxième estimations pour le mois qui précède le mois le plus récent, et des troisième estimations pour le mois qui précède celui-là. Ces deux dernières estimations sont de meilleure qualité que les premières en raison de la disponibilité d'un plus grand nombre de réponses (d'habitude 65% pour les deuxième estimations et 75% pour les troisième). Par conséquent, la présente publication contient tous les détails pour ces deux mois.

Une fois terminées les troisième estimations, on effectue d'autres rectifications à la lumière des déclarations des retardataires et des corrections reçues de nos enquêtés, ou par suite de la correction de certaines erreurs mécaniques. Les corrections les plus importantes sont effectuées immédiatement; elles paraissent dans les tableaux chronologiques et spéciaux ainsi que dans la colonne de l'année précédente aux tableaux 2, 3 et 4 de la présente publication. Les corrections de moindre importance sont effectuées dans les tableaux annuels quand toutes les réponses ont été totalisées de nouveau en vue de la production de chiffres et de moyennes annuelles rectifiés; ces données sont publiées dans les publications 72-201 et 72-202.
